**Célio de Mendonça Clemente**

Matemática Financeira Juan Lapponi, 2014-10-28 Esta nova edição de Matemática Financeira constrói uma ponte entre a apresentação dos conceitos de forma tradicional, como vem sendo divulgado e realizado no Brasil há muitos anos, e uma apresentação mais atual que inclui a utilização de conceitos mais abrangentes e modernos de Finanças. Com linguagem leve e didática e com o objetivo de facilitar o autodesenvolvimento do leitor, a obra é complementada por muitos exercícios e aborda assuntos como: juros simples e compostos, taxa nominal e capitalização contínua, temas com séries de capitais, avaliação de projetos de investimento, operação contingente, dentre outros. Acompanhando os exemplos e resolvendo os exercícios, o leitor terá um procedimento único de resolução dos cálculos financeiros com juro composto, utilizará adequadamente as antigas e novas ferramentas de cálculo e melhorará seu desempenho profissional.

O (Novo) Enem e as Práticas Educativas do Professor de Matemática do Ensino Médio: A Relação com o Saber e o Discurso Pedagógico Célio de Mendonça Clemente, 2023-05-09 A obra O (Novo) ENEM e as práticas educativas do professor de matemática do ensino médio: a relação com o saber e o discurso pedagógico teve o seu embrião nas minhas inquietações com as práticas educativas e de gestão adotadas no Ensino Médio na rede pública do Estado do Ceará. As inquietações são inerentes ao professor e um imperativo para o sentido da docência, pois, precisa ser protagonista e tomar parte nas decisões que podem realocar a escola e os estudantes, do estágio de ser para o de vir a ser. Estudar as relações de ensino, aprendizagem e/ou ensino e aprendizagem, na instituição e/ou sistema de ensino onde atua não é suficiente ao professor para discorrer sobre elas. É necessário pesquisar e construir conhecimento. O Mestrado Acadêmico em Ensino de Ciências e Matemática pelo NPGEICIMA/UFS referendou minhas formas de pensar as práticas educativas do professor de Matemática do Ensino Médio e abriu caminhos para conhecer conceitos imanentes à sua Relação com o Saber e ao seu discurso pedagógico que, não dissociam-se do discurso das políticas públicas para a educação. A maturação do conhecimento sobre estes e outros conceitos, aliada à uma pesquisa em três escolas da rede pública cearense, cujos principais sujeitos pesquisados foram os professores de Matemática, constituíram os elementos de propulsão para escrever esta obra. O propósito é tratar da relação que os professores de Matemática têm quanto à nova concepção de ENEM proposta pelas reformulações de 2009 e pelas DCNEM/2012 quando a Matemática passou a ser uma área do conhecimento. Parece ser, essa realidade de mudanças, a própria sedimentação do Novo Ensino Médio que se intenciona implantar e, nesse caso, é

necessário identificar como os professores de Matemática se apropriam dessa nova concepção, como compreendem as mudanças e articulam a contextualização e a interdisciplinaridade aos conteúdos matemáticos. Necessário se faz, saber se houve mudanças nas práticas educativas dos professores e como a formação inicial e continuada destes têm determinado o uso de metodologias diferentes e novos métodos de avaliar a partir do discurso pedagógico dos documentos oficiais e do (Novo) ENEM com seus discursos, ideias e intenções.

Educação Infantil Eliana Bhering, Beatriz Abuchaim, Karina Fasson, Ana Paula Ferreira da Silva, Karina Biasoli, 2021-02-26

O livro apresenta um estudo sobre políticas de educação infantil para crianças de 0 a 3 anos, em doze países (Argentina, Colômbia e Peru; Japão; Nova Zelândia e Austrália; Canadá (Ontário); Dinamarca e Suécia; Espanha, França e Inglaterra). Por meio do mapeamento das políticas desses países, aspectos do atendimento são discutidos: a oferta de atendimento, a organização do sistema nacional, os aspectos da formação e carreira dos profissionais e as estratégias de avaliação das crianças, das unidades e do sistema presentes na política. O objetivo da obra é conhecer o atendimento educativo para bebês e crianças, contribuindo assim para o nosso debate nacional.

Matemática Aplicada Larry J. Goldstein, David C. Lay, David I. Schneider, Nakhlé H. Asmar, 2016-10-01 Amplamente adotado e aclamado, este livro-texto apresenta o cálculo de maneira intuitiva em aplicações da vida real contemporânea na administração e nas ciências biológicas e sociais. O autor mantém a bem-sucedida fórmula das outras edições, juntando uma quantidade substancial de análise de gráficos e provas geométricas informais com abundância de exercícios. O texto apresenta os conceitos de forma clara com inúmeros exercícios, mantendo o rigor matemático. Além disso, considera os problemas reais e potenciais enfrentados pelos estudantes na aprendizagem da matéria. Inclui inúmeros exercícios para os alunos praticarem os conceitos apresentados.

Matemática e Docência Niusarte Virginia Pinheiro, 2024-07-22 O Brasil tem um grande desafio em relação ao ensino e à aprendizagem da Matemática. Os índices dos exames em larga escala apontam que a maioria dos(as) estudantes que conclui o Ensino Médio não se apropria dos conhecimentos elementares. Assim, a universidade é chamada a estabelecer parceria com as escolas de Educação Básica para criar, desenvolver e difundir práticas que possam contribuir para atenuar o analfabetismo matemático. Esta obra, organizada por integrantes do Grupo de Estudos e Pesquisas em Educação Matemática – GEPEMA/UFVJM, busca, na abertura de espaços que permitam a realização, divulgação e o compartilhamento de experiências, um caminho para o estabelecimento do diálogo entre teoria e prática e, assim, favorecer a melhoria dos processos de ensino e aprendizagem dos conceitos matemáticos. É indicada para formação docente (inicial e continuada) e cursos de pós-graduação, visando à promoção de práticas pedagógicas inovadoras e mais inclusivas. O conjunto dos textos que compõem este livro contemplam conteúdos como geometria, trigonometria, probabilidade, juros, empréstimos e

amortização. Trata-se de experiências desenvolvidas pelos autores e autoras em suas respectivas salas de aula, por meio do uso de metodologias interativas e lúdicas.

*Crossing the Border of the Traditional Science Curriculum* Maurício Pietrocola, Ivã Gurgel, 2017-08-24 Nations worldwide consider education an important tool for economic and social development, and the use of innovative strategies to prepare students for the acquisition of knowledge and skills is currently considered the most effective strategy for nurturing engaged, informed learners. In the last decade especially, European countries have promoted a series of revisions to their curricula and in the ways teachers are trained to put these into practice. Updating curriculum contents, pedagogical facilities (for example, computers in schools), and teaching and learning strategies should be seen as a routine task, since social and pedagogical needs change over time. Nevertheless, educational institutions and actors (educational departments, schools, teachers, and even students) normally tend to be committed to traditional practices. As a result of this resistance to change within educational systems, implementing educational innovation is a big challenge. The authors of the present volume have been involved with curriculum development since 2003. This work is an opportunity to present the results of more than a decade of research into experimental, inventive approaches to science education. Most chapters concern innovative strategies for the teaching and learning of new contents, as well as methods for learning to teach them at the pre-university

school level. The research is focused on understanding the pedagogical issues around the process of innovation, and the findings are grounded in analyses of the limits and possibilities of teachers' and students' practices in schools.
