The Science of Alpine Ski Racing James Pritchard, Jim Taylor, 2022-12-29 Alpine skiing or downhill skiing is defined by six disciplines: Downhill, Super G, Giant Slalom, Slalom, Parallel, and Combined that test the athletes' technical abilities and speed. It has long been a popular sport with many national and international championships and is a mainstay of the Winter Olympic Games. *The Science of Alpine Ski Racing* is the first book to discuss the science, coaching, research, and training of elite to recreational alpine ski racers for optimal performance. This book brings together the complex physiological,

biomechanical, and technical components of the sport in a practical manner with which coaches and researchers alike can adopt to elicit better performance outcomes for athletes. Literature of this kind has never been formally researched and published specifically for the sport of alpine ski racing making it both unique and a cornerstone to the discipline. Backed by cutting-edge research, the book provides practical guidance on preparing athletes for high performance and understanding the core tenets of sports science underpinning it striking a balance between the complex theoretical and practical components coaches and athletes must prepare for in alpine ski racing. Accessibly written and featuring contributions from world-leading experts, *The Science of Alpine Ski Racing* covers key topics of health, training, and high performance in the sport and will be vital reading for youth coaches, professional ski instructors, strength and conditioning coaches, and sports science staff associated with winter sports programs as well as applied researchers looking for a model to apply to other sports. James (Jimmy) Pritchard is a human performance specialist/sports scientist who has trained and consulted athletes at the Olympic, NHL, NFL, and Division I collegiate level. Specific to alpine ski racing, he served as the Director of Strength and Conditioning for Ski and Snowboard Club Vail in Vail, Colorado where he helped prepare a long list of US Ski Team athletes including Alice McKennis, Mikaela Shiffrin, and Tess Johnson. He is a certified strength and conditioning specialist (CSCS) as well as registered strength and conditioning coach (RSCC) through the NSCA working with athletes and human performance program managers on a regular basis to find optimal human performance solutions. James has presented at conferences around the United States discussing long term athlete development, written over 150 articles for several media outlets, has been published in the NSCA's *Strength and Conditioning Journal*, and taught courses about strength and conditioning at Colorado Mountain College. James holds a BSc in Exercise Science from Colorado Mesa University and MSc degree in Exercise Science from Edith Cowan University. Jim Taylor, PhD, Psychology, is an internationally recognized authority on the psychology of sport and parenting. He has consulted with athletes, coaches, and parents in tennis, skiing, cycling, triathlon, track and field, swimming, football, golf, baseball, fencing, and many other sports for more than 30 years. Dr. Taylor is the author of 17 books and the editor of 4 textbooks on sport psychology. He is also a former world-ranked alpine ski racer, second-degree black belt in karate, marathon runner, and Ironman triathlete.

Mike Mentzer John Little, 2025-05-20 Bodybuilding's foremost nonconformist and strikingly handsome intellectual, Mike Mentzer, rose to the top of his sport despite opposition from industry insiders like rival Schwarzenegger. Written by his close friend of two decades, *Mike Mentzer: American Odysseus* chronicles Mentzer's journey in a fiercely competitive world to become one of the most iconic bodybuilders of all time. REBEL. PHILOSOPHER. BODYBUILDING ICON. Mike Mentzer was a strikingly handsome man with a brilliant mind and a "perfect" physique — the first bodybuilder to receive a perfect score in both amateur and professional competitions. In the late '70s, Mentzer rose to the very top of his sport (despite the efforts made by industry power brokers, such as Arnold Schwarzenegger), was featured in *GQ* magazine, and profiled on national

television. But he was also a man who wrestled with mental illness his entire life and ended up living on the streets and being sent to prison. Just when it seemed his career was over, he found it within himself to reboot his intellect and revolutionize bodybuilding training, arguing bodybuilders should not forsake their mental development in favor of developing their bodies. He became a pariah in the fitness industry (which only cared about selling supplements and other products) but a hero to legions of fans who earnestly sought truth. *Mike Mentzer: American Odysseus* is the first biography of Mike Mentzer to appear in North America written by his close friend of 21 years, John Little, “one of the leading fitness researchers in North America” (*Iron Man* magazine). Drawing upon audio recordings, letters, diary excerpts, as well as interviews with those closest to him, this is the true story of one man who stood up to an entire industry — and paid the ultimate price.

Beyond Measure Rachel Z. Arndt, 2018-04-10 *Beyond Measure* is a fascinating exploration of the rituals, routines, metrics and expectations through which we attempt to quantify and ascribe value to our lives. With mordant humor and penetrating intellect, Arndt casts her gaze beyond event-driven narratives to the machinery underlying them: judo competitions measured in weigh-ins and wait times; the significance of the elliptical’s stationary churn; the rote scripts of dating apps; the stupefying sameness of the daily commute. Rachel Z. Arndt’s writing has appeared in *Popular Mechanics*, *Quartz*, *The Believer*, and elsewhere. She received MFAs in nonfiction and poetry from the University of Iowa, where she was an Iowa Arts Fellow and nonfiction editor of *The Iowa Review*. After stints in Rhode Island and New York, she now lives in Chicago and works as a reporter at *Modern Healthcare*, covering healthcare technology.
