Dark Aeon Joe Allen, 2023-08-29 Humanity Is Consumed by Relentless Transformation Like a thief in the night, artificial intelligence has inserted itself into our lives. It makes important decisions for us every day. Often, we barely notice. As Joe Allen writes in this groundbreaking book, “Transhumanism is the great merger of humankind with the Machine. At this stage in history, it consists of billions using smartphones. Going forward, we’ll be hardwiring our brains to artificial intelligence systems.” The world-famous robot, Sophia, symbolizes a rising techno-religion. She takes her name from the goddess—or Aeon—whose fall from grace is described in the Gnostic Gospels. With an academic background in both science and theology, Allen confronts the paradox of what he calls “good people constructing a digital abomination.” Dark Aeon is nothing less than a cri de coeur for humanity itself. He takes us on a roller coaster ride through history and the emergence of Scientism, and from government-mandated mRNA vaccines to the weird visions of cyborg billionaires like Elon Musk. From Silicon Valley to China, these globalists’ visions of humanity’s future, exposed and described in Dark Aeon, are dire and terrifying. But Joe Allen argues that humanity’s salvation is within our grasp. Only if we refuse to avert our eyes from the impending twilight before us.

The Anti-Globalist Manifesto Jerome R. Corsi, 2024-08-13 In his new book, The Anti-Globalist Manifesto: Ending the War on Humanity, bestselling author Jerome Corsi puts out a call for action to reverse the totalitarian goals of the New World Order globalists. Corsi addresses that these demons are well advanced in their planned “One World Government” takeover aimed at establishing an atheistic utopia that will have no respect for traditional human rights. Comfortable that their transhuman aspirations are achievable, the Malthusian elite is waging a war on humanity that embraces global depopulation as a means of preventing Earth's abundant natural resources for themselves. Tracing this dystopian nightmare back to the assassination of President John F. Kennedy on November 23, 1963, as the day the deep state went rogue in a conspiracy involving the CIA, the Pentagon, the State Department, and the Department of Justice to affect a coup d'état that would allow the military industrial complex to go to war in Vietnam, the deep state has created an ongoing Truman Show—a series of never-ending psychological operations designed to induce citizens worldwide to surrender freedoms to government in return for security. With the premise that the globalist elite uses systems of mass manipulation and social engineering to induce the world's population to accept the implementation of the reforms it has already decided to implement, Corsi sets a detailed

plan for organizing global resistance against the subversives who now sit at the top of the institutions or world government and finance. The Anti-Globalist Manifesto is a call to action to restore God to our lives, as those of us fighting for a return to personal freedoms and limited government, ending the war on humanity and driving once and for all time the New World Order globalists back to Hell where they belong.

The Threshold Kingsley L. Dennis, 2025-10-28 Explore the darker hinterlands of a world accelerating into a full-blown immersion of techno-materialism and its consequences for the human condition... In an exceedingly relevant analysis of the modern technological world, Kingsley Dennis demonstrates that humanity is rushing headlong towards a critical and decisive moment for human civilisation which he terms the 'Threshold', where the trajectory for human evolvment is facing 'counter-evolutionary forces' that not only reject the path of the human spirit but aim to sabotage our connection to it. The Threshold brings the reader face-to-face with the intensifying issues of technocracy, transhumanism, AI-theology and false transcendence, and the re-defining of the biological human condition. Also examined are themes of reality distortion, über-nihilism, planetary re-shaping and environmental modification, neo-gnosticism, the sacred and the profane, and the task of evil in our current times. Dennis explains that humanity is currently experiencing intense times for these years are a precursor to the critical 'threshold' where the future for humankind will be decided. Humanity, both collectively and individually, will need to choose between a future of deepening profane materialism - what the author calls the 'will to technology' - or a life that recognises the presence of metaphysical truths and the rising capacities of spirit-consciousness. At this time, unlike any other in known history, in which the planet is engaged in a struggle for the presence of the human soul upon the Earth, Kingsley Dennis' thought-provoking prose offers a fresh perspective on the future of humanity.

The Wrath that Came Jack E. Brush, *The Wrath that Came* alludes to the preaching of John the Baptist in Mt. 3:7, which serves as the starting point for an analysis of evil and wrath in contemporary society. After establishing the undeniable and inexplicable reality of evil, this book discusses the futile attempts to reconcile evil with the reality of God as well as the modern secularization of evil through psychology, medicine, and philosophy. The primitive concept of divine wrath as "brimstone and fire" is presented, but then rejected in favour of the insight of the Apostle Paul. According to Paul, the wrath of God is manifested not in catastrophic events, but rather in his withdrawal - the silent response to evil. Finally, an analysis of the self demonstrates that evil and wrath have both an individual and a societal dimension.

Tech-Noir Paul Meehan, 2008-05-12 This critical study traces the common origins of film noir and science fiction films, identifying the many instances in which the two have merged to form a distinctive subgenre known as Tech-Noir. From the German Expressionist cinema of the late 1920s to the present-day cyberpunk movement, the book examines more than 100 films in which the common noir elements of crime, mystery, surrealism, and human perversity intersect with the high technology of science fiction. The author also details the hybrid subgenre's considerable influences on contemporary music,

fashion, and culture.
