Neuropsychology for Coaches: Understanding the Basics Paul Brown, Virginia Brown, 2012-08-16 Neuroscience is revolutionising coaching: it helps us understand the biological basis of our behaviour. This includes the behaviour of the coach and the client. This practical and much needed book explains basic brain functioning and offers a guide to using this knowledge to advance our coaching and make our practice more effective. It builds extensively on the fact that we do now know that feelings underly all decision-making and focuses coaching on helping clients establish intelligent emotions as the basis of their own decision systems. Using a systemic model of emotions, energy and change, Paul Brown and Virginia Brown show coaches how to integrate the client's life experience into coaching and create change. This is a must read for all practising coaches. This book is scattered with insightful, thought-provoking and occasionally beautiful analogies and metaphors, which any reader would be hard-pressed not to be challenged by. The (unrelated) Browns absolutely illustrate the importance for coaches of having an understanding of how the brain works. Coaching at Work, March 2013 The OU coaching series always provides a reliable read for the coach and this is no exception ... The authors have kept the neuroscience refreshingly simple, choosing to focus on key evidence based principles of relevance to coaching. The International Journal of Mentoring and Coaching, Volume X Issue 2, December 2012 This book is a delicious feast of neuroscience. Bravo! Nancy Kline, President, Time To Think, UK "It's rare to find an accessible, engaging book that combines current neuropsychological theory with working examples for executive coaching. At last here is one that brings the two together seamlessly. Linda Aspey, Managing Director, Coaching for Leaders "At last, a book that embeds the practice of coaching into what we know of how the brain works - rather than one that tells you about the brain, then leaves the coach to work it out; or one that tells you about techniques, then adds in the brain information as something of a 'P.S'. Ann James, Executive Coach / Director, Thinking Space At long last, a rigorous book on neuropsychology that is both palatable and practically applicable for executive coaches. Dr Tara Swart, Neuroscientist, medical doctor and executive coach, Executive Performance Ltd. "Introducing the basic functioning of the brain, this book shows that humanity and high performance are indeed fraternal twins. A most useful guide!" Anette Prehn, MA in social science, brain-based executive coach (PCC), author of Play Your Brain In a world of psuedo-theory and airport quick reads, Professor Paul Brown and Virginia Brown offer something most refreshing: hard science married with the intimate relationship between coach and executive. Dr. Christina L. Lafferty, National Defense

University, Washington D.C, USA “Paul and Virginia Brown have done a great job in reviewing a lot of the burgeoning research and literature on Neuropsychology and making it accessible and useable by executive coaches in their work.” Peter Hawkins, Professor of Leadership at Henley Business School, founder and Chairman Emeritus of Bath Consultancy Group & co-founder of Centre for Supervision and Team Development, UK

Still Room for Humans Stan Schatt,2023-04-12 Don't let artificial intelligence and robots steal your job! Still Room for Humans is the only survival guide you need in order to stay employable in the future. This book will teach you how to: make yourself indispensable to your company, develop soft skills that robots and AI cannot match, collaborate with robots, retool your skills without going back to school. You will also learn which traditionally safe careers and entire industries will no longer be safe in the future because of artificial intelligence. The author details why the changes caused by disruptive technology will be far greater and take place far faster than in previous industrial revolutions. This book offers several ways to cope with the introduction of artificial intelligence and robotics to a company or organization as well as how to take advantage of the disruption likely to result from other new technologies including 3D printing, the Internet of Things, virtual reality, green technologies, Big Data, blockchain, and nanotechnology. Still Room for Humans spells out the types of jobs long associated with well-paying careers that should be avoided because they are most likely to be eliminated by artificial intelligence. It lists several new jobs that don't exist yet but will be created shortly as new technologies become more prevalent. Schatt provides career planning information as well as specific advice for those readers already employed.
