Producing Table Olives Stan Kailis, David Harris, 2007-02-01 Australia has the ideal conditions for growing and processing table olives. In a climate where the majority of table olives eaten by Australians are imported, real opportunities exist for a domestic table olive industry. Attention to quality and safety will ensure that Australian table olive producers are in a position to tackle and make inroads into the international export market. The aim of this manual is to provide olive growers and processors with internationally based guidelines for ensuring the quality and safety of processed table olives. This manual covers all aspects essential for the production of safe, nutritious and marketable table olives including site selection, recommended varieties, pest and disease control, primary and secondary processing, and quality and safety testing.

Pests of Crops in Warmer Climates and Their Control Dennis S. Hill, 2008-07-16 This is a textbook providing basic data about the crop pests and the damage they inflict throughout the tropics and sub-tropics. Each major pest is illustrated by either a line drawing or a photograph, and sometimes the damage can also be seen. A world distribution map is provided for each species. Control measures tend to be general rather than very specific. Most of the pests are insects and mites, but some nematodes, molluscs, birds and mammals are included.
