*Men and Masculinities in Christianity and Judaism* Bjorn Krondorfer,2013-02-12 Bjorn Krondorfer, one of the leading scholars in this field, has collected 35 key texts that have shaped this field within the wider area of the study of gender, religion and culture. The texts in this critical reader engage actively and critically with the position of men in society and church, men's privileged relation to the sacred and to religious authority, the ideals of masculinity as engendered by religious discourse, and alternative trajectories of being in the world, whether spiritually, relationally or sexually. Each of the texts is introduced by the editor and accompanied by bibliographies that make this the ideal tool for study.

**Lifting the Taboo** Sally Cline,1997-03 Illuminated by a profound yet humorous vision, *Lifting the Taboo* explores the specific relationship women of many colors, cultures, ages, and sexual orientations have to their own deaths, their attitudes towards loss, and their disposition to their role as primary care-givers to the dying. Specifically, the book weighs the implications of breast cancer and examines in detail Alzheimer's Disease which, contrary to popular myth, can in several significant ways be perceived as a women's disease. Investigating mothers' responses to children's deaths, Sally Cline establishes that women's relationships to death are intricately connected to the experience of giving birth. They are, she argues, therefore psychologically and emotionally different from those of men. Cline goes on to examine women's roles and responses to AIDS and suicide, women's sexual relationships while dying, how society views widows as leftover lives, and women's radical work in hospices and death therapy, as well as their roles as female funeral directors.

**Taking Care of Men** Anthony McMahon,1999-08-13 The idea of the sensitive, post-feminist 'new man' has received great attention. This book sets out to determine how much of the hype is based on fact, and why such images have proliferated in the media. McMahon focuses on the pivotal issue of men's relationship to the vital daily work of caring for people - both physically and emotionally - revealing much confusion about the extent and the interpretation of change. Using statistical data, as well as interview transcripts and media analysis, McMahon draws insightful distinctions between pleasure and performance, assistance and responsibility, gendered personality and gendered jobs, and - underlying all - between consumption and production. Incorporating social theory, psychology and popular culture, this book argues that recent social conversation about men largely avoids the important political point that men's material interests provide a major motivation for resistance to pro-equity change.

*Recreating Men* Bob Pease,2000-02-02 One of the most central issues for women's prospects for equality is whether man can and will change. Changing the social relations of gender will involve changing men's subjectives as well as their daily practices. This book asks whether this is possible. Bob Pease examines how men, who are supportive of feminism, are responding to the feminist challenge, through an exploration of their experiences and dilemmas in trying to live out their feminist commitment and resist hegemonic forms of masculinity. The book is driven by practical as well as theoretical concerns, and aims to develop strategies that will promote the process of change towards equality in gender relations. Drawing on a critical postmodern theoretical framework, Pease argues that it is possible for men to reposition themselves in patriarchal discourses and to reformulate their interests in challenging gender domination. *Recreating Men* is an invaluable reading for academics and students of gender studies, and of interest to students of sociology, psychology and political sociology.

**After Eden** Mary Stewart Van Leeuwen,1993 Written by an interdisciplinary team of scholars, this substantial volume offers a wide-ranging examination, from a Christian perspective, of the many complexities surrounding gender relations, showing how they have changed and how they still need to change if we are to be the men and women God meant us to be. No other book treats the systemic embedding of gender issues in all areas of life.

*Never Too Thin* Eva Aniko Szekely,1988 Abstract: This book discusses the feelings of women towards their bodies and their body images. The author explores the values, norms, ideals, and goals of five women who are relentlessly pursuing thinness. Social pressures which create these attitudes are examined.

**America's Competitive Secret** Judy B. Rosener,1995 The United States has a large number of well educated,

experienced professional women ready, willing and able to move into the boardrooms and executive suites of corporate America. Together they represent a great, untapped economic resource, a resource no other country in the world can claim. This is America's competitive secret, argues Judy B. Rosener in this refreshingly pragmatic new book for managers who want to improve their bottom line. A leading expert on women and men at work and a highly sought-after speaker, Rosener argues that not only are men and women different, so are male and female managers. Drawing on in-depth interviews with top-flight executives and middle managers and the latest research on working women and organizational change, she describes the unique contribution of female professionals. Her profiles of top women managers reveal that they cope well with ambiguity, are comfortable sharing power, and they tend to empower others-- leadership traits that Rosener contends lead to increased employee productivity, innovation, and profits. As businesses today struggle with corporate reorganization and an increasingly diverse workforce, America's Competitive Secret offers compelling evidence that the changes that help organizations more fully utilize the talents of women are the same changes that will give them an important edge in today's fast-changing, service oriented, global workplace. Rosener explains why the so-called glass ceiling still prevents many competent women from reaching the upper echelons of management. She analyzes why women and men are perceived and evaluated differently at work, and provides new insight into the feelings of men who are asked to interact with women in new roles when there are few new rules. Rosener shows that removing the glass ceiling can no longer be viewed solely in terms of social equity--it is now an economic imperative. Too many American businesses have limited their economic strength by viewing the promotion of women employees only within the context of federally mandated affirmative action laws and policies. America's Competitive Secret redefines the issue for a new era, showing that America's most successful competitive strategy is one that most effectively utilizes all its human resources.
