The Field Theoretic Renormalization Group in Critical Behavior Theory and Stochastic Dynamics A.N. Vasil'ev,2004-04-28 This volume provides a general field-theoretical picture of critical phenomena and stochastic dynamics and helps readers develop a practical skill for calculations. This education on the practical skill sets this book apart: it is the first to give a full technical introduction to the field. Both general ideas and ...hard... calculations are present

Readers' Guide to Periodical Literature ,1916 Author and subject index to a selected list of periodicals not included in the Readers' guide, and to composite books.

Honiara Clive Moore,2022-05-13 Nahona`ara means 'facing the `ara', the place where the southeast winds meet the land just west of Point Cruz. Nahona`ara became Honiara, the capital city of Solomon Islands with a population of 160,000, the only significant urban centre in a nation of 721,000 people. Honiara: Village-City of Solomon Islands views Honiara in several ways: first as Tandai traditional land; then as coconut plantations between the 1880s and 1930s; within the British protectorate (1893–1978) and its Guadalcanal District; in the 1942–45 war years, which created the first urban settlement; in the directly post-war period until 1952 as the new capital of the protectorate, replacing Tulagi; and then as the headquarters of the Western Pacific High Commission (WPHC) between 1953 and 1974. Finally, in 1978, Honiara became the capital of the independent nation of Solomon Islands and the headquarters of Guadalcanal Province. The book argues that over decades there have been four and sometimes five changing and intersecting Honiara 'worlds' operating at one time, each of different social, economic and political significance. The importance of each group—British, Solomon Islanders, other Pacific Islanders, Asians, and more recently the 2003–17 presence of the Regional Assistance Mission to Solomon Islands (RAMSI)—has changed over time.

Owning the Street Amelia Thorpe,2020-12-15 How local, specific, and personal understandings about belonging, ownership, and agency intersect with law to shape the city. In *Owning the Street*, Amelia Thorpe examines everyday experiences of and feelings about property and belonging in contemporary cities. She grounds her account in an empirical

study of PARK(ing) Day, an annual event that reclaims street space from cars. A popular and highly recognizable example of DIY Urbanism, PARK(ing) Day has attracted considerable media attention, but has not yet been the subject of close scholarly examination. Focusing on the event's trajectories in San Francisco, Sydney, and Montreal, Thorpe addresses this gap, making use of extensive interview data, field work, and careful reflection to explore these tiny, temporary, and often transformative interventions. PARK(ing) Day is based on a creative interpretation of the property producible by paying a parking meter. Paying a meter, the event's organizers explained, amounts to taking out a lease on the space; while most "lessees" use that property to store a car, the space could be put to other uses—engaging politics (a free health clinic for migrant workers, a same sex wedding, a protest against fossil fuels) and play (a dance floor, giant Jenga, a pocket park). Through this novel rereading of everyday regulation, PARK(ing) Day provides an example of the connection between belief and action—a connection at the heart of Thorpe's argument. Thorpe examines ways in which local, personal, and materially grounded understandings about belonging, ownership, and agency intersect with law to shape the city. Her analysis offers insights into the ways in which citizens can shape the governance of urban space, particularly in contested environments. The book's foreword is by Davina Cooper, Research Professor in Law at King's College London.

Namibia International Monetary Fund. African Dept.,2019-09-13 This 2019 Article IV Consultation with Namibia discusses that with the temporary stimuli now ended, the economy is rebalancing while the government is implementing a significant fiscal consolidation. A likely slow recovery, the need for further fiscal adjustment to bring public debt to a sustainable path, persistent inequalities and structural impediments to growth, point to a challenging outlook. Immediate measures are needed to deliver the authorities' fiscal adjustment plans and bring public debt to a sustainable path. Policies should combine spending reductions and revenue increases that support long-term growth. Better targeting of cash transfers would protect the poor. Structural reforms are urgently needed to strengthen productivity and external competitiveness and boost long-term growth. Reforms should streamline business regulations, contain public sector wage dynamics, and reduce costs of key production inputs. Over time, it is important to remove non-tariff barriers to exports, foster the adoption of new technologies, and address shortages of skilled workers.

Cohomology for Quantum Groups via the Geometry of the Nullcone Christopher P. Bendel, Daniel K. Nakano, Brian J. Parshall, Cornelius Pillen, 2014-04-07 In general, little is known about the representation theory of quantum groups (resp., algebraic groups) when l (resp., p) is smaller than the Coxeter number h of the underlying root system. For example, Lusztig's conjecture concerning the characters of the rational irreducible G -modules stipulates that $p=h$. The main result in this paper provides a surprisingly uniform answer for the cohomology algebra $H^*(u, C)$ of the small quantum group.
