The Battle over America's Origin Story Brian Regal, 2022-05-06 This book examines the legends of who 'really' discovered America. It argues that histories of America's origins were always based less on empirical evidence and more on social, political, and cultural wish fulfillment. Influenced by a complex interplay of Nativist hatred of immigrants and Aboriginal people, as well as distrust of academic scholarship, these legends ebbed and flowed with changing conditions in wider American society. The book focuses on the actions of a collection of quirky, obsessed amateur investigators who spent their lives trying to prove their various theories by promoting Welsh princes, Vikings, Chinese admirals, Neo-lithic Europeans, African explorers, and others who they say arrived centuries before Columbus. These myths acted as mitigating agencies for those who embraced them. Along with recent scholarship, this book makes extensive use of archival materials—some of which have never been employed before. It covers the period from the sixteenth century to the present. It brings together separate historiographic ideas to create a unified history rather than focusing on one particular legend as most books on the subject do. It shows how questions of who discovered America helped create the field of historical scholarship in this country. This book does not attempt to prove who discovered America, rather it tells the story of those who think they did.

Afro and Indigenous Intersectionality in America as Nomen Larry L. W. Miles, 2023-03-06 Afro and Indigenous Intersectionality in America as Nomen broadens the historical narrative of Indigenous, Autochthonous, and First World people who have been classified historically as Negro, Black, Colored, Afro, and African American. By addressing the ways in which the singular narrative of slavery codifies identity, this work moves beyond binary racial classifications and proposes the possibility of utilizing holistic historical narratives to foster group and personal identity.

Moorish Circle 7 Keith Moore 32, 2005-05-04 This book is based on the theory that the black Muslim movement was created from the knowledge of the Masonic order. In the early decades of the 20th century, noble drew ali established a political and religious organization known today as the Moorish Science Temple of America. It was this organization that exposed black to something other than the normal Christian influences of that day. Ali a high degree freemason, incorporated various Masonic teachings from an auxiliary group. Known as the AEAONMS ancient Egyptian Arabic order of noble of the mystic shrine A pseudo Islamic/Arabic oriental organization that served as a wake up call to a lost knowledge. A knowledge that was taken away from Africans during the slave trades. The theory behind this book is that the majority of the slaves that

were taken from the west coast of Africa were practicing Muslims, and these Muslims were forced to convert to Christianity under the strong oppression of slavery. At one time Afro-Americans were the biggest minority in the American society. About 90% of the today's population of blacks are descendants of slaves that were brought to America for working on plantations since the 16th century. At the beginning of the 19th century most of the so-called Negroes lived in the plantation areas of the Southern States. After the Civil War and the abolition of slavery it wasn't until the early 1920s and 30s that blacks were beginning to experiment with other faiths. Of all the faiths Islam became the fastest growing religion and the most popular. This book by far is in no way a research into black history, instead it covers a more deeper aspect of history in which I call the history behind the history. It explores the true Asiatic origins of the ancient religions of Hinduism, Buddhism well as the Islamic faith. Finally It explores the Masonic symbolisms of alis Moorish science dogma digging deeper into the esoteric side of his Aquarian/Masonic teaching explaining their origins and discovering an age old wisdom that had been kept hidden from the human eye. One would think that Africans in the Americas would have rejected the religious tradition of their European oppressors taking into consideration that African religions are far older & they possess more sources of knowledge & spiritual salvation. Yet there are those who have turned away from traditional Christian dominated environments in order to find a greater understanding of themselves and the world in which they live. One alternative has been to seek knowledge in the various religious groups that arose in the 20th century.
