Estructuras del vehículo 3.ª edición ÁGUEDA CASADO, EDUARDO, GARCÍA JIMÉNEZ, JOSÉ LUIS, GÓMEZ MORALES, TOMÁS, MARTÍN NAVARRO, JOSÉ, 2016-01-01 El presente texto desarrolla los contenidos del módulo profesional de Estructuras del Vehículo, del Ciclo Formativo de grado superior correspondiente al título de Técnico Superior en Automoción, de la familia profesional de Transporte y Mantenimiento de Vehículos, establecido por el Real Decreto

1796/2008, de 3 de noviembre. Para su elaboración también se han tenido en cuenta las cualificaciones y las Unidades de Competencia del Catálogo Nacional de Cualificaciones Profesionales incluidas en dicho título. La obra, estructurada en trece unidades, está organizada en diversos bloques de contenidos, que se detallan a continuación. En un primer bloque se estudian los procedimientos habituales utilizados en la creación de un nuevo modelo, desde los cálculos preliminares de viabilidad del diseño hasta la producción en serie del vehículo. Además, se pone un énfasis especial en las diferentes fases del proceso de fabricación y en las nuevas técnicas empleadas en él. En un segundo bloque se analizan de forma detallada las características constructivas de la carrocería, para lo que se estudian cuestiones como las pruebas de choque (crash test), los conceptos aerodinámicos o los diferentes tipos de carrocerías, según su construcción. A continuación, en un tercer bloque, se examinan las principales características y propiedades de los materiales, tanto de los tradicionales como de los de última generación, para la construcción de carrocerías. También se incluye una descripción detallada de los ensayos y los tratamientos más frecuentes a los que son sometidos dichos materiales. En un cuarto bloque se analizan los sistemas de seguridad, tanto activa como pasiva, cuyo objetivo es crear condiciones óptimas de conducción, contribuir a evitar los accidentes y reducir al máximo las consecuencias de un choque. Finalmente, en el quinto y último bloque temático se repasan algunos conceptos relativos a los sistemas de fuerzas y los efectos de una colisión. Además, se describe el proceso de valoración de los daños provocados por esta, se detallan los pasos necesarios para la correcta reparación de la bancada, se explican las tensiones y las sobretensiones que se pueden dar en el transcurso de la reparación, se señalan las herramientas necesarias para diagnosticar y reparar los efectos de las colisiones en la estructura de un vehículo y se dedica una unidad completa a las reformas de importancia. Asimismo, las explicaciones, desarrolladas con un lenguaje claro y asequible, se combinan con gran número de fotografías, esquemas y figuras que las ilustran y apoyan para una mejor comprensión del texto. De igual modo, al final de cada unidad se incluyen variadas actividades finales que, en forma de cuestiones y actividades propuestas, permiten al alumno repasar y afianzar sus conocimientos. Todo ello otorga a este manual un enorme valor didáctico.

Tecnología Industrial II. 2º Bachillerato FIDALGO SÁNCHEZ, JOSÉ ANTONIO, FERNÁNDEZ PÉREZ, MANUEL RAMÓN, NOEMÍ FERNÁNDEZ, FERNÁNDEZ, 2016-01-01 Los contenidos de este libro han sido desarrollados según lo establecido en el RD 1105/2014, de 26 de diciembre, (BOE 3 de enero 2015) por el que se establece el currículo básico de la Educación Secundaria Obligatoria y del Bachillerato. Si la Ciencia busca el qué, el cómo y el porqué de los hechos, sean naturales o artificiales, la Tecnología está llamada al saber cómo hacemos las cosas, por qué las hacemos y cuál será su utilidad en favor del bienestar de las gentes, de su progreso social y económico y de la convivencia entre los pueblos. La Tecnología, pues, abraza en una sola finalidad tres objetivos fundamentales: saber hacer, saber por qué se hace y saber para que se hace. La propia esencia conceptual de esta materia le concede una posición privilegiada para formar ciudadanos

autónomos en un mundo global con la capacidad, disponiendo de los actuales medios informáticos de comunicación, para resolver problemas con la máxima inmediatez y amplísimos componentes de innovación. Teniendo muy en cuenta estas finalidades, el presente libro ha sido diseñado con los siguientes criterios formativos: • Proporcionar un aprendizaje contextualizado que relacione la evolución conceptual de la Ciencia con los avances tecnológicos actuales. • Establecer relaciones entre Ciencia y Tecnología como medios de progreso social y económico. • Potenciar la capacidad de comunicación entre las gentes y entre los pueblos como factor de convivencia internacional. • Fomentar un espíritu crítico positivo, exigiendo rigor y precisión en el enfoque y resolución de problemas que, en su dinamismo, plantean continuamente la sociedad y la técnica. Atendiendo a tales finalidades sociales y formativas, se han seguido estos procesos de enfoque: • Uso de un lenguaje serio y científico, árido en ocasiones, lo suficientemente asequible a un alumnado ya a las puertas de la Universidad y de las Escuelas Técnicas. • Presentación de ejemplos “de vida diaria” con toda su carga de aplicabilidad a situaciones técnicas concretas. • Exposición razonada de teorías, leyes y modelos aplicables en cada caso a situaciones de investigación tecnológica y de aplicabilidad técnica. • Propuesta de cuestiones, ejercicios y problemas, explicados y resueltos, que ayuden al alumnado a una mejor comprensión práctica de lo explicado. • Propuesta de ejercicios, cuestiones y problemas sin resolver, pero con solución indicada, para que el alumnado evalúe personalmente su aprendizaje. • Fomentar hábitos de respeto hacia el medio ambiente, de ahorro energético y de intercomunicación mediante procesos informáticos. Tal como se apunta en las disposiciones oficiales respecto a la programación de esta asignatura, su fin último es “proporcionar una visión razonada desde el punto de vista científico-tecnológico sobre la necesidad de construir una sociedad sostenible en la que la racionalización y el uso de las energías, las clásicas y las nuevas, contribuyan a crear sociedades más justas e igualitarias, formadas por ciudadanos con pensamiento crítico propio de lo que acontece a su alrededor”.
