*The Rise and Fall of D.O.D.O.* Neal Stephenson, Nicole Galland, 2017-06-13 A New York Times Bestseller From bestselling author Neal Stephenson and critically acclaimed historical and contemporary commercial novelist Nicole Galland comes a captivating and complex near-future thriller combining history, science, magic, mystery, intrigue, and adventure that questions the very foundations of the modern world. When Melisande Stokes, an expert in linguistics and languages, accidentally meets military intelligence operator Tristan Lyons in a hallway at Harvard University, it is the beginning of a chain of events that will alter their lives and human history itself. The young man from a shadowy government entity approaches Mel, a low-level faculty member, with an incredible offer. The only condition: she must sign a nondisclosure agreement in return for the rather large sum of money. Tristan needs Mel to translate some very old documents, which, if authentic, are earth-shattering. They prove that magic actually existed and was practiced for centuries. But the arrival of the scientific revolution and the Age of Enlightenment weakened its power and endangered its practitioners. Magic stopped working altogether in 1851, at the time of the Great Exhibition at London's Crystal Palace—the world's fair celebrating the rise of industrial technology and commerce. Something about the modern world jams the frequencies used by magic, and it's up to Tristan to find out why. And so the Department of Diachronic Operations—D.O.D.O. —gets cracking on its real mission: to develop a device that can bring magic back, and send Diachronic Operatives back in time to keep it alive . . . and meddle with a little history at the same time. But while Tristan and his expanding operation master the science and build the technology, they overlook the mercurial—and treacherous—nature of the human heart. Written with the genius, complexity, and innovation that characterize all of Neal Stephenson's work and steeped with the down-to-earth warmth and humor of Nicole Galland's storytelling style, this exciting and vividly realized work of science fiction will make you believe in the impossible, and take you to places—and times—beyond imagining.

*Dodo* Neal Stephenson, Nicole Galland, 2017-06-01 You think you know how the world works? Think again. From bestselling author Neal Stephenson and critically acclaimed historical and contemporary commercial novelist Nicole Galland comes a captivating and complex near-future thriller that questions the very foundations of the modern world. From #1 New York Times bestselling author Neal Stephenson and critically acclaimed novelist Nicole Galland comes a captivating and complex near-future science fiction thriller that calls into question the very foundations of the modern world. A young man

from a shadowy government agency; an upstart academic at an Ivy League university - together they begin to uncover a secret that will change the world's view of the past, and determine the future of humanity.

**Contemporary Science Fiction and The Many-Worlds Interpretation of Quantum Mechanics** Jonathan P. Lewis, 2025-10-02 This book seeks to create a new means of interrogating the direction in which contemporary science fiction is progressing. In the late 1950s, Hugh Everett III suggested that there is no way to say that there are not as many versions of what we experience as reality as there are particles in the universe. This movement in contemporary science fiction serves as the foreground for the sense of loss and the need for sacrifice to set things 'right' after generations of technological praxis by the nations and communities that have traditionally driven science fiction-the Global North-that have damaged communities throughout the Global South. Colonialism and the drives for spheres of influence in the Cold War are now being met with the realities of such existential threats as global climate change. Narratives about the loss of control over time, reality, and human consciousness demonstrate the on-going ideological crises of faith in institutions like religion, capitalism, and education. It is the grief for lost utopian dreams for the future that drives this interest in Everett's 'Many-Worlds Interpretation of Quantum Mechanics' or 'MWI.'

**Revolting Recipes From History** Seren Charrington Hollins, 2023-01-31 Nothing causes a stir on social media platforms like a topical discussion on the latest food trend. Modern-day chefs like to think that they are creative and often claim to push boundaries of food creation, but if we want to explore real culinary creativity then we need to look to our ancestors. Writer and food historian, Seren Charrington-Hollins delves into the history of culinary experimentation to bring us some of the weirdest and most stomach-churning food delicacies to ever grace a dining table. She uncovers the rather gruesome history behind some everyday staples, uncovers bizarre and curious recipes, whilst casting a light on foods that have fallen from culinary grace, such as cows udders and tripe; showing that revulsion is just a matter of taste, times and perhaps knowledge. From pickled brains to headcheese, through to song birds and nymph's thighs, this book explores foods that have evoked disgust and delight in diners depending on culinary perspective. So pull up a chair, unfold your napkin and get ready for a highly entertaining and enlightening journey to explore what makes a recipe revolting? Be warned; you'll need a strong stomach and an open mind.

**The Dodo and the Solitaire** Jolyon C. Parish, 2012-12-03 This account of two extinct bird species offers "an amazing amount of history, references, facts, maps, and illustrations" (Library Journal). The Dodo and the Solitaire is the most comprehensive book to date about these two famously extinct birds. It contains all the known contemporary accounts and illustrations of the dodo and solitaire, covering their history after extinction and discussing their ecology, classification,

phylogenetic placement, and evolution. Both birds were large and flightless and lived on inhabited islands some five hundred miles east of Madagascar. The first recorded descriptions of the dodo were provided by Dutch sailors who encountered them in 1598—and within a century, the dodo was extinct. So quickly did the bird disappear that there is insufficient evidence to form an entirely accurate picture of its appearance and ecology, and the absence has led to much speculation. This extraordinary book pieces together the story of these two lost species from the fragments that have been left behind. “An up-to-date and comprehensive review of everything we know about the dodo and solitaire.” —Journal of Vertebrate Paleontology

*Dodo's Daughter* E. F. Benson, 2014-12-12 This early work by Edward Frederic Benson was originally published in 1914 and we are now republishing it with a brand new introductory biography. Dodo is one of the finest creations of E. F. Benson, a darling of the upper echelons of Edwardian society, published in 1893 when he was 26. The novel was fashionably controversial and quite popular, and Benson eventually expanded it into a trilogy (*Dodo's Daughter*, in 1914, and *Dodo Wonders*, in 1921). Edward Frederic Benson was born at Wellington College in Berkshire, England in 1867.
