Oil Titans Valerie Marcel,2007-05-01 Ninety percent of the world's oil reserves are entrusted to state-owned companies. Originally created as political instruments, these so-called national oil companies (NOCs) face new demands amid today's dwindling oil reserves and simmering social pressures. Increasingly, state-owned oil firms particularly in the Middle East are having to balance the political demands of their governments with the need to be commercially competitive. In this groundbreaking new volume, Valerie Marcel draws on unprecedented access to the politicians, engineers; and businessmen directing five Middle Eastern state oil companies to shed light on one of the most secretive segments of the international oil industry. The author tells the stories of Saudi Aramco, Kuwait Petroleum Corp., the National Iranian Oil Co., Sonatrach of Algeria, and the Abu Dhabi National Oil Co. oil titans which together produce one quarter of the world's oil and hold half of the world's known oil and gas reserves. Dr. Marcel explains the complex bond between each state and its oil company, tracing the relationship's evolution from the politically charged days of foreign concessions to today's world of profit-driven decisionmaking. Drawn from over 120 interviews with company executives, middle managers, and oil-ministry officials, the author identifies a number of surprising new trends in these companies' strategy, and she paints a picture of their nascent sense of corporate identity. The book provides rare, up-to-date insight into how state-owned companies are striking a balance between their national mission and their commercial needs. The book also provides an insider's guide to these companies' unique culture. Executives and researchers in the region both inside and outside the oil industry will find it a valuable tool for understanding business in the Middle East.

The Future of Strategy Colin S. Gray,2015-10-12 Strategy is not a modern invention. It is an essential and enduring

feature of human history that is here to stay. In this original essay, Colin S. Gray, world-renowned scholar of strategic thought, discusses the meaning of strategy and its importance for politicians and the military as a means of achieving desired outcomes in complex, uncertain conditions. Drawing on a wide range of examples from the Great Peloponnesian War to the Second World War, Vietnam, and the ongoing conflicts in Iraq and Afghanistan, Gray ably shows how great military thinkers of the past and present have acted strategically in their various ideological, political, geographical and cultural contexts. Looking to the future, he argues that strategy will continue to provide a vital tool-kit for survival and security, but that the global threat posed by nuclear weapons remains an on-going challenge without obvious practical solutions. As Gray boldly asserts, there is no promised land ahead, only hard and dangerous times that will require us to master the theory and practice of strategy to secure our own future.

Public Policy and Political Ideas Dietmar Braun,Andreas Busch,1999 Approaches focusing on ideological and cognitive factors to analyse public policy have moved to centre-stage in political science. This book presents the great variety of theoretical and empirical research on the role of ideas which has emerged in recent years. How can you quantify ideas? Ideas are objective entities, not conducive to empirical research. The appeal of this book lies in the juxtaposition of a careful exploration and discussion of the theories behind the role of ideas in policy making and policy areas, and their detailed contextualisation. Through carefully researched contemporary examples offering single country studies, comparative studies and examples from the European Union, these 'ideas' show themselves to be a double-edged sword. Ideas are revealed as both a societal and political resource, crucial to both promoting and inhibiting policy change. A clear understanding of the impact and influences of ideas on the crucial process of policy is essential to all political scientists and analysts of public policy, as well as individuals interested in the effects on policy decisions.
