Technical Writing Phillip A. Laplante, 2018-07-27 Technical Writing: A Practical Guide for Engineers, Scientists, and Nontechnical Professionals, Second Edition enables readers to write, edit, and publish materials of a technical nature, including books, articles, reports, and electronic media. Written by a renowned engineer and widely published technical author, this guide complements traditional writer's reference manuals on technical writing through presentation of first-hand examples that help readers understand practical considerations in writing and producing technical content. These examples illustrate how a publication originates as well as various challenges and solutions. The second edition contains new material in every chapter including new topics, additional examples, insights, tips and tricks, new vignettes and more exercises. Appendices have been added for writing checklists and writing samples. The references and glossary have been updated and expanded. In addition, a focus on writing for the nontechnical persons working in the technology world and the nonnative English speaker has been incorporated. Written in an informal, conversational style, unlike traditional college writing texts, the book also contains many interesting vignettes and personal stories to add interest to otherwise stodgy lessons.

Supervision Modules to Support Educators in Collaborative Teaching Kathryn L. Lubniewski,Debbie F. Cosgrove,Theresa Y. Robinson,2019-08-01 The classroom teacher in the 21st century is no longer a solo practitioner. What can school leaders use to facilitate on-going, job-embedded, intentionally focused professional development that is unique to the collective needs of teacher pairs and teams as they work together? What can teacher preparation supervisors provide to support teacher candidates and cooperating teachers as they plan, teach, and assess student learning in a co-teaching context? Supervision Modules to Support Educators in Collaborative Teaching is a research-based supervisory handbook designed to promote on-going teacher reflection and development in collaborative teaching contexts. It is a tool for school leaders and teacher preparation supervisors to use for in-service and pre-service teacher development at all grade levels PK-12. The handbook's many resources provide practical guidance for meaningful teacher development that is field-based, relevant to daily teacher work, and artfully presented to build collaboration among teachers as they reflect and learn together. Unique to this approach is that school leaders and supervisors learn alongside teachers and teacher candidates as relevant topics are explored. The handbook contains a collection of eighteen interactive, activity-based modules that focus on topical content knowledge and productive teaching practices. Embedded in the modules are pair and team activities that address problem-solving, dimensions of collaborative teaching, communication and collaboration skill development, understanding of diversity, cultural responsiveness, and shared understanding of evidence-based practices. This resource is easy to use. Once school leaders and supervisors select a module topic to address the needs of a particular pair or team, they are supported with foundational knowledge of the most current research on the topic, discussion questions about the topic, suggestions of productive practices, questions to deepen personal and group understanding, reflective professional growth activities, critical analysis of teaching scenarios, and monitoring, follow-up, and goal setting strategies. Modules can be used in any order and include reproducible materials for pairs and teams to use as they collaborate and grow professionally.

Principles & Practice of Psychiatric Nursing Gail Wiscarz Stuart,Sandra J. Sundeen,1995 Principles and Practice of Psychiatric Nursing, 8th Edition provides comprehensive coverage of psychiatric nursing. Beginning with fundamental coverage of all key psychiatric nursing principles, it goes on to address the complete continuum of care - including mental health promotion and illness prevention, crisis intervention, and psychiatric rehabilitation and recovery. The book then applies psychiatric nursing principles to specific clinical disorders based on adaptive-maladaptive coping responses, the six-step nursing process, and DSM-IV-TR and NANDA diagnoses. Subsequent chapters describe various modalities of treatment (psychopharmacology, somatic therapies, cognitive and behavioral therapies, managing aggressive behavior, and more), hospital-based and community-based care, and treatment of special populations.
