Imaginarios sociales en los textos escolares de lengua castellana Margoth Guzmán Munar, 2017-10-01 Este libro ofrece un recorrido por las geografías invisibles, con lógicas, cánones, concepciones e imaginarios, por una parte, y acciones discursivas e iconográficas, por otra. Se partió del hecho de que el texto escolar es un elemento esencial que implica información de un área o disciplina, en un contexto y época determinada. Science Teaching and a New Teacher Culture Mario Roberto Quintanilla Gatica, Agustín Adúriz-Bravo, 2024-03-29 This edited volume discusses various epistemological positions about science teaching and the complex processes of understanding and learning in the classroom. Including discussions around Natural Sciences teacher training models, as well as the development of logics of reflection on practice based on critical and dialogic interpretative visions guiding higher level competency learning. It brings together contributions from researchers promoting a coherent and robust methodological analysis, theoretically based on the systematization of evidence in different contexts within Europe and Latin America. While supporting innovation in teacher training and science teaching, it offers specific contributions and suggestions for classroom work in the subjects of Physics, Chemistry and Biology. It includes didactic guidelines for experimental practices, for the evaluation of scientific learning, as well as for the use of epistemology and the history of science in teaching. In addition, it's considered an important contribution to the challenge of rebuilding science education programs as well as its correct implementation in schools and universities. This book is a translation of an original Spanish publication. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

La investigación educativa durante la pandemia : reflexiones desde el terreno Inés Dussel, Alicia Civera, 2025-03-26 Según la historiadora de la ciencia Lorraine Daston, la radical incertidumbre y novedad de la pandemia nos retrotrajo a un grado cero del empirismo, en el que hubo que movilizar todas las capacidades de observación y reflexión en un territorio que nos resultaba opaco e impredecible, cual calamares que nadan en su propia tinta. La investigación educativa no estuvo al margen de ese desafío: el cierre de los edificios escolares y el desplazamiento de las prácticas educativas a otros escenarios trajo modificaciones muy significativas, que muchos intentaron registrar y documentar tempranamente. En este libro reunimos 30 textos producidos por investigadores consolidados y en formación del Departamento de Investigaciones Educativas del Cinvestav, que tienen en común la preocupación por saber qué pasó con las prácticas escolares durante el largo cierre de edificios escolares que se decretó en respuesta a la pandemia por COVID-19. Si bien estamos empezando a conocer sus efectos, y aun sabiendo que éstos serán de largo alcance, estos escritos suman a la producción existente argumentos y perspectivas que permiten acercarse al análisis de cómo fue la experiencia escolar en la emergencia, dimensionar sus consecuencias y pensar la escuela a futuro. Muchos de ellos, aunque se revisaron posteriormente, fueron escritos durante el momento más álgido de la pandemia, entre 2021 y 2022, y como tales, dan cuenta de las experiencias de investigadoras, auxiliares de investigación y estudiantes de posgrado en investigaciones educativas que buscaban comprender lo que estaba sucediendo durante aquel momento. Esto tiene varias implicaciones para el propio campo de la investigación, cuyas

repercusiones también apenas empezamos a dimensionar.
