Dr. Anthony Youn is the rare plastic surgeon who does everything he can to keep his patients out of the operating room. You'll also discover which fruit can help you look younger and prevent sun damage and which supplements are proven to reduce fine lines. From your face, to your neck, your hands, your eyes, and your body, The Age Fix has you covered with an abundance of actionable takeaways and insider advice to help you reclaim your youthful glow—without spending a fortune or going under the knife!

Female Celebrity and Ageing Deborah Jermyn, 2016-04-29 *Female Celebrity and Ageing: Back in the Spotlight* interrogates the myriad ways in which celebrity culture constructs highly visible ideologies of femininity and ageing, and how ageing female celebrities have negotiated the media in a variety of industrial, historical and national contexts. In the era when the 'baby boomers' have started drawing their pensions, the boundaries of what constitutes 'old age' have never seemed more fluid, and ageing has never been presented by advertisers and marketers in a more dynamic fashion. However, the fact remains that ageing is still widely feared, and growing old is an inherently gendered process, in which ageing women are paradoxically both rendered invisible and subjected to damning scrutiny. Nowhere is this conflicting state of affairs more evident than in celebrity culture, where ageing female stars are praised for 'growing old gracefully' one moment, and condemned for 'letting themselves go' the next, when they fail to age 'appropriately'. Examining a variety of themes and ageing women in the spotlight, from Barbara Stanwyck to Madonna to Charlotte Rampling, the essays collected here forge new critical and conceptual insights into how women grow older in the media, and the implications of this for what Susan Sontag memorably called the double standard of ageing. This book is based on a special issue of *Celebrity Studies*.

Celebrity Morals and the Loss of Religious Authority John Portmann, 2019-04-30 This book examines American popular culture to demonstrate that celebrities have superseded religious figures as moral authorities. As trust in religious institutions has waned over recent decades, the once frivolous entertainment fringe has become the moral center. Young people and voters increasingly take cues from actors and athletes. The book begins by offering a definition of celebrity and showing that the profile of celebrities has changed dramatically, particularly since the 1960s. They can now chart their own careers, manage their own personal lives and weigh in on pressing moral issues in a manner that hasn't always been the case. This can be to the good, it is argued, for some counterintuitive reasons. Very few stars pretend to be moral exemplars, unlike the frequently hypocritical elites they have replaced. Others, however, are seemingly poorly qualified to speak on complex moral issues. In the end, it also turns out that who tells us how to feel about any moral issue counts at least as much as what they tell us. This is a fresh look at the impact of celebrity culture on contemporary morality and religious authority. As such, it will be of great use to academics working in religious studies and ethics, as well as popular culture and media studies.

Master Your Stress, Reset Your Health Doni Wilson, 2022-05-03 Learn to manage stress and overcome anxiety with this customizable breakthrough program from leading adrenal distress/stress expert Dr. Doni Wilson. We have come to accept stress and anxiety as being hand-in-glove with being successful. Many of us believe that we are supposed to be superhumans and just ignore stress—carrying on with long hours and sleepless nights, suffering quietly with the headaches, tension, and stomach sensitivity, rather than risk being perceived as unable to “keep up” with the demands of modern life. But we're not robots or machines; we're human. While stress is inevitable, and, in certain situations, even necessary for effective

functioning, we must keep it from overpowering our daily lives by learning how to harness stress to empower us. In *Master Your Stress, Reset Your Health*, Dr. Doni Wilson shows that the key to breaking the cycle is finding and treating your unique stress type. After more than 20 years working with thousands of patients, Dr. Doni has found that people generally fall into one of five types based on their adrenaline and cortisol levels throughout the day: the Night Owl, the Stress Magnet, Yawning on the Go, Tired and Wired, or Sluggish and Stressed. In this groundbreaking book, she'll help you identify your stress type--and give you the tools to make stress work for you. Your body's particular response is based on genetics and your lifestyle. Your pattern is unique—even in similar situations, different people may respond to that stress in a completely different way. Dr. Doni's customizable C.A.R.E. program is simple: Clean eating, Adequate sleep, Recovery, and Exercise. Dr. Doni shows you how to tailor each step of the program for your stress type to allow you to: Overcome exhaustion and fatigue Clear up brain fog and improve memory Optimize your body weight Stop insomnia Recover from anxiety and depression Relieve headaches, chronic pain, and digestive issues Increase your energy, sex drive, and immunity Prevent serious illnesses such as cancer, dementia, and heart disease Add years to your life Far too many of us have accepted the negative effects of stress and anxiety as a fact of life—pushing through rather than risking falling short of the demands of modern life. This groundbreaking guide will set you on a path to become resilient to stress, so you can thrive like never before.

Sanity, which explores all the fads, facts and fiction. Using a common science meets common sense approach, this groundbreaking book finally answers the question, what should we be eating? In this International award-winning, #1 best-selling book, Food Sanity shares never-before-heard nutritional and dieting advice that will ensure they get the maximum benefits from their food and dietary supplements.
