Preparing Foreign Language Teachers for Next-Generation Education Lin, Chin-Hsi, Zhang, Dongbo, Zheng, Binbin, 2016-07-21 The growth of Information and Communication Technology (ICT) has changed the dynamics of education, as self-directed learning, especially on mobile devices, is as accessible as ever. Despite the near infinite amount of information available for students outside of school, the classroom remains the most critical aspect of student's growth. Teachers now play crucial roles in engaging ICT's full potential to create an environment of meaningful learning to develop students' critical thinking skills. *Preparing Foreign Language Teachers for Next-Generation Education* concerns itself with the integration and study of new technologies in foreign-language education. Featuring theoretical and empirical chapters related to the confluence of teacher-education, teacher cognition, and innovative technologies, it provides engaging insight into foreign-language teachers' perceptions and the influence of those perceptions. This publication is quintessential to foreign-language teachers, administrators, policy makers, students of education, programmers, and developers.

Teaching and Learning Chinese as a Foreign Language Janet Zhiqun Xing, 2006-01-01 This book provides a research-based account of how to teach and learn Chinese as a foreign language. In addition to the discussion of relevant second/foreign language research, this volume gives detailed information on ways to develop a pedagogical model that is

uniquely suited to teaching Chinese in five key areas: pronunciation (tones and pinyin), characters and words, sentences (when and why different sentence structures are used), discourse and pragmatic competence (coherence and genre), and cultural competence. Specially written for Chinese language teachers, student teachers and applied linguists, this is the first book written in English that systematically addresses all major aspects involved in teaching and learning Chinese as a foreign language. This book covers all the fundamental grammar elements in Chinese, explains their functions in discourse and communication, and explores different strategies for teaching and engaging students in learning the language.

Teaching and Learning Chinese as a Second or Foreign Language Ko-Yin Sung, 2019-10-23 *Teaching and Learning Chinese as a Second or Foreign Language*, edited by Ko-Yin Sung, addresses three emerging themes in the field of Chinese language teaching and learning. (1) Increasingly ubiquitous in all language learning and teaching, and for the learning of Chinese as a second language in particular, information and communication technology (ICT) can serve as an important and effective tool. Several chapters focus on how certain emerging ICT tools are applied in teaching and learning Chinese as a second language. (2) Due to China's economic and political influence, the number of students of all ages studying Chinese as a second language—but especially young learners—has increased in many parts of the world. Despite this, the research into teaching Chinese to young learners has lagged behind. Several chapters investigate young learners' motivations and effective methods for assisting them to master the Chinese language. (3) The writing system of the Chinese language poses many challenges for learners, especially those more familiar with alphabetical languages. In light of this difficulty in learning Chinese characters, some of the chapters identify effective teaching and learning strategies to master the Chinese language.

Performed Culture in Chinese Language Education Guangyan Chen, 2020-06-22 *Performed Culture in Chinese Language Education: A Culture-Based Approach for U.S. Collegiate Contexts* elaborates on a cultural awareness-oriented,

cultural performance-based, and cross-cultural communication-focused foreign language pedagogical paradigm—Performed Culture Approach — in the context of U.S. collegiate Chinese language education. Guangyan Chen draws on the data collected through questionnaires, comparisons between this pedagogy and mainstream pedagogical frameworks, and analyses of curricular development, lesson plans, and classroom discourses. Chen promotes the performed culture approach by delineating the theoretical framework of this pedagogy, reporting studies that empirically support cultural primacy in Chinese language education, and illustrating this pedagogy through analyses of a curricular structure, a lesson plan, and classroom discourses. Chen shows how this pedagogy addresses the gaps between the social need for global citizens and the insufficient integration of culture into foreign language education. The performed culture approach also addresses the overall drop in U.S. collegiate foreign language enrollment as this pedagogy connects foreign language programs to university missions and social needs.
