Zaha Hadid Complete Works: Major and recent works Zaha Hadid, 2004

Zaha Hadid and Suprematism Zaha Hadid, Galerie Gmurzynska, 2012 Zaha Hadid ([born] 1950 in Baghdad), recipient of the Pritzker Architecture Prize, designed and curated a groundbreaking exhibition at Zurich's Galerie Gmurzynska, comparing works of the Russian avant-garde with those of Zaha Hadid Architects. A fierce explosion of Russian works tore through the contemporary works by the architect in a dynamic black and white design. Created specifically for the venue, the projection of a two-dimensional drawing onto a three dimensional space transformed the gallery into a spatial painting in which the threshold of the picture plane expanded and could be entered. Zaha Hadid translated the warped and weightless space of Russian avant-garde painting and sculpture by Kazimir Malevich, El Lissitzky, and Alexander Rodchenko into her very own architectural language.--Publisher's website.

The Routledge Companion to Women in Architecture Anna Sokolina, 2021-06-28 The Routledge Companion to Women in Architecture illuminates the names of pioneering women who over time continue to foster, shape, and build cultural, spiritual, and physical environments in diverse regions around the globe. It uncovers the remarkable evolution of women's leadership, professional perspectives, craftsmanship, and scholarship in architecture from the preindustrial age to the present. The book is organized chronologically in five parts, outlining the stages of women's expanding engagement, leadership, and contributions to architecture through the centuries. It contains twenty-nine chapters written by thirty-three recognized scholars committed to probing broader topographies across time and place and presenting portraits of practicing architects, leaders, teachers, writers, critics, and other kinds of professionals in the built environment. The intertwined research sets out debates, questions, and projects around women in architecture, stimulates broader studies and discussions in emerging areas, and becomes a catalyst for academic programs and future publications on the subject. The novelty of this volume is in presenting not only a collection of case studies but in broadening the discipline by advancing an incisive overview of the topic as a whole. It is an invaluable resource for architectural historians, academics, students, and professionals.

Dekonstruktivismus in der Architektur? Simone Kraft, 2015-08-15 Philip Johnson und Mark Wigley versammelten 1988 in ihrer ebenso erfolgreichen wie umstrittenen Ausstellung »Deconstructivist Architecture« Namen, die heute zur

internationalen Elite der »Starchitects« gehören: Frank Gehry, Daniel Libeskind, Rem Koolhaas, Peter Eisenman, Zaha Hadid, Coop Himmelb(l)au und Bernard Tschumi. Simone Kraft legt nun, mehr als 25 Jahre später, erstmals eine Untersuchung zu den Widersprüchlichkeiten der Ausstellung vor. Sie macht sich intensive Archivrecherchen und Informationen von Zeitzeugen zunutze, um die ungewöhnlichen organisatorischen Hintergründe zu rekonstruieren und argumentative Schwachstellen des kuratorischen Konzepts zu beleuchten. So wird schließlich am Beispiel der sieben ausgestellten Architekten eine Annäherung an einen fundierte(re)n Begriff von der dekonstruktivistischen Architektur ermöglicht.
