Party Discipline in the U.S. House of Representatives Kathryn Pearson, 2015-08-06 Political party leaders in the U.S. House of Representatives command greater loyalty than ever from fellow party members in roll call votes, campaign contributions, and partisan speeches. In return, leaders reward compliant members with opportunities to promote constituent interests and to advance their own political careers. Denial of such privileges as retribution against those who don't fully support the party agenda may significantly damage a member's prospects. Kathryn Pearson examines the disciplinary measures that party leaders in the U.S. House of Representatives employ to exact such loyalty, as well as the consequences for a democratic legislature. Drawing upon data from 1987-2010, Pearson identifies the conditions under which party leaders opt to prioritize policy control and those which induce them to prioritize majority control. She then assesses the ways in which these choices affect, on one hand, the party's ability to achieve its goals, and on the other hand, rank-and-file members' ability to represent their constituents. Astute party leaders recognize the need for balance, as voters could oust representatives who repeatedly support the party's agenda over their constituents' concerns, thereby jeopardizing the number of seats their party holds. In her conclusion, Pearson discusses the consequences of party discipline such as legislative gridlock, stalled bills, and proposals banned from the agenda. Although party discipline is likely to remain strong as citizens become more cognizant of enforced party loyalty, their increasing dissatisfaction with Congress may spur change.

Party Discipline and Parliamentary Politics Christopher J. Kam, 2009-03-26 This text examines the interaction and contention between party leaders and MPs to study the underlying structure of party unity.

The Oxford Handbook of Political Representation in Liberal Democracies Robert Rohrschneider, Jacques Thomassen, 2020-07-28 The Handbook of Political Representation in Liberal Democracies offers a state-of-the-art assessment of the functioning of political representation in liberal democracies. In 34 chapters the world's leading scholars on the various aspects of political representation address eight broad themes: The concept and theories of political representation, its history and the main requisites for its development; elite orientations and behavior; descriptive representation; party government and representation; non-electoral forms of political participation and how they relate to political representation; the challenges to representative democracy originating from the growing importance of non-majoritarian institutions and

social media; the rise of populism and its consequences for the functioning of representative democracy; the challenge caused by economic and political globalization: what does it mean for the functioning of political representation at the national level and is it possible to develop institutions of representative democracy at a level above the state that meet the normative criteria of representative democracy and are supported by the people? The various chapters offer a comprehensive review of the literature on the various aspects of political representation. The main organizing principle of the Handbook is the chain of political representation, the chain connecting the interests and policy preferences of the people to public policy via political parties, parliament, and government. Most of the chapters assessing the functioning of the chain of political representation and its various links are based on original comparative political research. Comparative research on political representation and its various subfields has developed dramatically over the last decades so that even ten years ago a Handbook like this would have looked totally different.

Party Organization and Electoral Success of New Anti-establishment Parties Tomáš Cirhan, 2023-08-14 This book examines the new anti-establishment parties electorally succeeding at the expense of their established counterparts and argues that party organization matters for their electoral success. It explores a relationship between these parties' electoral success and their party organization. Using a framework to explain the role of organizational features such as local party branches, party membership, and party elites in this process, it reveals how they help parties to be more stable, cohesive, and legitimate; a state that facilitates better conditions for electoral success. It also shows that control over party organization is achieved partially by the existence of a corporate network associated with party leaders' businesses. This book will be of key interest to scholars and students of party politics and political parties, anti-establishment politics, and Eastern European politics.

The Party Leads All Jacques deLisle, Guobin Yang, 2022-09-27 Examining the past, current, and potential future roles of the Communist Party in governing China The Chinese Communist Party and its policies touch nearly every aspect of life in China and dominate some. An often-quoted current phrase one with roots in the era of Mao Zedong says the Party leads all. Under the leadership of Xi Jinping, the Party determines much of what is permitted and prohibited in the country's social, economic, and political activity, as well as China's increasingly consequential foreign relations. Even so, the Communist Party always has faced limits on what it can control, and it may encounter new obstacles ahead. This book addresses important questions about the current and future roles of the party: Has Xi's tenure brought a qualitative increase in the pursuit, or achievement, of party control? How is party rule shaped and exercised by internal party dynamics, the party's control over the state, society, economy, foreign affairs, government institutions and rules, and ideology? How serious are the threats to

party strength and success posed by Xi's approach to power, corruption in the party's ranks, a rapidly changing society, a fraught international environment, or a possibly overly ambitious agenda for party control? Leading scholars examine these questions from several disciplinary perspectives, each focusing on a key area of the party and its efforts to lead, control, or influence the world around it. This book offers the most comprehensive and up-to-date assessment of the party's roles in China's economy, government, civil society, legal system, military affairs, and foreign policy. It does so at a critical moment, with the full contours of the Xi Jinping era in China becoming more evident and as the CCP reaches its 100th anniversary and nears three-quarters of a century in power. It will be essential reading for all scholars, students, and policy-makers interested in contemporary China.

Party Discipline and Parliamentary Government Shaun Bowler, David M. Farrell, Richard S. Katz, 1999 This collection of essays examines how and why party discipline arises and is maintained. The book provides theoretical background and comparative studies of legislatures, covering Britain, Finland, Ireland, Italy, the Netherlands, Norway, Spain and Hungary, and the European Parliament.

How Polarization Begets Polarization Samuel Merrill, Bernard Grofman, Thomas L. Brunell, 2024 Extreme polarization in American politics--and especially in the U.S. Congress--is perhaps the most confounding political phenomenon of our time. This book binds together polarization in Congress and polarization in the electorate within an ever-expanding feedback loop. This loop is powered by the discipline exerted by the respective political parties on their Congressional members and district candidates and endorsed by the voters in each Congressional district who must choose between the alternatives offered. These alternatives are just as extreme in competitive as in lop-sided districts. Tight national party discipline produces party delegations in Congress that are widely separated from one another but each ideologically narrowly distributed. As district constituencies become more polarized and are egged on by activists, parties are further motivated to move past a threshold and appeal to their respective bases rather than to voters in the ideological center. America has indeed acquired parties with clear platforms--once thought to be a desirable goal--but these parties are now feuding camps. What resolution might there be? Just as the progressive movement slowly replaced the Gilded Age, might a new reform effort replace the current squabble? Or could an asymmetry develop in the partisan constraints that would lead to ascendancy of the center, or might a new and over-riding issue generate a cross-cutting dimension, opening the door to a new politics? Only the future will tell.

Democracy and the Party System in the United States Moisei Ostrogorski,1910

Representing the People Kris Deschouwer,Sam Depauw,2014-05-15 Modern democracy is organized as a representative democracy in which those representing the people are elected to office. Political parties play a crucial role in this. They select the candidates, form or oppose governments, and organize the work of the representatives in parliament. This model of democracy is however being criticized. Parties are hardly trusted and voters have become volatile. How, then, do elected representatives of the people see and fulfil their role? To study this a survey was organized among the members of statewide

and sub-state parliaments in fifteen countries. Members of seventy-three parliamentary assemblies were asked how they perceive their representative role, what they do to keep in touch with voters, how they behave and vote in parliament and how they will try to get re-elected. One of the ways in which candidates and elected members of parliament might react to the changing conditions in which they have to represent the people is by stressing more personal characteristics as opposed to the party label and party ideology. Representation might then become more a matter of personal choice. The results of the survey presented in this book do however confirm quite strongly that representation is very much shaped by the political institutions in which it is performed. Representation differs between countries, between different electoral systems, between statewide and regional parliaments, and depends strongly on the party to which a member of parliament belongs. Representation depends not as much on who the representatives are, as on where they are.

Party Discipline and Parliamentary Politics Christopher Joseph Kam, 2009 This work examines the relationship between party leaders and Members of Parliament in Britain, Canada, Australia and New Zealand, showing how the two sides interact and sometimes clash.
