Anti-Racist Practice in the Early Years Valerie Daniel, 2023-04-11 Are all children treated equally in your class? Are you aware if you are displaying unconscious bias? How might this be playing out in your setting? These conversations need to take place if we are ever to shift systemic racism, for the wellbeing of all children in the early years and beyond. This essential guide addresses diversity and inclusion in a meaningful and constructive way. The holistic approach explores a range of pertinent topics for the early years and demonstrates the positive impact educators can make by developing their knowledge of systemic racism, critically reflecting upon their provision, and embedding anti-racist practice within their settings. This book includes: A framework to embed and sustain anti-racist practice in early years education. Case studies to explore constructions of racism in early childhood and the experiences of black children and their families. Reflective questions to encourage readers to consider their own practices and to drive change. A brief history of racism to create a sense of understanding and awareness of how we got to where we are today. Practical strategies to equip those who work in the early years and to gain confidence in their anti-racist practice. A focus on the power of professional love and co-creation to shift the dynamic and build the best outcomes for all children. By making anti-racism real in our learning environments and reflecting upon and reviewing provision, early years educators can ensure they are committed to their remit of advocacy for the children and communities whose lives they touch. This powerful book is a vital read for all trainee and practising early years professionals, reception teachers, nursery teachers, and managers.

Literacy, Media, Technology Becky Parry, Cathy Burnett, Guy Merchant, 2016-12-01 Literacy, Media, Technology considers the continued significance of popular culture forms such as postcards, film, television, games, virtual worlds and social media

for educators. Following multiple pathways through technological innovation, the contributors reflect on the way in which digital and portable devices lead to new and emerging forms of reading, participating and creating. Rejecting linear conceptualisations of progression, they explore how time is not linear as technological advances are experienced in multiple ways linked to different personal, social, political and economic trajectories. The contributors describe a range of practices from formal and informal education spaces and interrogate some of the continuities and discontinuities associated with literacy, media and technology at a time when rapidly evolving communicative practices often meet intransigence in educational systems. The chapters adopt diverse forms: historical perspectives, personal story and reflection, project reports, document analysis, critical reviews of resources, ethnographic accounts, and analyses of meaning-making within and beyond educational institutions. Together, they provide multiple insights into the diverse and fluid relationships between literacy, media, technology, and everyday life, and the many ways in which these relationships are significant to educational research and practice.

Great Songwriting Techniques Jack Perricone,2018-04-02 In *Great Songwriting Techniques*, veteran composer and teacher Jack Perricone shares years of experience in the art, science, and pedagogy of songwriting to teach readers the craft.

The Lifework and Legacy of Iona and Peter Opie Julia C. Bishop,June Factor,2020-04-02 Iona and Peter Opie were twentieth-century pioneers. Their research and writing focused on the folklore of British children – their games, rhymes, riddles, secret languages and every variety of the traditions and inventions of the children’s collective physical and verbal play. Such closely observed, respectful, good-humoured and historically attuned writing about the traditions of childhood was a revelation to English-language readers around the world. Their numerous books were a rare phenomenon: they attracted a popular readership far beyond the professional and academic communities. For those who work with children, their collaborative research was a powerful influence in confirming the immense capacities of the young for cooperation, conservation, invention and imagination. Their books challenged – then and now – the bleak and limited view of children which focuses on their smallness, ignorance and powerlessness. The writers in this volume pay their tribute to the Opies by exploring a wonderfully varied topography of children's play, from different countries and different perspectives. Their research is vivid and challenging; that is, as it should be, in the tradition of the Opies. This book was originally published as a special issue of the *International Journal of Play*.
