Higher Education: Handbook of Theory and Research Laura W. Perna, 2023-02-24 Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains chapters on current important issues pertaining to college students and faculty, organization and administration, curriculum and instruction, policy, diversity issues, economics and finance, history and philosophy, community colleges, advances in research methodology and other key aspects of higher education administration. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

Women in Industrial and Systems Engineering Alice E. Smith, 2019-09-13 This book presents a diversity of innovative and impactful research in the field of industrial and systems engineering (ISE) led by women investigators. After a Foreword by Margaret L. Brandeau, an eminent woman scholar in the field, the book is divided into the following sections: Analytics, Education, Health, Logistics, and Production. Also included is a comprehensive biography on the historic luminary of industrial engineering, Lillian Moeller Gilbreth. Each chapter presents an opportunity to learn about the impact of the field of industrial and systems engineering and women's important contributions to it. Topics range from big data analysis, to improving cancer treatment, to sustainability in product design, to teamwork in engineering education. A total of 24 topics touch on many of the challenges facing the world today and these solutions by women researchers are valuable for their technical innovation and excellence and their non-traditional perspective. Found within each author's biography are their motivations for entering the field and how they view their contributions, providing inspiration and guidance to those entering industrial engineering.

Should Race Matter? David Boonin, 2011-11-14 In this book, philosopher David Boonin attempts to answer the moral

questions raised by five important and widely contested racial practices: slave reparations, affirmative action, hate speech restrictions, hate crime laws and racial profiling. Arguing from premises that virtually everyone on both sides of the debates over these issues already accepts, Boonin arrives at an unusual and unorthodox set of conclusions, one that is neither liberal nor conservative, color conscious nor color blind. Defended with the rigor that has characterized his previous work but written in a more widely accessible style, this provocative and important new book is sure to spark controversy and should be of interest to philosophers, legal theorists and anyone interested in trying to resolve the debate over these important and divisive issues.

The Judicial Isolation of the "racially" Oppressed E. Nathaniel Gates,1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's A Comedy of Errors. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on The Comedy of Errors that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

Racial Battle Fatigue in Higher Education Kenneth J. Fasching-Varner,Katrice A. Albert,Roland W. Mitchell,Chaunda Allen,2014-12-23 Racial Battle Fatigue is described as the physical and psychological toll taken due to constant and unceasing discrimination, microaggressions, and stereotype threat. The literature notes that individuals who work in environments with chronic exposure to discrimination and microaggressions are more likely to suffer from forms of generalized anxiety manifested by both physical and emotional symptoms. This edited volume looks at RBF from the perspectives of graduate students, middle level academics, and chief diversity officers at major institutions of learning. RBF takes up William A. Smith's idea and extends it as a means of understanding how the "academy" or higher education operates. Through microaggressions, stereotype threat, underfunding and defunding of initiatives/offices, expansive commitments to diversity related strategic plans with restrictive power and action, and departmental climates of exclusivity and inequity; diversity workers (faculty, staff, and administration of color along with white allies in like positions) find themselves in a badlands where identity difference is used to promote institutional values while at the same time creating unimaginable work spaces for these workers.

When the Bullets Stop: A Call for Peace Allen Dekeyser,2025-07-15 When the Bullets Stop: A Call for Peace is a raw,

emotional, and unflinching journey into America's gun violence epidemic—told through the eyes of a survivor who has lived through it. Author Allen DeKeyser was shot in the face by police and has faced multiple violent encounters. He turns those scars into strength in this powerful call to action that blends truth-telling, community insight, healing, and hope. Through fifteen hard-hitting chapters, readers are guided through the human cost of a bullet, the silence that enables violence, and the real solutions that can lead to lasting change. This extended edition includes survivor stories, faith-based reflections, healing strategies, and calls for unity that challenge readers to speak up, act boldly, and believe that peace is possible. Whether you're a victim, a leader, a teacher, a parent, or someone who just wants to help—this book is for you. Because the story isn't over... when the bullets stop.

Masters of Space Robert E. Vardeman,1987 As supervisor of Interstellar Materials' Deepdig #2 mining colony, Barton Kinsloving is one of the most important humans in the galaxy. For Deepdig is one of mankind's only sources for samarium salts--that rare mineral essential for interstellar travel--grudgingly leased to mankind by the despised Lorr. Then Barton unwittingly stumbles across a terrifying secret--and suddenly he is a man marked for murder by the company he once served and the woman he once loved. Framed for crimes beyond imagination, hunted by human and alien alike, only Barton can avert an interstellar war of unthinkable proportions.--Pg. [4] of cover.
