Heritage Language Policies around the World Corinne A. Seals, Sheena Shah, 2017-09-18 Heritage language policies define the context in which heritage languages are maintained or abandoned by communities, and this volume describes and analyzes international policy strategies, as well as the implications for the actual heritage language speakers. This volume brings together heritage language policy case studies from around the world, foregrounding globalization by covering five regions: the Americas, Europe, Africa, Asia, and Australasia. The countries profiled include the United States, Canada, Argentina, Norway, Sweden, Ireland, Uganda, Namibia, Morocco, Japan, South Korea, Singapore, New Zealand, Australia, and Fiji. This volume also highlights an expanded definition of 'heritage language', choosing to focus on individual and community identities, and therefore including both Indigenous and immigrant languages. Focusing specifically on language policy relating to heritage languages, the chapters address key questions such as Are heritage languages included or excluded from the national language policy discourse? What are the successes and shortcomings of efforts to establish heritage language policies? What is the definition of 'heritage language' in official usage by the local/regional government and stakeholders? How are these language policies perceived by the actual heritage language communities?

International Handbook on Education Development in the Asia-Pacific Wing On Lee, Phillip Brown, A. Lin Goodwin, Andy Green, 2023-11-20 The Springer International Handbook of Educational Development in Asia Pacific breaks new ground with a comprehensive, fine-grained and diverse perspective on research and education development throughout the Asia Pacific region. In 13 sections and 127 chapters, the Handbook delves into a wide spectrum of contemporary topics including educational equity and quality, language education, learning and human development, workplace learning, teacher education and professionalization, higher education organisations, citizenship and moral education, and high performing education systems. The Handbook is grounded in specific Asia Pacific contexts and scholarly traditions, using unique country-specific narratives, for example, Vietnam and Melanesia, and socio-cultural investigations through lenses such as language identity or colonisation, while offering parallel academic discourse and analyses framed by broader policy commentary from around the world.

English Language-Mediated Settings and Educational Inequalities Prashneel Ravisan Goundar, 2025-03-17 In this book, Goundar explores how educational inequalities are responsible for the way students perform in English language-

mediated school settings. He seeks to establish an explicit connection between language testing and educational inequalities at the higher education level. With its focus on higher education, this research is a fresh reminder of the need to continuously revisit and unsettle inequalities that are embedded in education systems. In the South Pacific context, this study reveals the current issues, including medium of instruction challenges, lack of teaching and learning resources, teacher shortages, and language barriers. Goundar's research seeks new answers to the problem of academic English language skills faced by undergraduate students. Since English is a second language for the majority of students in Fiji and as the quality of education varies between urban and rural schools, this cumulatively impacts students' acquisition of English skills, and, consequently, their university performance. The important questions posed and addressed in this book are as follows: What are the language implications of colonisation on education in the South Pacific? What resources and learning opportunities are provided in schools to promote equal access to education content for students from non-English-speaking backgrounds? How do students from different schooling backgrounds in Fiji cope with an English language-mediated university learning environment? Do educational inequalities manifest in the performance of students from all schooling backgrounds, or are they confined to specific sociocultural zones? Drawing on a unique dataset from a context in the Global South, this book provides new insights for a more holistic approach to examining academic language proficiency and the use of language testing. *English Language-mediated Settings and Educational Inequalities: Language Education Policy Agendas in the South Pacific* is suitable for postgraduate students in language policy and planning, multilingual language policies for schools, medium of instruction studies, and language testing, and South Pacific studies.

Corpus Linguistics Geoffrey Sampson, Diana McCarthy, 2005-12-07 *Corpus Linguistics* seeks to provide a comprehensive sampling of real-life usage in a given language, and to use these empirical data to test language hypotheses. Modern corpus linguistics began fifty years ago, but the subject has seen explosive growth since the early 1990s. These days corpora are being used to advance virtually every aspect of language study, from computer processing techniques such as machine translation, to literary stylistics, social aspects of language use, and improved language-teaching methods. Because corpus linguistics has grown fast from small beginnings, newcomers to the field often find it hard to get their bearings. Important papers can be difficult to track down. This volume reprints forty-two articles on corpus linguistics by an international selection of authors, which comprehensively illustrate the directions in which the subject is developing. It includes articles that are already recognized as classics, and others which deserve to become so, supplemented with editorial introductions relating the individual contributions to the field as a whole. This collection of readings will be useful to students of corpus linguistics at both undergraduate and postgraduate level, as well as academics researching this fascinating area of linguistics. >

International Encyclopedia of Linguistics William Frawley, 2003-05 The International Encyclopedia of Linguistics, 2nd Edition encompasses the full range of the contemporary field of linguistics, including historical, comparative, formal, mathematical, functional, and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines. Areas of intersection with the social and behavioral sciences--ethnolinguistics, sociolinguistics, psycholinguistics, and behavioral linguistics--receive major coverage, along with interdisciplinary work in language and literature, mathematical linguistics, computational linguistics, and applied linguistics. Longer entries in the International Encyclopedia of Linguistics, ranging up to four thousand words, survey the major fields of study--for example, anthropological linguistics, history of linguistics, semantics, and phonetics. Shorter entries treat specific topics within these fields, such as code switching, sound symbolism, and syntactic features. Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics, such as Leonard Bloomfield, Roman Jakobson, and Edward Sapir. A major portion of the work is its extensive coverage of languages and language families. From those as familiar as English, Japanese, and the Romance languages to Hittite, Yoruba, and Nahuatl, all corners of the world receive treatment. Languages that are the subject of independent entries are analyzed in terms of their phonology, grammatical features, syntax, and writing systems. Lists attached to each article on a language group or family enumerate all languages, extinct or still spoken, within that group and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group. In this way, virtually every known language receives coverage. For ease of reference and to aid research, the articles are alphabetically arranged, each signed by the contributor, supported by up-to-date bibliographies, line drawings, maps, tables, and diagrams, and readily accessible via a system of cross-references and a detailed index and synoptic outline. Authoritative, comprehensive, and innovative, the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal, public, academic, and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study.

Language Learning and Teaching as Social Inter-action Z. Hua, 2007-07-31 This book presents the latest research by leading scholars on language learning from a socio-interactional and socio-cultural perspective.

The Politics of Time Henry J. Rutz,1992 The unifying idea of THE POLITICS OF TIME is that time is an object of power relations. Chapters are concerned with different forms of objectification, various contests of power that shape time as a concept and as a resource, and the multiplicity social constructions of time. The emphasis is to ask questions about what time is, how it is reckoned, and what standard is used to measure it.
