Emerging Asian Economies and MNCs Strategies Robert Taylor, Bernadette Andreosso-O'Callaghan, 2016-06-24 Analysing the role of multinational investors in emerging Asian economies and the implications for regional economic integration, this astute study examines the increasing role being played by Asian countries in the global economy. Encompassing a large number of diverse manufacturing and service sectors, this book highlights the cultural and strategic challenges faced by multinational investors in the region in which they invest. It shows that despite high rates of economic growth in Asian countries presenting multinational traders and investors with unparalleled market opportunities, there have been only tentative moves towards regional economic integration. Areas such as trade facilitation, uniform customs clearance, removal of non-tariff barriers and labour deployment issues are yet to be adequately addressed.

Its up-to-date findings will be invaluable to those involved in management, production networks and corporate strategy.

Innovating at the Edge Tim Jones, 2012-05-04 All organizations who are looking to improve performance through embracing new ideas, work in new ways, create new products and services, challenge the status quo or redefine their existing business environment have much to gain from this book. 'Innovating at the Edge' not only provides readers with an informed understanding of the latest developments in innovation practice but also presents them with the bigger picture.

This enables them to determine how to build these advances into overall development of their own innovation capabilities and how to capitalize on the benefits available to them. Today as the new economy is brought into line with the old, increasing fragmentation of a global economy drives change across multiple sectors. Organizations operating at the leading edge of the innovation paradigm are adopting a whole new set of approaches to help them redefine the present and build the future. Learn how companies such as Egg, Dyson and Smint are redefining their markets, how organizations such as ARM and Qualcomm are deriving their soaring revenues wholly from licensing, and how firms such as Nokia and Nike are constantly evolving their product portfolios and associated value propositions. These real-life examples provide key lessons for all involved in creating and delivering new businesses, products and services. Readers will understand where all these strands fit within an overall context of innovation evolution, and recognise that the inter-relationships between strategy, process and organization are the key enablers for achieving innovation improvements. Firms can then grasp and appreciate what they need to do in order to emulate these innovation leaders operating at the edge of contemporary practice.

Pop Goes Korea Mark James Russell, 2012-10-20 Mr. Russell's book is the first by a non-Korean to explain the rise of Korea's entertainment industries....the book could hardly be more approachable.—Wall Street Journal “For a country that traditionally received culture, especially from China but also from Japan and the United States, South Korea finds itself at a turning point in its new role as exporter.”—The New York Times From kim chee to kim chic! South Korea came from nowhere in the 1990s to become one of the biggest producers of pop content (movies, music, comic books, TV dramas, online gaming) in Asia—and the West. Why? Who's behind it? Mark James Russell tells an exciting tale of rapid growth and wild success marked by an uncanny knack for moving just one step ahead of changing technologies (such as music downloads and Internet comics) that have created new consumer markets around the world. Among the media pioneers profiled in this book is film director Kang Je-gyu, maker of Korea's first blockbuster film *Shiri*; Lee Su-man, who went from folk singer to computer

programmer to creator of Korea's biggest music label; and Nelson Shin, who rose from North Korea to the top of the animation business. Full of fresh analysis, engaging reportage, and insightful insider anecdotes, Pop Goes Korea explores the hallyu (the Korean Wave) hitting the world's shores in the new century. Mark James Russell has been living in Korea since 1996. His articles about Korean and Asian cultures have appeared in Newsweek, The New York Times, International Herald-Tribune, and many other publications. He is currently the Korea/Japan Bureau Chief for Asian Movie Week magazine.

The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical Robert Siegel, 2021-07-27 A Top Financial Times Recommended Business Book, The Brains and Brawn Company is the grounded, clear-sighted guide you need to blend digital and traditional business functions for long-term competitive advantage Business leaders are continually told they need to embrace digital disruption wholeheartedly to thrive in the 21st Century. Legacy companies, we hear, are all doomed to fail unless they double down on the latest digital innovations, and disruptors are

ordained to take over the world. Digital innovation is the answer to everything. False! Nothing in life or business is ever that simple. In *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical*, venture capitalist and Stanford Business School lecturer Robert Siegel brings the digital innovation conversation back down to earth. He shows that, while important, digital is only part of the answer—and it's never the only answer. The vast majority of successful leaders from both incumbents and disruptors focus as much on things like logistics, manufacturing, and distribution as they do on digital innovation. In fact, many established companies are successfully countering young upstarts in other creative ways, and many new organizations are learning from their older brethren. Siegel shows how to create lasting profits and growth in the smartest way possible: by creating a solid partnership between digital innovation and traditional business operations—in other words, by marrying brains and brawn. He lays out the core competencies that today's industry leaders have mastered and explains how: Charles Schwab uses cutting-edge analytics to better serve millions of investors without violating its original code of values. Align Technology transformed orthodontia by developing creative new business models along with new products. Kaiser Permanente taps into the power of empathy to improve patient satisfaction while controlling costs. Instacart balances ownership and partnerships to balance the needs of four key constituencies. Target, Best Buy, and Home Depot found different ways to blend the best aspects of physical retail with innovative e-commerce. Desktop Metal is innovating high-volume yet affordable production methods that can revolutionize manufacturing. Filled with original research and case studies of Daimler, 23andMe, Instacart, AB InBev, Google, and many other companies, *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical* provides practical, proven insights and advice for bridging the gulf between digital vs. physical, disruptor vs. incumbent, startup world vs. Fortune 500, and tech culture vs. industrial culture. *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical* provides everything you need to set your company apart from your competitors in real and measurable ways—and take the lead in your industry for years to come.
