*The Routledge Handbook of Youth Physical Activity* Timothy Brusseau, Stuart Fairclough, David Lubans, 2020-04-07 Over the past three decades the study of pediatric physical inactivity has become a public health concern. The decreases in physical activity have been associated with obesity and numerous hypokinetic diseases. In accordance with this public health concern, the study of pediatric physical activity has become a central part of research in the health and exercise science fields. The Routledge Handbook of Youth Physical Activity is the first book to survey the full depth and breadth of the issues facing this field. Bringing together many of the world's experts and practitioners, the book helps to develop an understanding of the underlying issues related to pediatric physical activity as well as the role physical activity plays on cognitive, psychomotor, and social aspects of childhood. The book addresses issues with physical activity measurement and discuss wide-ranging aspects of physical activity interventions. With more emphasis than ever on physical activity, this book makes an important contribution to the scholars and practitioners working in the field of youth physical activity. This is the first single text on the state of current knowledge related to pediatric physical activity which offers a comprehensive guide to students and academics on these subjects The Routledge Handbook of Youth Physical Activity is key reading for all advanced students, researchers, practitioners, and policy-makers with an interest in physical activity, youth sport, public health matters, sport studies, or physical education.

**Paediatric Nursing in Australia and New Zealand** Jennifer Fraser, Donna Waters, Elizabeth Forster, Nicola Brown, 2022-01-05 Equips students to become informed partners in the nursing care of infants, children, young people and their families across Australasia.

**Wong's Nursing Care of Infants and Children Australia and New Zealand Edition - For Professionals** Lisa Speedie, Andrea Middleton, 2021-11-09 This new text has been adapted from the highly trusted Wong's Nursing Care of Infants and Children to provide a reference for professional nurses working in paediatric and child and family health settings in Australia and New Zealand. The content covers all aspects of infant, child and adolescent care, including anatomy and physiology, child and adolescent mental health, nursing care guidelines, critical thinking, family-centred care, rural and remote health, cultural and psychosocial considerations, common presenting conditions, and therapeutic management. With input from leading local expert paediatric clinicians and academics, and carefully curated for practising paediatric nurses,

and nurses newly entering paediatrics, the text aligns with local professional standards, health policies, legal and ethical considerations and population data. - Well-established, comprehensive text that focuses on clinical relevance for professional nurses - Covers all aspects of infant, child and adolescent health through an assessment and management approach - Foundational information builds a solid knowledge base in paediatric nursing - Written to help nurses develop a deeper understanding of the psychosocial needs of infants, children, adolescents and their families - Case studies and research questions to build critical thinking skills - Aligned to National Safety and Quality Health Service (NSQHS) Standards - User-friendly, accessible content suitable for practising paediatric nurses across a variety of clinical settings and geographic locations

*Technologies for Personalised Healthcare* Francesca Romana Cavallo, Christofer Toumazou, 2025-04-23 This book explores how personalised healthcare can be realised with the integration of new and established technologies, and how novel methods can be developed to improve health outcomes in lifestyle-related conditions. *Technologies for Personalised Healthcare: Enabling Patient-Centred Approaches in the Management and Prevention of Lifestyle-Related Conditions* explores various aspects of personalised healthcare in the context of lifestyle-related conditions— from how statistics and machine learning can be used to extrapolate clinically useful stratifications from big data, to how adaptive AI can enable behaviour change; from how biosensors and point-of-care devices can bring diagnostics closer to the patient, to the ethical aspects of personalised medicine. The highly multidisciplinary nature of the book gives the reader a broad view of established and emerging technologies for personalised healthcare. It provides the technical background underpinning these technologies, while case studies present practical applications of the methods discussed. The content and worked examples found within this book can serve as a reference guide on the technologies and methods needed to tap into the endless opportunities to be realised within personalised healthcare. This book is intended for researchers and academics who want to know more about how they can apply computational methods and electronics within the field of personalised healthcare. It is also for those who are interested in the bridge between technology, engineering, and medicine. It is our hope that this book will serve as a catalyst for further innovation and collaboration in the pursuit of personalised healthcare solutions.
