## Virginia Woolf

*A Haunted House* Virginia Woolf, 2020-04-29 WHATEVER hour you woke there was a door shutting. From room to room they went, hand in hand, lifting here, opening there, making sure--a ghostly couple. Here we left it, she said. And he added, Oh, but here too! It's upstairs, she murmured. And in the garden, he whispered. Quietly, they said, or we shall wake them. But it wasn't that you woke us. Oh, no. They're looking for it; they're drawing the curtain, one might say, and so read on a page or two. Now they've found it, one would be certain, stopping the pencil on the margin. And then, tired of reading, one might rise and see for oneself, the house all empty, the doors standing open, only the wood pigeons bubbling with content and the hum of the threshing machine sounding from the farm. What did I come in here for? What did I want to find? My hands were empty. Perhaps it's upstairs then? The apples were in the loft. And so down again, the garden still as ever, only the book had slipped into the grass.

**Virginia Woolf and the Power of Story** Linda Nicole Blair, 2017-03-05 From novels to films, our everyday lives are filled with stories that comfort and connect us and enable new ways of thinking. One of the most innovative writers in modern history, Virginia Woolf, changed the landscape of fiction and challenged our notions of what it means to be human. Her novels invite readers to envision a world in which stories have the power to effect positive change. This book explores the phenomenon of Story as practiced by Woolf, interpreting her work in the context of literary Darwinism--a critical approach focusing on patterns of innate human behavior.

*The Ghostly and the Ghosted in Literature and Film* Lisa B. Kröger, Melanie Anderson, 2013-03-14 *The Ghostly and the Ghosted in Literature and Film: Spectral Identities* is a collection of essays expanding the concepts of "ghost" and "haunting" beyond literary tools used to add supernatural flavor to include questions of identity, visibility, memory and trauma, and history. Using a wide scope of texts from varying time periods and cultures, including fiction and film, this collection explores the phenomenon of social ghosts. What does it mean, for example, to be invisible, to be a ghost, particularly when that ghost is representative of a person or group living on the margins of society? Why do specific types of ghosts tend to haunt certain cultures and/or places? What is it about a people's history that invites these types of hauntings? The essays in this book, like pieces of a puzzle, approach the larger questions from diverse individual perspectives, but, taken together, they offer a richly detailed composite discussion of what it means to be haunted.

**In Search of (Non)Sense** Elżbieta Chrzanowska-Kluczevska, Grzegorz Szpila, 2009-01-14 [...] it would seem natural to assume that the disciplines of literary studies and linguistics should by rights converge regularly to exchange views as each pursues its own goals. Is such a convergence possible on the question of sense and nonsense? James W. Underhill (this volume) The contributors to the present volume have focused their attention on two sets of problems that are leitmotifs in all the articles gathered. Firstly, should literary semantics – the linguistic study of texts/discourses marked with the feature of 'literariness' and 'poeticalness' – strive after an interpretation of all such texts at all costs? Are all literary texts interpretable? How do we cope with such troublesome linguistic phenomena as anomaly, deviance, and absurdity? Aren't we, by any chance, fascinated by nonsense? Do we try to make it at least partly meaningful? Is interpretability our default value? The introductory article by the renowned scholar Margaret H. Freeman is an important voice, indeed a manifesto of sorts of literary semanticists in this respect. Secondly, while trying to answer all these questions, well aware of the fact that literary semantics is a fuzzy branch of linguistic studies, we have attempted at exploring its borderline zone to see to what extent we

have to draw from various theoretical sources. Literary semanticists have often proved that they are capable of arguing contrastively in the atmosphere of openness to such neighbouring fields as: discourse analysis, literary pragmatics and reader-response theories, narratology, literary semiotics and hermeneutics, translation studies and – very importantly – the philosophy of language. The authors contributing to this book, an international company of regularly cooperating linguists and literary scholars, strike a nice balance between the cognitive and the more traditionally or philosophically-oriented frameworks of study, being a vivid proof that cognitive and other “denominations” are perfectly capable of fruitful coexistence. The volume ends with a short presentation by Radosław Nowakowski, already known to academic and artistic audiences in Europe as a creator and propagator of liberature – the art of unusual bookmaking, the art of the book liberated from our traditional preconceptions. We hope that our volume will be of interest to academics and students of literary theory and linguistics alike, especially those involved in literary semantics, stylistics and poetics. Naturally, the book is also addressed to members and sympathizers of IALS (International Association of Literary Semantics) and the readers of Journal of Literary Semantics, scattered across the world.

**The Construction of Discourse as Verbal Interaction** María de los Ángeles Gómez González, J. Lachlan Mackenzie, 2018-09-20 This edited volume showcases new work on discourse analysis by big names in the field and promising early-career researchers. Arising from the latest in the series of IWoDA workshops in Santiago de Compostela, it provides novel insights into both the explicit and the implicit characteristics of discourse as used in verbal interaction. Discourse markers, as their name indicates, are among the explicit signals of coherence, while discourse relations may be either explicit or implicit. Similarly, the discourse used for purposes of evaluation, stance-taking and interpersonal engagement is either overt or covert, as is also true of the expression of emotions and empathy. This, in general terms, is the challenging terrain into which the contributors to this volume have ventured. The book combines theoretical issues with a practical orientation, comparing languages, analysing different registers, studying the openings of Skype conversations, and much more besides; it will prove highly relevant for postgraduate and advanced practitioners of discourse analysis, interaction studies, semantics and pragmatics.

**Research Methods for Reading Digital Data in the Digital Humanities** Gabriele Griffin, 2016-02-15 The first volume to introduce the techniques and methods of reading digital material for research Digital Humanities has become one of the new domains of academe at the interface of technological development, epistemological change, and methodological

concerns. This volume explores how digital material might be read or utilized in research, whether that material is digitally born as fanfiction, for example, mostly is, or transposed from other sources. The volume asks questions such as what happens when text is transformed from printed into digital matter, and how that impacts on the methods we bring to bear on exploring that technologized matter, for example in the case of digital editions. Issues such as how to analyse visual material in digital archives or Twitter feeds, how to engage in data mining, what it means to undertake crowd-sourcing, big data, and what digital network analyses can tell us about online interactions are dealt with. This will give Humanities researchers ideas for doing digitally based research and also suggest ways of engaging with new digital research methods. Key features

- First volume centred on the navigation and interpretation of digital material as research methods in the Humanities
- Up-to-date analyses of issues and methods including big data, crowdsourcing, digital network analysis, working with digital additions
- Based on actual research projects such as para-textual work with fanfiction, reading twitter, different kinds of distant and close readings

**Monday Or Tuesday** Virginia Woolf, 2019-04-29 A haunted house that holds the mystery of the human heart; a challenge to read the contents of a library - that reveals how dismally bad all too many books are. Five faces in a train compartment that among them become an unwritten novel. . . . a garden that holds the memory of love. Monday or Tuesday contains eight beautiful tales from the strange beautiful mind of Virginia Woolf, one of the 20th century's most innovative - and most disturbing, and most disturbed - writers. This gorgeous collection reveals Woolf's style and imagination in all their delicate brilliance.

American Cities in Post-Apocalyptic Science Fiction Robert Yeates, 2021-11-15 Visions of the American city in post-apocalyptic ruin permeate literary and popular fiction, across print, visual, audio and digital media. American Cities in Post-Apocalyptic Science Fiction explores the prevalence of these representations in American culture, drawing from a wide range of primary and critical works from the early-twentieth century to today. Beginning with science fiction in literary magazines, before taking in radio dramas, film, video games and expansive transmedia franchises, Robert Yeates argues that post-apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues. Examining how the post-apocalyptic American city has been repeatedly adapted and repurposed to new and developing media over the last century, this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible. Chapters present media-specific analyses of these texts, situating them within their historical contexts and the broader history of representations of urban ruins in American fiction. Original in its scope and cross-media approach, American Cities in Post-Apocalyptic Science Fiction both illuminates little-studied texts and provides provocative new readings of familiar works such as Blade Runner and The Walking Dead, placing them within the larger historical context of imaginings of the American city in ruins.
