**Descriptive Translation Studies and Beyond** Gideon Toury, 1995 A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour in the appropriate cultural setup; textual components in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

**Descriptive Translation Studies - and beyond** Gideon Toury, 2012-11-21 This is an expanded and slightly revised version of the book of the same title which caused quite a stir when it was first published (1995). It thus reflects an additional step in an ongoing research project which was launched in the 1970s. The main objective is to transcend the limitations of using descriptive methods as a mere ancillary tool and place a proper branch of DTS at the very heart of the discipline, between the theoretical and the applied branches. Throughout the book, theoretical and methodological discussions are illustrated by an assortment of case studies, the emphasis being on the need to take whatever one wishes to focus on within the contexts which are relevant to it. Part One discusses the pivotal position of the descriptive branch within Translation Studies, and Part Two then outlines a detailed rationale for that positioning. This, in turn, supplies a framework for the case studies comprising Part Three, where a number of exemplary issues are analysed and contextualized: texts and modes of translational behaviour are situated in their cultural setting, and textual components are related to their texts and then also to the cultural constellations in which they are embedded. All this leads to Part Four, which asks what the knowledge

accumulated through descriptive studies of the kind advocated in the book is likely to yield in terms of both the theoretical and the applied branches of the field. All in all: an innovative, thought-provoking book which no one with a keen interest in translation can afford to ignore.

**Beyond Descriptive Translation Studies** Anthony Pym, Miriam Shlesinger, Daniel Simeoni, 2008 To go "beyond" the work of a leading intellectual is rarely an unambiguous tribute. However, when Gideon Toury founded Descriptive Translation Studies as a research-based discipline, he laid down precisely that intellectual challenge: not just to describe translation, but to explain it through reference to wider relations. That call offers at once a common base, an open and multidirectional ambition, and many good reasons for unambiguous tribute. The authors brought together in this volume include key players in Translation Studies who have responded to Toury's challenge in one way or another. Their diverse contributions address issues such as the sociology of translators, contemporary changes in intercultural relations, the fundamental problem of defining translations, the nature of explanation, and case studies including pseudotranslation in Renaissance Italy, Sherlock Holmes in Turkey, and the coffee-and-sugar economy in Brazil. All acknowledge Translation Studies as a research-based space for conceptual coherence and creativity; all seek to explain as well as describe. In this sense, we believe that Toury's call has been answered beyond expectations.

The Routledge Handbook of Translation Studies Carmen Millán, Francesca Bartrina, 2013 The Routledge Handbook of Translation Studies provides a comprehensive, state-of-the-art account of the complex field of translation studies. Written by leading specialists from around the world, this volume brings together authoritative original articles on pressing issues including: the current status of the field and its interdisciplinary nature the problematic definition of the object of study the various theoretical frameworks the research methodologies available. The handbook also includes discussion of the most recent theoretical, descriptive and applied research, as well as glimpses of future directions within the field and an extensive up-to-date bibliography. The Routledge Handbook of Translation Studies is an indispensable resource for postgraduate students of translation studies.

*Parallel Corpora for Contrastive and Translation Studies* Irene Doval, M. Teresa Sánchez Nieto, 2019-03-20 This volume assesses the state of the art of parallel corpus research as a whole, reporting on advances in both recent developments of parallel corpora – with some particular references to comparable corpora as well– and in ways of exploiting them for a variety of purposes. The first part of the book is devoted to new roles that parallel corpora can and should assume in translation studies and in contrastive linguistics, to the usefulness and usability of parallel corpora, and to advances in parallel corpus alignment, annotation and retrieval. There follows an up-to-date presentation of a number of parallel corpus projects currently being carried out in Europe, some of them multimodal, with certain chapters illustrating case studies developed on the basis of the corpora at hand. In most of these chapters, attention is paid to specific technical issues of

corpus building. The third part of the book reflects on specific applications and on the creation of bilingual resources from parallel corpora. This volume will be welcomed by scholars, postgraduate and PhD students in the fields of contrastive linguistics, translation studies, lexicography, language teaching and learning, machine translation, and natural language processing.

**A Companion to Translation Studies** Sandra Bermann, Catherine Porter, 2014-01-22 This companion offers a wide-ranging introduction to the rapidly expanding field of translation studies, bringing together some of the best recent scholarship to present its most important current themes Features new work from well-known scholars Includes a broad range of geo-linguistic and theoretical perspectives Offers an up-to-date overview of an expanding field A thorough introduction to translation studies for both undergraduates and graduates Multi-disciplinary relevance for students with diverse career goals

**The Routledge Handbook of Translation and Cognition** Fabio Alves, Arnt Jakobsen, 2020-05-31 The Routledge Handbook of Translation and Cognition provides a comprehensive, state-of-the-art overview of how translation and cognition relate to each other, discussing the most important issues in the fledgling sub-discipline of Cognitive Translation Studies (CTS), from foundational to applied aspects. With a strong focus on interdisciplinarity, the handbook surveys concepts and methods in neighbouring disciplines that are concerned with cognition and how they relate to translational activity from a cognitive perspective. Looking at different types of cognitive processes, this volume also ventures into emergent areas such as neuroscience, artificial intelligence, cognitive ergonomics and human-computer interaction. With an editors' introduction and 30 chapters authored by leading scholars in the field of Cognitive Translation Studies, this handbook is the essential reference and resource for students and researchers of translation and cognition and will also be of interest to those working in bilingualism, second-language acquisition and related areas.

Legal Translation Ingrid Simonnæs, Marita Kristiansen, 2019-03-07 In this anthology renowned scholars working in the area of legal translation studies (LTS) focus on current issues and challenges in legal translation emerging from today's globalisation and internationalisation. Considering both theoretical and practical points of view the contributions present interdisciplinary approaches to legal translation dealing with legal systems in national, EU and international settings, and include civil law and common law as well as supranational and private international law. In addition to the historical evolution of legal systems and of legal translation the papers discuss specific features of legal language and challenges in legal translation, as well as new didactic strategies to deal with the future profiles of legal translators.

Exploring Translation Theories Anthony Pym, 2017-11-27 Exploring Translation Theories presents a comprehensive analysis of the core contemporary paradigms of Western translation theory. The book covers theories of equivalence, purpose, description, uncertainty, localization, and cultural translation. This second edition adds coverage on new translation

technologies, volunteer translators, non-linear logic, mediation, Asian languages, and research on translators' cognitive processes. Readers are encouraged to explore the various theories and consider their strengths, weaknesses, and implications for translation practice. The book concludes with a survey of the way translation is used as a model in postmodern cultural studies and sociologies, extending its scope beyond traditional Western notions. Features in each chapter include: An introduction outlining the main points, key concepts and illustrative examples. Examples drawn from a range of languages, although knowledge of no language other than English is assumed. Discussion points and suggested classroom activities. A chapter summary. This comprehensive and engaging book is ideal both for self-study and as a textbook for Translation theory courses within Translation Studies, Comparative Literature and Applied Linguistics.

**Rethinking Translators** Andrea Musumeci, 2025-03-15 This book introduces a new area of research known as translator's posture. With technical, pedagogical, and sociological dimension, posture is valuable to learners, researchers, educators, and practitioners alike. The technical dimension aims to invite practitioners and more advanced learners to reflect on their position within translation environments and establish their posture as translators with more ecological awareness. The pedagogical framework is grounded in an original conceptual exploration of translation constraints, leading to an ecologically inspired perspective on translation affordances. The sociological aspect draws on the notion of authorial posture in sociology of literature. The book also presents the action research data collection from a translation theory module in a Hong Kong University, supporting the integration of postural learning into curricula. This book aims to benefit global academic and professional communities in translation studies.

**Traduction** Harald Kittel, Juliane House, Brigitte Schultze, 2004 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation.--

**Handbook of Translation Studies** Yves Gambier, Luc van Doorslaer, 2013 The HTS, in both its print and online version, provides easy access to a large range of topics, traditions and methods in Translation Studies.

**Translation and Cognition** Gregory M. Shreve, Erik Angelone, 2010 Assesses the developments in cognitive translation and interpreting studies by examining three important trends: methodological innovation, the evolution of research design, and the continuing integration of translation process research results with the core findings of the cognitive sciences.

*CIUTI-Forum 2012* Martin Forstner, Hanna Lee-Jahnke, 2013 Our current knowledge society, as exemplified in our universities, is booming. The socialization of knowledge production, along with the development of interand transdisciplinary research groupings within traditionally discipline-based teaching institutions is equally increasing, even to the extent, that new terminology is coined to better specify this cross-sector collaboration. One of these new concepts which have emerged within the framework of interdisciplinarity and transdisciplinarity is heterogenic cooperation. This concept describes the bringing together of knowledge from different sources and can be observed mainly when specialists are dependent on skills and knowledge which do not exist within the framework of their own scientific domain. The ultimate result of heterogenic cooperation will enlarge any cooperation by integrating partners from different domains, fostering collaboration in a common project with a homogeneous result. In a nutshell: the pathway from heterogeneity to homogeneity. The proceedings of the CIUTI FORUM 2012 highlight different types of networks leading not only to better practices and academic quality but also to new and innovative partnerships. Such as a solid integration of partners from industry and professional associations as well as from the language services of the United Nations, the European Parliament and the European Commission. This volume also strives to outpace in fine the status of Translation Studies as a hybrid discipline in order to be able to serve other scientific domains as a source of knowhow, skills and competences. This book contains contributions in English, French and German.

Autour de la retraduction Enrico Monti, Peter Schnyder, 2012-01-01 Comme les traductions, les retraductions permettent à l'oeuvre littéraire un nouvel accomplissement. C'est dans cette perspective que se placent les contributions de ce volume, ouvert à plusieurs langues — anglais, allemand, espagnol, français, italien, polonais — et à plusieurs approches — historiques, littéraires, sociologiques et linguistiques. Il s'agit d'examiner le rôle de la retraduction dans la construction-déconstruction des canons littéraires européens. Comme on le verra, il est fondamental.

**Translation in Systems** Theo Hermans, 2014-04-08 The notion of systems has helped revolutionize translation studies since the 1970s. As a key part of many descriptive approaches, it has broken with the prescriptive focus on what translation should be, encouraging researchers to ask what translation does in specific cultural settings. From his privileged position as a direct participant in these developments, Theo Hermans explains how contemporary descriptive approaches came about, what the basic ideas were, and how those ideas have evolved over time. His discussion addresses the fundamental problems of translation norms, equivalence, polysystems and social systems, covering not only the work of Levý, Holmes, Even-Zohar,

Toury, Lefevere, Lambert, Van Leuven-Zwart, Dhulst and others, but also giving special attention to recent contributions derived from Pierre Bourdieu and Niklas Luhmann. An added focus on practical questions of how to investigate translation (problems of definition, description, assessment of readerships, etc.) makes this book essential reading for graduate students and indeed any researchers in the field. Hermans' account of descriptive translation studies is both informed and critical. At the same time, he demonstrates the strength of the basic concepts, which have shown considerable vitality in their evolution and adaptation to the debates of the present day.
