The House-tree-person Technique John N. Buck, 1966

The Psychological Examination of the Child Theodore H. Blau, 1991-02-07 Unlike other books on child testing, this one establishes a conceptual framework for psychological evaluation of children. Instead of focusing on the assessment of particular conditions, it deals with what is important to find out about all children, normal and disturbed, and sets forth a standardized means of analysis, the Basic Psychological Examination. Covers practical aspects of the examination, including the interview group, the examination setting, preparing the child, formulating reports and recommendations, and conferring with parents. Comparable in scope and comprehensiveness to a physician's medical exam, the Basic Psychological Examination enables the practitioner to identify virtually anything out of order in a child's development. Practical and boldly original, the text commends itself to educators, researchers and clinicians alike.

Kinetic-house-tree-person Drawings (K-H-T-P) Robert C. Burns, 1987 This book contains the first documentation of combining house, tree, and person into a single drawing. It helps enrich clinician's test batteries and aids psychologists and physicians in understanding the emotions and self-awareness of their clients. It is richly illustrated and teaches the important skill of using visual metaphors in clinical settings to understand and assist clients. The author covers all aspects of drawing interpretation, including size, placement, stroke or line characteristics, and the possible individual characteristics of each element within the house, tree, and person drawings.

Understanding Psychological Testing in Children Stewart Gabel, G.D. Oster, S.M. Butnik, 1986-08-31 There is a considerable amount of interest within pediatrics and primary health care that is currently being directed toward the behavioral and emotional problems of childhood. Traditionally, these areas have been emphasized by child psychiatrists, child psychologists, and psychiatric social workers. Now, however, the detection and, in some cases, the assessment and treatment of children with these types of disturbances fall within the province of primary child health care professionals. Even when the child psychiatrist or child psychologist provides the primary mental health treatment for the child, specialists such as pediatricians, family physicians, pediatric nurses, pediatric nurse practitioners, and speech therapists remain instrumental in support of the ongoing psychotherapeutic process as providers of some other aspect of total health care to

the child and family. For these pediatricians, family physicians, and other nonpsychologist primary health care providers, it is essential to acquire an understanding and effective working knowledge of important psychological information and concepts to utilize within their own framework and professional responsibilities. In order that this may be accomplished, these professionals with limited backgrounds in psychology must better understand how psychologists themselves assess children and how they derive the conclusions reflected in the statements and reports that are shared with members of their own and other disciplines. In short, nonpsychologists must become substantially more familiar with psychological assessment, particularly with psychological testing and the subsequent reporting of results.

Promoting the Emotional and Behavioral Success of Youths Sergio V. Delgado, Ernest V. Pedapati, Jeffrey R. Strawn, 2022-02-11 Clinicians often have difficulty helping the parents of youth with emotional and behavioral difficulties and fail to recognize that often it is the youth's cognitive and learning weaknesses that drive their maladaptive behaviors. This book aims to help clinicians further understand the roots of youth's maladaptive behaviors. It also addresses the impact of youth's varied cognitive abilities on their behaviors and problems with self-esteem, particularly in youth that do not meet the diagnostic criteria for a formal learning disability. While many clinicians view learning deficits as impairments in specific academic skills, these deficits go beyond varied learning abilities and often experience difficulties in emotional, social, and behavioral functioning. These impairments vary from child to child and it is crucial to develop practical interventions for improved self-esteem and emotional success. Varied learning abilities reflect a neurodevelopmental problem in youth that can lead to difficulties with their emotional, social, and academic functioning and limit their intellectual potential. There are often treatment impasses when a youth's behavioral problems do not improve with traditional forms of psychotherapy and medication. The practical individualized interventions recommended in this book will: 1) decrease conflict in day-to-day interactions between youth and parents, 2) improve self-esteem and 3) help to achieve realistic social, emotional and academic goals. The text will help clinicians determine which maladaptive behaviors are a result of cognitive deficits and not "symptoms" of a disease-based mental disorder. Written by experts in the field, *Promoting the Emotional and Behavioral Success of Youths* reviews appropriate interventions in the context of the public health strategies that address the prevention of secondary socio-economic aspects as a result of cognitive weaknesses, such as realistic educational needs, career and employment choices. Clinicians will be able to use this book to develop "best fit" multimodal interventions to help parents of youth develop adaptive behaviors.

Psychological Experts in Divorce Actions Marc J. Ackerman, Andrew W. Kane, 2005-01-01 Emotionally charged issues abound in matrimonial practice, especially in custody disputes. Expert testimony can have a dramatic impact on the outcome

of a case, and when matters are highly sensitive or sensational the seeming objectivity of an expert can be dispositive. To effectively reinforce or question that testimony, certain specialized knowledge is essential. Scientifically accepted standards and theories are constantly evolving. Keeping up with the data had been a challenge, but one integrated resource has made it simple. Aspen Publishers' Psychological Experts in Divorce Actions pulls all the research together into the definitive guide to understanding the role of psychological evaluations in divorce and custody actions. Focused on providing the best approach to protecting your client's interests, this work explains all the leading testing instruments, what conclusions may be drawn and how to challenge or support those conclusions. In addition to offering effective examination and cross-examination strategies, it assists you in handling the gamut of psychological factors that affect clients in divorce and custody cases. Authors Marc J. Ackerman, Ph.D., and Andrew W. Kane, Ph.D., are licensed psychologists who have been involved in hundreds of custody cases. Drawing on their extensive experience—testing parties to a divorce and treating psychological patients in the clinic—and as psychological experts in the courtroom, they identify the most important psychological evaluation research used in divorce and custody decision-making and distill the information into clear terms lawyers can readily apply. They also examine vital issues including: Ethics—confidentiality, privilege, duty to warn or protect (Tarasoff), sharing raw data, test integrity Sexual abuse—bona fide or fabricated allegations, psychological effects of sexual abuse, profiles of abuser and abused Testing—personality tests (including MMPI-2, And The new MMPI-2-RF, Rorschach, Millon, TAT); intelligence tests (Wechsler scales, Kaufman scales, Stanford Binet); custody tests (ASPECT, PCRI, PASS, BPS); and many more How divorce affects families—custody, placement, age and gender differences, grandparents, sexual preference, psychological problems
