Rural Market Potentiality in India towards Consumer Durable Goods Dr. N. Ratna Kishor,

INDIAN ECONOMY GHOSH, CHANDANA, GHOSH, AMBAR, 2016-06-27 India is an open economy, and the dynamics of it can be witnessed from the inflation and deflation of the rupee value in the market. This comprehensive book on Indian Economy shows how it behaves, and how its parameters are weighed and analyzed vis-à-vis the macroeconomic theories. This book attempts to make a more complete and clearer presentation of the basic models of macroeconomics principles, and their effect on India's current economic conditions. International Monetary Fund (IMF) thrust upon New Economic Policy in India, which aims at leaving the allocation of resources entirely to the market forces deriving its rationale from neoclassical macroeconomics. This neoclassical macroeconomics is dealt with in a proper perspective in the book. Part I presents the basic models of open economy macroeconomics, and Part II applies them to explain India's recent macroeconomic performance. The book also assesses India's current fiscal policy, monetary policy and the policy of forcible land acquisition for promotion of modern industry. The book is designed as a reference for the undergraduate and postgraduate students of Economics

How to Handle Goods and Service Tax (GST) Dr. DK Sukhani, 2017-06-23 GST is a value-added tax levied at all points in the supply chain, with credit allowed for any tax paid on input acquired for use in making the supply. It would apply to both goods and services in a comprehensive manner, with exemptions restricted to a minimum. In keeping with the federal structure of India, it is proposed that the GST will be levied concurrently by the central government (CGST) and the state government (SGST). It is expected that the base and other essential design features would be common between CGST and SGSTs for individual states. The inter-state supplies within India would attract an integrated GST (IGST), which is the aggregate of CGST and the SGST of the destination state. GST would be levied on the basis of the destination principle. Exports would be zero-rated, and imports would attract tax in the same manner as domestic goods and services. In addition to the IGST in respect of supply of goods, an additional tax of up to 1% has been proposed to be levied by the central government. The revenue from this tax is to be assigned to the origin states. This tax is proposed to be levied for the first two years or a longer period, as recommended by the GST Council. With GST, it is anticipated that the tax base will be comprehensive, as virtually all goods and services will be taxable, with minimum exemptions. GST would bring in a modern

tax system to ensure efficient and effective tax administration. It will bring in greater transparency and strengthen monitoring, thus making tax evasion difficult. While the process of implementation of GST unfolds in the next few months, it is important for industry to understand the impact and opportunities offered by this reform. GST will affect all industries, irrespective of the sector. It will impact the entire value chain of operations, namely procurement, manufacturing, distribution, warehousing, sales and pricing.
