Translation and Neoliberalism Ali Jalalian Daghigh, Mark Shuttleworth, 2024-10-25 This book explores the intersections of neoliberalism, translation, and interpreting, a scarcely explored topic in the field of translation studies across diverse regions, including Europe, North America, Asia, and Australia, covering four primary themes that offer unique perspectives on how neoliberal ideologies influence translation and interpreting. The first theme uses data triangulation to delve into the influence of market-driven ideologies on translation and interpreting curriculum globally as well as the neoliberal tendencies of the trainees in China and Korea. The second theme investigates the effects of top-down neoliberal policies on translation services and practices in Australia, Canada, and the UAE, examining how these policies influence service quality, working conditions, and the balance between market demands and academic requirements. The third theme assesses the influence of technology and neoliberalism on the translation and interpreting labor market, providing a critical analysis of the automation of translation workflows, the rise of non-standard employment arrangements, and the socio-economic challenges faced by translation professionals. The final theme analyzes the intersection of neoliberalism and translation at the discourse level, employing various approaches including critical discourse analysis and content analysis to explore how neoliberal values manifest in translated texts and practices in China, Iran, and USA. This book is an essential resource for academics, postgraduate students, researchers, policymakers, educators, and practitioners interested in the dynamic interplay between neoliberalism and translation, offering new insights and critical perspectives that contribute to a deeper understanding of the socio-economic forces shaping the field of translation and interpreting.

Neoliberal Philosophy - a Globalization Dynamic Demir Tuncer, 2011-12 Essay from the year 2010 in the subject Politics - International Politics - Topic: Globalization, Political Economics, grade: A-, Saint Mary's University (International Development Studies), course: International Development Studies Theory and Practice - Neoliberal Globalization, language: English, abstract: This essay looks at neoliberalism as the main globalization dynamic and consequently discusses its implications for today's global political economy, arguing that despite the neoliberal development rhetoric of mass prosperity and sustainable development, neoliberalism along with globalization has led to the decline of the living and working

conditions of millions of people around the world.

Sharia Transformations Michael G. Peletz,2020-03-17 Few symbols in today's world are as laden and fraught as sharia—an Arabic-origin term referring to the straight path, the path God revealed for humans, the norms and rules guiding Muslims on that path, and Islamic law and normativity as enshrined in sacred texts or formal statute. Yet the ways in which Muslim men and women experience the myriad dimensions of sharia often go unnoticed and unpublicized. So too do recent historical changes in sharia judiciaries and contemporary strategies on the part of political and religious elites, social engineers, and brand stewards to shape, solidify, and rebrand these institutions. Sharia Transformations is an ethnographic, historical, and theoretical study of the practice and lived entailments of sharia in Malaysia, arguably the most economically successful Muslim-majority nation in the world. The book focuses on the routine everyday practices of Malaysia's sharia courts and the changes that have occurred in the court discourses and practices in recent decades. Michael G. Peletz approaches Malaysia's sharia judiciary as a global assemblage and addresses important issues in the humanistic and social-scientific literature concerning how Malays and other Muslims engage ethical norms and deal with law, social justice, and governance in a rapidly globalizing world.

Privileged Populists Micah J. Fleck,2022-02-10 Counter-revolution has long been a tool of propagandists to redirect populist movements from achieving actual liberation for themselves. But what happens when counter-revolutionaries begin to believe their own claims of genuine revolution? What leads to such a phenomenon? And how big a role does mainstream political ideology and policy play in the mass ignorance and revisionism that has now allowed nationalism to influence national elections? Privileged Populists sets out to answer these questions while aiming to understand the organic emergence of anti-political populism within the context of late-stage capitalism in the West. This book analyses how these elements

inform and validate each other as means of appealing to the growing sense of cultural angst and economic unrest within the conservative working class-and unwittingly giving undue credence to some of the most extreme right-wing ideological claims in the process. What results is a journey through the history of revolutionary thought (and how that history has been distorted over time), as well as an anthropological investigation of populism itself as a naturally occurring logic within groups-and how it can be exploited in the absence of substantive mainstream solutions to present-day economic crises.
