*Non-Governmental Organisations in International Law* Anna-Karin Lindblom, 2005 Even when governments have no democratic basis, they are regarded as the sole representatives of their populations on the international plane and take important decisions on their behalf. It is therefore important that other voices can be heard in international fora alongside governments. NGOs have an increasingly important legal and political role and use several different avenues for their work, such as lodging cases before international courts and other bodies and participating in international meetings and conferences. This book explores these possibilities for the participation of NGOs in international law.

Non-Governmental Organizations in Contemporary China Qiusa Ma, 2005-11-16 Based on documentary materials including interviews with key players in China, this book charts the development of non-governmental and non-profit organizations in China from the late 1970s to the present day. It recounts how in the aftermath of the 1978 reforms that created a market economy and diversified interests and social life, new institutions and organizations outside of the state system increased dramatically in number, size and influence. These organizations, which barely existed before the reforms began in the late 1970s, carry out many social, economic and cultural tasks neglected by the government. Qiusa Ma examines two key questions crucial to understanding the development of NGOs in China: First, is it possible under China's one-party state for non-governmental organizations to thrive and play important economic, social and political functions? And secondly, are NGOs facilitating the formation of a civil society in China?

*Non-Governmental Organizations in World Politics* Peter Willetts, 2010-12-15 Non-governmental organizations (NGOs) from Amnesty International and Oxfam to Greenpeace and Save the Children are now key players in global politics. This accessible and informative textbook provides a comprehensive overview of the significant role and increasing participation of NGOs in world politics. Peter Willetts examines the variety of different NGOs, their structure, membership and activities, and their complex relationship with social movements and civil society. He makes us aware that there are many more NGOs exercising influence in the United Nations system than the few famous ones. Conventional thinking is challenged in a radical manner on four questions: the extent of the engagement of NGOs in global policy-making; the status of NGOs within international law; the role of NGOs as crucial pioneers in the creation of the Internet; and the need to integrate NGOs within mainstream international relations theory. This is the definitive guide to this crucial area within international politics and

should be required reading for students, NGO activists, and policy-makers.

**Non-Governmental Organizations in the Global System** George Kaloudis, 2021-05-04 Non-state actors are not new, but they have never before reached their present strength. Among the plethora of non-state actors are thousands, if not millions, of non-governmental organizations (NGOs) which play a significant role in the global system and whose role is likely to increase in the future. The proliferation of NGOs is of such scale, scholars refer to it as a global associational revolution. By considering NGOs throughout much of the world, Kaloudis focuses on the reasons for the growth of NGOs particularly since the end of the Cold War, the functions of NGOs, assessment of NGOs, and their place in the global system. The author also shows the ambivalent and often paradoxical role of NGOs, which is reflected in the works of scholars and the actual behavior of NGOs themselves.

*Management of International Institutions and NGOs* Eduardo Missoni, Daniele Alesani, 2023-08-31 This second edition of *Management of International Institutions and NGOs* covers all key topics in global governance from a unique management perspective. It analyzes the management challenges associated with international cooperation rather than the more commonly explored political or economic lenses. This text is structured to enable students to connect theory with practice, beginning with the main management frameworks developed in the context of corporate and national public/nonprofit organizations and adapting them to the specificity of international institutions and international non-governmental organizations. This leads to the identification of a “tailored” approach to international organization management based on their institutional and operational settings, stakeholder groups, core business, staff profiles, and financial arrangements. The authors then connect this theory with practice by linking frameworks to several case studies and best practices of organizations currently experimenting with management systems and tools, with case studies including the World Bank and the Gates Foundation. This edition has been extensively revised and updated, with an expanded conceptual framework inclusive of systemic theories of organization, new cases throughout, and new chapters on leadership, supply chain and operations, and human-centered digitization. This comprehensive textbook is a must-own resource for students and academics involved with studying and working with international organizations.

**Non-Governmental Organizations and Development** David Lewis, Nazneen Kanji, 2009-09-10 Non-governmental organizations (NGOs) are high profile actors in the field of international development, both as providers of services to vulnerable individuals and communities and as campaigning policy advocates. This book provides a critical introduction to the wide-ranging topic of NGOs and development. Written by two authors with more than twenty years experience of research and practice in the field, the book combines a critical overview of the main research literature with a set of up-to-date theoretical and practical insights drawn from experience in Asia, Europe, Africa and elsewhere. It highlights the importance of NGOs in development, but it also engages fully with the criticisms that the increased profile of NGOs in

development now attracts. *Non-Governmental Organizations and Development* begins with a discussion of the wide diversity of NGOs and their roles, and locates their recent rise to prominence within broader histories of struggle as well as within the ideological context of neo-liberalism. It then moves on to analyze how interest in NGOs has both reflected and informed wider theoretical trends and debates within development studies, before analyzing NGOs and their practices, using a broad range of short case studies of successful and unsuccessful interventions. David Lewis and Nazneen Kanji then moves on to describe the ways in which NGOs are increasingly important in relation to ideas and debates about 'civil society', globalization and the changing ideas and practices of international aid. The book argues that NGOs are now central to development theory and practice and are likely to remain important actors in development in the years to come. In order to appreciate the issues raised by their increasing diversity and complexity, the authors conclude that it is necessary to deploy a historically and theoretically informed perspective. This critical overview will be useful to students of development studies at undergraduate and masters levels, as well as to more general readers and practitioners. The format of the book includes figures, photographs and case studies as well as reader material in the form of summary points and questions. Despite the growing importance of the topic, no single short, up-to-date book exists that sets out the main issues in the form of a clearly written, academically-informed text: until now.

**A Cross-Sectional Review: Description Of The Environmental Non-Governmental Organizations Between 1980-2000 In Turkey - Müge Ensari Özay - Andrzej Furman** Müge Ensari Özay - Andrzej Furman,2021-02-01 This book aims to describe and classify environmental non-governmental organizations in Turkey. In the data-gathering phase of the study, face to face interviews were conducted with the staff and heads of environmental non-governmental organizations, panels and meetings were attended. After reviewing alternative definitions and classifications of non-governmental organizations, the classification framework has been based on six main criteria: legal structures, objectives, action areas, orientations, geographic distributions, and relations with government. Furthermore, the study addresses the rapid growth of environmental non-governmental organizations in number and diversity, and explains the reasons of this increase as the changing policies of governments, the increase in international financial aids to the NGOs and the growing environmental problems between 1980 and 2000.

**Non-Governmental Organizations and the Global Refugee Regime** Eva Virag Suhajda,2008 Noone questions today the increasing role of non-governmental organizations in international relations. The field of refugee protection requires a complex attitude from NGOs, as here they meet with growing reluctance of state actors, whose interests are more formulated

by economic and security aspects. That is why NGOs does not only provide first-hand assistance to those in need, but also try to influence state's actions, force them to comply with their obligations, sets up new issues on the international agenda, and cooperates with other actors in policy-formulation. Present essay aims to examine this complex role of the non-governmental actors in international relations, and more particularly in the global refugee regime from both NGO and regime analysis points of view. While this essay proves clearly the importance of NGOs, it also shows those faults the regime actors have to overcome and those areas where closer cooperation is needed between them in order to reach the regime's ultimate goal of providing international protection and seeking permanent solutions for the problems of refugees.

### **Non-Governmental Organizations (NGOs) and Sustainable Development in Sub-Saharan Africa** Robert A.

Dibie,2008 This book examines the role of NGOs in development projects on the African continent. It explores the challenges and the contradictions in the relationship between the NGOs, the supporting agencies, and the African people. It is intended to provide guidance for civil society organizations and their client groups who struggle to find viable means to collaborate with NGOs, the private sector, and public sector. This books argues that increased knowledge and cooperation is essential to the achievement of sustainable development. Therefore, community based organizations and public servants must consider whether they possess the necessary resources as well as the economic opportunities before they embark on any activity. Sustainable development activities might not be useful or reasonable for every rural community in Africa. One thing is very clear; the forces of globalization or sustainable development do not respect cultural boundaries. This book clearly states that for African nations to succeed they must find alternatives to centralized powers of national government. In addition, this book examines the transformation of several sub-Saharan African nations in the twenty-first century. African nations must reevaluate their concept of leadership, which rests on the notion that good leaders are born, not made. Therefore, there should be a greater emphasis on the development of political and managerial skills through formal education and industrial training. NGOs and civil societies could play a vital role in this transformation and, therefore, the future of Africa.

*Non-Governmental Organizations, Management and Development* David Lewis,2014-03-05 Non-Governmental Development Organizations have seen turbulent times over the decades; however, recent years have seen them grow to occupy high-profile positions in the fight against poverty. They are now seen as an important element of ‘civil society’, a concept that has been given increasing importance by global policy makers. This book has evolved during the course of that period to be a prime resource for those working (or wishing to work) with and for NGOs. The third edition of Non-Governmental Organizations, Management and Development is fully updated and thoroughly reorganized, covering key issues including, but not limited to, debates on the changing global context of international development and the changing concepts and practices used by NGOs. The interdisciplinary approach employed by David Lewis results in an impressive text that draws upon current research in non-profit management, development management, public management and management theory, exploring the activities, relationships and internal structure of the NGO. This book remains the first and only comprehensive and academically grounded guide to the issues facing international development NGOs as they operate in increasingly complex and challenging conditions around the world. It is the perfect resource for students undertaking studies of NGOs and the non-profit sector, in addition to being an excellent resource for development studies students more generally.
