**Chains of Gold** John McKinna, From the author of Crash Dive, Tiger Reef and Shark Lake Greed, drug trafficking, kidnapping and murder... The Spanish Galleon Arista sank in 1539 due to a storm and the heavy weight of its cargo. The ship had been carrying Aztec golden treasure; chains, goblets, plates, statues, lamps, ceremonial swords, bricks, bars, and coins, all of solid Aztec gold. Much of the gold, however, had been thrown overboard trying to save the ship. Having read a portion of its log, deep sea divers Ben Gannon and Eugene McCluskey were convinced by the descendants of the ship's owner to recover it and its bounty. When the treasure proved to be illusive, the job became treacherous with twists and turns that include greed, drug trafficking, kidnapping and murder.

Chains of Gold Nancy Springer,2015-05-19 A doomed king and his wife-to-be attempt to flee their fate in this novel by the finest fantasy writer of this or any decade (Marion Zimmer Bradley). Cerilla, the sheltered, castle-bound protagonist of this inventive and moving fantasy novel, is determined to escape her bloody fate: marriage to a king who is to be sacrificed after she bears his child. But Cerilla makes the monumental mistake of falling in love with her god-like husband to be—Arlen of the Sacred Isle—and he with her. Arlen's devoted comrade Lonn takes Arlen's place so the lovers can flee. But their escape is just the beginning of an odyssey marked by struggle and hardship as they cope with hyperboreal storms, near starvation, and attack by a band of armed horsemen. As they journey across harsh and fantastic lands, finally making a home beyond the Mountains of the Mysteries, Cerilla discovers how much she is willing to give up in the name of love. Featuring a mythical world where horses gallop across water and serpents live beneath the earth, Chains of Gold is about finding your path in life, staying true to who you are, and the ultimate meaning of sacrifice. From a winner of the Tiptree Award and other honors, an author who writes like a dream, it's an unforgettable reading experience ( St. Louis Post-Dispatch).

*Metallic Chains / Chains of Metals* Michael Springborg,Yi Dong,2006-11-16 The present book describes a large variety of different types of chain systems (nanowires), including shorter chains that are artificially produced for instance in break-

junction experiments, chains synthesized as guests inside the channels of a host crystal, crystalline chain compounds, organic polymers (synthetic metals), and charge-transfer salts, thus covering an unusual wealth of systems. Both experimental and theoretical studies are discussed. Particular emphasis is put on illustrating the special phenomena that occur in such quasi-one-dimensional systems, and how theoretical and experimental efforts have been used in identifying those properties that are specific for truly one-dimensional systems from those of quasi-one-dimensional systems. Moreover, it is shown that metallic chains can be found in a large range of systems, but also that chains of metals not always are metallic.· Gives a unifying description of very many different phenomena and systems· High-Tc superconductors, conjugated polymers, gold nanowires, carbon nanotubes, chain compounds, and charge-transfer salts are all treated in one volume· Illustrates the very broad range of quasi-one-dimensional systems

But the truth is far grimmer. Cordelia's marriage is a lie, arranged to save her reputation, while James remains in love with the Grace Blackthorn. Cortana burns her when she touches it. And a serial murderer is targeting the Shadowhunters of London, killing under cover of darkness, then vanishing without a trace. Now Cordelia, James, and Lucie must follow the trail of the killer through the city's most dangerous streets. All the while, each is keeping a shocking secret: Lucie, that she is attempting to raise the dead; Cordelia, that she has sworn a dangerous oath of loyalty to a mysterious power; and James, that he himself may be the killer they seek.
