Pando,Luis F. Ramos,2018-08-18 This volume contains the proceedings of the 11th International Conference on Structural Analysis of Historical Constructions (SAHC) that was held in Cusco, Peru in 2018. It disseminates recent advances in the areas related to the structural analysis of historical and archaeological constructions. The challenges faced in this field show that accuracy and robustness of results rely heavily on an interdisciplinary approach, where different areas of expertise from managers, practitioners, and scientists work together. Bearing this in mind, SAHC 2018 stimulated discussion on the new knowledge developed in the different disciplines involved in analysis, conservation, retrofit, and management of existing constructions. This book is organized according to the following topics: assessment and intervention of archaeological heritage, history of construction and building technology, advances in inspection and NDT, innovations in field and laboratory testing applied to historical construction and heritage, new technologies and techniques, risk and vulnerability assessments of heritage for multiple types of hazards, repair, strengthening, and retrofit of historical structures, numerical modeling and structural analysis, structural health monitoring, durability and sustainability, management and conservation strategies for heritage structures, and interdisciplinary projects and case studies. This volume holds particular interest for all the community interested in the challenging task of preserving existing constructions, enable great opportunities, and also uncover new challenges in the field of structural analysis of historical and archeological constructions.

As art and technology advanced, monetary systems and currencies altered. Today, coins and currency provide an historical and archeological record of culture, religion, politics, and world leaders. This updated second edition offers numerous entries of historical commentary on the role of coins and currency in human events, politics, and the arts. It begins with the origin of coins in ancient Sumer, and follows advancements in metallurgy and minting machines to paper, plastic, and electronic moneys designed to ease trade and halt counterfeiting and other forms of theft. A timeline of monetary history is provided along with a glossary and bibliography. Numerous photographs of coins and bills provide an up-close look at beautiful and ingenious artifacts.

**Serçe Limani, Vol 2** George F. Bass,Berta Lledo,Sheila Matthews,Robert H. Brill,2009-07-20 For almost a millennium, a modest wooden ship lay underwater off the coast of Serçe Limani, Turkey, filled with evidence of trade and objects of daily life. The ship, now excavated by the Institute of Nautical Archaeology at Texas A&M University, trafficked in both the Byzantine and Islamic worlds of its time. Known as the Glass Wreck, it bore cargo that included three metric tons of glass

cullet, including broken Islamic vessels and eighty pieces of intact glassware, along with various artifacts of ship life. This second volume of the discovery's investigation focuses on the excavation, conservation, and study of the glass found in the wreckage. The extensive catalog will be a valuable tool for archaeologists and scholars of Islamic glass and Islamic trade. Further, the systematic methodology and presentation of such a large undertaking will serve as a model for future study across many disciplines.
