**Barbara R. Barry**

**The Philosopher's Stone** Barbara R. Barry, 2000 The Philosopher's Stone is a collection of case studies in compositional process; not so much about how the music was arrived at through its sketch stages, but more are construction of issues of form as the defining features of a genre, and structure as the individual realization in a particular work. Great musical movements and works are seen as highly creative solutions to problem-solving. The contexts of the works differ considerably. Some were written against the background of a specific precedent or model, as with Mozart's Haydn quartets via Haydn's Op. 33 set. In other cases, as with Beethoven's middle period style, the composer reconsiders a comprehensive range of implications about style and construction, of how, after earlier successes now outworn, to make a new and significant contribution to the genre without duplicating earlier solutions. The essays are grouped into three sections: on Beethoven studies, Mozart in retrospect, and nineteenth-century music. All the movements and works in these chapters pose in their different ways these issues of structural reinterpretation and re-formation, where the reworking of the form leads to a distinctive and higher level transformation

**Musicological Identities** Jacqueline Warwick, 2017-07-05 No music scholar has made as profound an impact on contemporary thought as Susan McClary, a central figure in what has been termed the 'new musicology'. In this volume seventeen distinguished scholars pay tribute to her work, with essays addressing three approaches to music that have characterized her own writings: reassessing music's role in identity formation, particularly regarding gender, sexuality, and race; exploring music's capacity to define and regulate perceptions and experiences of time; and advancing new modes of analysis more appropriate to those aspects and modes of musicking ignored by traditional methods. Contributors include, in overlapping categories, many fellow pioneers, current colleagues, and former students, and their essays, like McClary's own work, address a wide range of repertoires ranging from the established canon to a variety of popular genres. The collection represents the generational arrival of the 'new' musicology into full maturity, dividing fairly evenly between pre-eminent scholars of music and a group of younger scholars who have already made their mark in significant ways. But the collection is also, and fundamentally, interdisciplinary in nature, in active conversation with such fields as history, anthropology, philosophy, aesthetics, media studies, film music studies, dramatic criticism, women's studies, and cultural studies.

**Music in the Nineteenth Century** Richard Taruskin, 2006-08-14 In Music in the Nineteenth Century , Richard Taruskin

Major themes addressed in this book include the romantic transformation of opera, Franz Schubert and the German lied, the rise of virtuosos such as Paganini and Liszt, the twin giants of nineteenth-century opera, Richard Wagner and Giuseppe Verdi, the lyric dramas of Bizet and Puccini, and the revival of the symphony by Brahms.
