The Interest Group Connection Paul S. Herrnson, Ronald G. Shaiko, Clyde Wilcox, 2005 With Congress more partisan than ever, the White House eager to mobilize group support, the appropriations process in flux, and important interest group litigation in the courts, this volume confirms that navigating the complex world of inside-the-beltway politics is especially tricky. For interest groups, the name of the game is access. The Interest Group Connection's twenty chapters show how organized interests gain that access in Washington. Brief and accessible readings explore the connections between lobbyists' influence and American policymaking institutions and processes, as well as the crucial role interest groups play in organizing constituencies, protecting their rights, and giving them entrée into the political process. Given the current environment—new campaign finance laws, the prevalence of “527” committees, and a near-even electoral environment—the second edition provides an inside look at a changed political world.

Right-to-die Policies in the American States J. Donald Smith, 2002 Annotation Citing cases illustrating the contentious legal issues that modern medicine's ability to prolong the dying process has raised for end-of- life medical decision-making, Smith (political science, U. of North Texas) overviews the history of the US right-to-die movement, and the link between legislative and judicial policies. Applying event history analysis and his typology of policy innovations in a rare empirical study of the diffusion of judicial doctrines and policies, he seeks to explain the determinants of states' permissive policy adoption and reinvention via study of right- to-die policies of the late 1970s to 1994 relating to living will, proxy, and

surrogate laws/statutes. Policy salience was found to be a crucial variable. Appends a listing of right-to-die statutes by State, and methodological notes. Annotation c. Book News, Inc., Portland, OR (booknews.com).

A Caring Jurisprudence Susan M. Behuniak, 1999 In deciding the abortion and physician assisted suicide cases, a majority of the Justices of the United States Supreme Court drew on medical knowledge to inform their opinions while dismissing the distinctively different knowledge offered by patients. Following the legal norms derived from the ethic of justice, the Court's deference toward the Universal, Impartial, and Reasoned knowledge of the medical profession and its disregard of the Particular, Involved, and Emotional knowledge of patients seemed inevitable as well as justified. But was it? This book argues that it is both possible and proper to develop a jurisprudence capable of incorporating the knowledge of patients. Drawing on feminist scholarship, this book proposes a model for a caring jurisprudence that integrates the ethic of justice and the ethic of care to ensure that patients' knowledge is included in judicial decision making.
