Humans Are Not From Earth () Ellis Silver,2018 The Neanderthals had brow ridges to keep the sun out of their eyes, but why don't we? When a leading scientist walked into a wall and broke his nose, he decided to find out. In this fascinating and wide-ranging book, Dr. Ellis Silver examines the evidence that's all around us ... and discovers that we evolved on a world distinctly different from the one we live on today.Here's what you'll discover:53 factors that prove we couldn't have evolved on Earth.Why we're here on Earth, and how and when we got here.Where our true home planet is, and what it's like to live there.Why valid evidence is ignored, denied and covered up by scientists and governments. (There's actually a very good reason.)What we really know about extraterrestrials and their spacecraft.Dr. Silver also uncovers:The origins of RNA and DNA, and how life evolved - on Earth and elsewhere.A more accurate timeline of human evolution - without the gaps and mistakes.Why the Theory of Evolution is wrong - and how to fix it.Why the Out of Africa theory is wrong - and what really happened.And much, much more.Each topic is discussed in depth and backed up with concrete evidence. There are testimonies from expert witnesses, including former world leaders, astronauts, pilots, military personnel, and business leaders; and over 100 pages of references.If you're interested in discovering the truth about humankind's origins, this mindblowing and compelling book is a must-read.

The True(r) Prehistory Aloys Eiling, Leila Sarris, 2025-11-13 This thought-provoking book presents a radically revised version of human prehistory. In a departure from previous works in this area, which have compiled puzzling phenomena and speculative ideas, this volume - the first in a series of four - provides a coherent and conclusive framework that offers a better understanding of our collective prehistoric history. Many events from a bygone era that are often dismissed as myth or fringe theory are investigated through the lens of mathematics and the natural sciences. The result is a compelling concept that challenges entrenched beliefs and sheds new light on distant past of humanity. Adopting a multidisciplinary approach, the place of humankind in nature and the cosmos is explored. In particular, this book provides answers to the question of whether humans are solely the product of natural evolution or if genetic engineering has influenced our development. It critically reinterprets the global spread of humanity, particularly the settlement of the Americas, in light of the latest findings from field research. In addition, it examines the astonishing mathematical and scientific knowledge of ancient civilizations, which reveals how little we truly understand about prehistory. The insights presented call for a paradigm shift in how we

perceive our origins and evolution. Readers seeking a deeper and more nuanced understanding of history will find this a stimulating and transformative view.

Earth's Galactic History and Its Extraterrestrial Connection Constance Victoria Briggs, 2023-11-01 Constance Victoria Briggs, who brought us *The Moon's Galactic History: A Look at the Moon's Extraterrestrial Past and Its Connection to Earth*, continues her exploration into our cosmic connections with her companion book, *Earth's Galactic History, and Its Extraterrestrial Connection*. In this exciting new work, Briggs examines current research, theories and evidence linking Earth and extraterrestrials, past and present. Some of the topics that Briggs covers include whether the Earth was terraformed by advanced extraterrestrials; the theory that the Earth was seeded with life by otherworldly beings; possible extraterrestrial involvement in the creation of humans and more. She looks at evidence of humans being visited by beings from other worlds, and explores the idea that there was once a battle for Earth. She brings us signs, signals, messages, and clues showing evidence that extraterrestrials are trying to communicate with humans and takes us on a journey beneath the oceans where there is believed to be an extraterrestrial presence. Briggs also investigates the possibility that other worldly beings may be residing inside inner Earth. She delves into how extraterrestrials may be visiting Earth via stargates and portals using what she refers to as the "cosmic freeway." Briggs also examines the possibility that there are extraterrestrials living among us, who they are and what their goals may be when it comes to Earth. Extraordinary events believed to be related to extraterrestrials are also revealed. Briggs takes a look at current research into the UFO/UAP/USO phenomena, detailing descriptions of these enigmatic objects and witness reports. She talks about the possibility of there being an authoritative hierarchy within our galaxy that may include other-worldly federations and groups that are responsible for a galactic community. In the end, Briggs ponders humankind's spacefaring future, looking at the latest information and trends on space travel and what we have to look forward to by way of our expansive universe.

The Return Journey Chaitanya Salvi, 2019-12-12 Viraj is a young, passionate and famous scientist. He is on a quest to uncover the mystery of human existence. He meets the beautiful girl of his dreams. It seems that he is in total control of his life. But fate doesn't concur with him. He is banished into exile, announces a faceless voice. The days in exile are destined for him to suffer in the unbearable pain. Will he be able to survive the exile? Will they live happily ever after? Is the exile even real or an illusion? Viraj will not stop until he finds all the answers.

From Slavery to Fighting for Recognition, 2021-02-11 This book is dedicated to our Black military soldier's past, current and future military soldiers that came from the continent of Africa and were forcibly brought to the "New World, the United States of America" as slaves who also defended the beginning of America. Before the American Revolution, some Africans came to the new country as free people, yet we recognized and honored those brave African warriors who fought while being in a segregated society. From the beginning in that "new land" they battled through all odds while the preservation of their

legacy was officially recognized as citizens of the United States of America (U.S.).

From Slavery to Fighting for Recognition: Black Warriors for Freedom, Equality and Integration Dr Sylvester Caraway Jr.,2021-04-30 This book is dedicated to our Black military soldier's past, current, and future military soldiers that came from the continent of Africa and were forcibly brought to the New World, the United States of America as slaves who also defended the beginning of America.

The Scrutiny Ashish Kumbhare, This book is an investigation of the proofs of God's existence in both science and religion. For centuries now, scientists have been trying to find a science surrounding religion. But in this book, we will find the science that is coded within religion. This book starts with the Great city of Alexandria and then progresses to Italy, finally ending up in Space. On our journey of decoding the science in religion we will encounter many popular legends such as the likes of Leonardo Da Vinci, Michelangelo, Raphael, Newton, and then make our final stop at the Modern Einstein—Stephen Hawking. The Scrutiny decodes a number of mathematical equations from religious books as well as ancient civilizations. It starts with man and ends up at the great gods. It answers the most prominent questions of all time—where do we come from? Where are we going? While finding our answers, we get to decode the famous Mona Lisa, The School of Athens and find our answers in the codex of God. During our journey, we will also unmask some famous hoaxes, such as that of the legendary William Shakespeare and the famous legend of Fatima... The Scrutiny concludes with "The Theory of Everything" - A theory that can satisfactorily explain God with the help of both Science and Religion. So buckle up! We are all in for one crazy ride...

Hunting for Aliens on Earth and The Cosmos Maria Johnsen,2024-01-30 Is there life beyond Earth? Could there be a deliberate effort to conceal the truth by governmental entities, and if so, what motives might drive such secrecy? Where does the search for extraterrestrial life lead us? Are we, as a species, intricately connected to the concept of starseeds, or are we truly isolated in the vastness of the cosmos? Could we make contact with extraterrestrial life soon? These questions have ignited extensive discussions, particularly in Europe and North America. In this exploration, I have delved into scientific explanations to unravel these thought-provoking inquiries. The result is a meticulously researched book, titled 'Hunting for Aliens on Earth and The Cosmos,' inviting you to immerse yourself in this captivating adventure. Dedicated to thorough research, the contents of this book delve into the age-old question of whether we exist alone in the expanse of the universe. Each chapter peels away layers of the mysteries of the cosmos, examining topics such as the fundamental structure of life, habitable zones, and the pursuit of extraterrestrial intelligent life. Navigate the complexities of Fermi's paradox and reflect on the potential societal impacts of contact with extraterrestrial beings. This interdisciplinary journey pays homage to significant contributions in astrobiology, robotics, and pioneering initiatives. Positioned at the intersection of technological advancement and curiosity about the cosmos, the book prompts readers to contemplate the outcomes of technological progress and marvel at the potential wonders awaiting us beyond the universe's doors. Embark on this journey, and let your

mind explore the vast possibilities that lie beyond.

SuperMars Ellis Silver, 2021-01-25 In *Humans Are Not From Earth*, ecologist and environmentalist Dr. Ellis Silver proved we couldn't have evolved on this planet. Now he looks at where we really came from - and where we might be heading. A Mars-like planet would suit us better than the Earth, so why did we end up here, on the wrong planet? Could there be another planet Mars in another solar system or another galaxy? Could our ancestors still be living there? Could we find it and live there too? We only have a few hundred million years left on Earth. As the Sun grows hotter, the plants will die and the planet will become uninhabitable. Mars could become our home for the next five billion years. In fact, it will have to - we have no choice. But when the Sun expands into a red giant and consumes the inner planets, Mars will become red hot. And then what? This far-reaching book looks at our real history, including our evolution on another planet and our arrival on Earth, and the many changes we've undergone since we settled here. There's a detailed comparison of Earth, Mars, and our original home planet. And then we take a fascinating look at our possible future, from terraforming Mars, colonizing frozen moons, and building artificial worlds, to planet-hopping in other star systems, and (maybe) surviving the end of the universe.

The Pythia on Ellis Island Nancy Kassell, 1998-02-26 *The Pythia on Ellis Island* explores the lasting influence of the Greco-Roman legacy on contemporary cultural attitudes and values and the contradictions between allegiance to Western European traditions and the quintessentially American drive for change. Understanding how the roots of Western culture developed can help us to see beyond the intellectual and moral fragmentation of postmodern times. For example, Greco-Roman views of difference (immortals and mortals, male and female) became a kind of master template for subsequent interpretations of difference and its implicit fear of diversity. Feminist rereadings of literary and philosophical texts (Homer, Sophocles, lyric poetry, Stoic and Epicurean philosophy, New Comedy, Cicero, and Virgil) show how the classics shaped dualisms that inform Western thought.
