log linear analysis wikipedia - Sep
15 2023

log linear analysis is a technique used
in statistics to examine the relationship
between more than two categorical
variables the technique is used for both
hypothesis testing and model building
in both these uses models are tested to
find the most parsimonious i e least
complex model that best accounts for
the variance in the observed
frequencies a pearson s chi square test
could be used instead of log linear
analysis but that technique only allows
for two of the variables to be c
