

The Dark Side Of Disney Documentary

Thomas Griffiths

The Classical Animated Documentary and Its Contemporary Evolution Cristina Formenti, 2022-03-24 The Classical Animated Documentary and Its Contemporary Evolution is the first book to provide an historical insight into the animated documentary. Drawing on archival research and textual analysis, it shows how this form, usually believed to be strictly contemporaneous, instead took shape in the 1940s. Cristina Formenti integrates a theoretical and a historical approach in order to shed new light on the animated documentary as a form as well as on the work of renowned studios such as The Walt Disney Studios, Halas & Batchelor, National Film Board of Canada and never before addressed ones, such as Corona Cinematografica. She also highlights the differences and the similarities existing among the animated documentaries created between the 1940s and the mid-1980s and those produced today so as to demonstrate how the latter do not represent a complete otherness in respect to the former, but rather an evolution.

American Film in the Digital Age Robert C. Sickels, 2010-12-08 This eclectic, yet comprehensive analytical overview of the cataclysmic changes in the American film industry since 1990 shows how they have collectively resulted in a new era—The Digital Age. The American film industry has entered a new era. American Film in the Digital Age traces the industrial changes since 1990 that have brought us to this point, namely: the rise of media conglomerates, the proliferation of pornography through peripheral avenues of mainstream media, the role of star actors and directors in distributing and publicizing their own pet projects, the development of digital technology, and the death of truly independent films. Author Robert Sickels draws straight lines from the movies to music, DVDs, video games, fast food, digital-on-demand, and more, to demonstrate how all forms of media are merging into one. He explores the irony that the success of independent films essentially killed independent cinema, showing how it has become almost impossible to get a film released without the imprimatur of one of the big six media companies—Fox, Viacom, TimeWarner, Disney, General Electric, or CBS. In the end, using recent, popular films as examples, he explains not only how we got where we are, but where we're likely headed as well.

Race, War, and the Cinematic Myth of America Eric Trenkamp, 2022-03-09 In this book, Eric Trenkamp addresses a question that many American cinema fans may have asked themselves over the past 20 years – “why is everything superheroes now?” Although it might be easy to dismiss Hollywood’s last two decades of comic book movies as nothing more

than overly simplified morality tales, the reality is much more complex. The pervasiveness of the comic book genre throughout American culture, Trenkamp argues, perpetuates a subtextual myth about what it means to be an “American” in the contemporary world. At the core of this myth is the image of who Hollywood considers to be the ideal American hero – the White male savior. This book explores the evolution of this ever-changing image of White superiority in American cinema, which can be traced from the earliest silent Westerns, through decades of war films, and up to the modern day comic book genre. Through provocative and engaging analysis of a wide variety of Hollywood films, Trenkamp demonstrates the industry’s history of popularizing White supremacy and the ways in which these films can act as propaganda to support various dehumanizing U.S. policies, both abroad and at home. Scholars of film studies, comic studies, genre studies, American studies, race studies, pop culture, and history will find this book particularly useful.

The Best of Disney Neil Sinyard,1988 This comprehensive volume celebrates the innovative studio that gave birth to Mickey Mouse, Donald Duck, Snow White, Bambi and many other animated favorites.

Animal Activism On and Off Screen Claire Parkinson,Lara Herring,2024-07-01 Animal Activism On and Off Screen examines the relationship between animal advocacy and the film and television industries. Leading scholars, activists, and film industry professionals critically analyse the ways in which animal activism has been represented inside and outside film and television programs in relation to the politics of celebrity, vegan, and animal activism. Case studies include UK, US, and German television crime fiction, feature-length advocacy documentaries such as Blackfish (2013), The Ghosts in Our Machine (2013), The Animal People (2019) and Meat the Future (2020); fiction films such as Okja (2017) and Cloud Atlas (2012); as well as celebrity chefs, French activism and celebrity activists Pamela Anderson, Joaquin Phoenix and James Cromwell. By exploring three key aspects of the current context for animal rights: representations of activism on screen; activist texts and their reception; and celebrity vegans and animal advocates, Animal Activism On and Off Screen evaluates the efficacy of advocacy narratives in film and on television, and offers important insights intended to inform animal advocacy strategies and campaigns.
