

# Uts Library Public Access

**RS Peters**

**Library Programs and Services** G. Edward Evans, Margaret Zarnosky Saponaro, Holland Christie, Carol Sinwell, 2015-06-30 Covering every essential topic ranging from circulation and literacy instruction to reference and security, this benchmark text provides an up-to-date, broadly based view of library public service and its functions. Supplying essential, foundational reading for students of library public services as well as an up-to-date overview for practitioners who wish to refresh their knowledge or acquaint themselves with a new area of responsibility, this book's broad and solid coverage will benefit anyone concerned with developing or maintaining the public face of the library. A revision and expansion of Libraries Unlimited's Introduction to Library Public Services: Seventh Edition, this edition has new chapters covering such topics as e-resources, collections, print and other media, and facilities and funding. Additionally, every chapter has been substantially updated and reorganized to better reflect the role of technology in library services today. The book begins with background information on public services in libraries and an analysis of the library's public service philosophy. Then, the authors delve into staffing and assessment of services, moving logically to major functional areas of public services—reference, instruction, document delivery, circulation and reserves, collections, programming, safety and security issues, and facilities and funding. Real-life anecdotes from public, academic, and school libraries illustrate principles and concepts throughout the book. For each topic, the authors detail its role and philosophy, and offer key points to remember, references, and lists for further reading.

**The Experimental Book Object** Sami Sjöberg, Mikko Keskinen, Arja Karhumaa, 2023-11-30 The Experimental Book Object shows why and how books matter in the 21st century. Digital and audio platforms are commonplace, and other fields of art beyond literature have increasingly embraced books and publication as their medium of choice. Nevertheless, the manifold book object persists and continues to inspire various types of experimentation. This volume sets forth an unprecedented approach where literary and media theory are entangled with design practitioners' artistic research and process descriptions. By probing the paradigm of the codex, this collection of essays focuses on historical and contemporary experimentation that has challenged what books are and could be from the perspectives of materiality, mediation, and visual and typographic design. Investigations into less-studied areas and cases of performativity demonstrate what experimental books do by interacting with their systemic and cultural environments. The volume offers a multifaceted and

multidisciplinary view of the book object, the book design and publishing processes, and their significance in the digital age.

*Social Media Strategies for Dynamic Library Service Development* Tella, Adeyinka, 2014-12-31 As social technologies continue to evolve, it is apparent that librarians and their clientele would benefit through participation in the digital social world. While there are benefits to implementing these technologies, many libraries also face challenges in the integration and usage of social media. *Social Media Strategies for Dynamic Library Service Development* discusses the integration of digital social networking into library practices. Highlighting the advantages and challenges faced by libraries in the application of social media, this publication is a critical reference source for professionals and researchers working within the fields of library and information science, as well as practitioners and executives interested in the utilization of social technologies in relation to knowledge management and organizational development.

*The Politics of Libraries and Librarianship* V. Kerry Smith, 2008-09-30 This book covers aspects of the political environment which surrounds and engages libraries and their librarians. It includes anecdotes on the role of the political sphere in the business of library associations. - Provides recent stories and real examples of: The various political contexts under which libraries operate - Why it is important to be politically aware - How political climates influence decision making for libraries

**Emerging Library Technologies** Ida Arlene Joiner, 2018-08-09 *Emerging Library Technologies*, is written for librarians/information professionals, teachers, administrators, researchers, undergraduate/graduate students, and others who are interested in learning about some of the most popular emerging technologies in the media today such as artificial intelligence, robotics, drones, driverless vehicles, big data, virtual/augmented reality, 3D printing, and wearable technologies. This valuable resource shows how they can be used in libraries and resource centers, and how to get stakeholder buy in for implementing these technologies. - Covers innovative insights on how these emerging technologies can be used in all types libraries and resource centers. - Discusses how to get key stakeholders on board before implementing emerging technologies including a checklist to complete before presenting your technology proposal to senior management. - Brings unique perspective for assisting people who will be displaced by these emerging technologies. - Includes resources at the end of every chapter on keeping abreast and building expertise on the emerging technology topic. - Contains tips on how professionals can forge strategic relationships to collaborate on emerging technology projects such as preparing students for STEM and STEAM careers. - Poses engaging questions for further discussion after each chapter. - Includes comprehensive glossary at the end of each chapter.

*User Studies for Digital Library Development* Milena Dobрева, Andy O'Dwyer, Pierluigi Feliciati, 2012-06-22 This landmark text captures a global cross-section of leading voices and provides a clear and coherent overview of the user studies domain and user issues in digital libraries. As the information environment becomes increasingly electronic, digital libraries have

proliferated, but the focus has often been on innovations in technology and not the user. Although user needs have become a popular concept, in practice the users are rarely consulted in the development of services. Research and analysis of users is essential to fine-tune the content and approach of digital libraries to the diverging requirements and expectations of incredibly varied communities and to ensure libraries are effective, accessible and sustainable in the long term. Key topics include: • what is the place of user studies in digital libraries and what are the basic user study methods? • explaining user-centric studies, information behaviour and user experience studies • exploring user-study methods such as surveys, questionnaires, expert evaluation methods, eye tracking, deep log analysis, personae and ethnographic studies • critical issues around user studies such as evaluation of digital libraries, digital preservation, social media, the shift to mobile devices and ethics • user studies in specific types of institutions: libraries, archives, museums, audiovisual collections and art collections • the most popular questions and what to do next. Readership: Information professionals involved in supporting, developing or designing digital library services, researchers wanting to address the user dimension in their work and students on LIS and computer science courses who want to understand the importance of the user in information services.

**Access to Public Sector Information** Brian F. Fitzgerald,2010 On the back of the growing capacity of networked digital information technologies to process and visualise large amounts of information in a timely, efficient and user-driven manner, we have seen an increasing demand for better access to and re-use of public sector information. The story is not a new one. Share knowledge and together we can do great things; limit access and we reduce the potential for opportunity. The two volumes of this book seek to explain and analyse the global shift in the way we manage public sector information. In doing so they collect and present papers, reports and submissions on the topic by the leading authors and institutions from across the world. These provide people tasked with mapping out and implementing information policy with reference material and practical guidance. Volume 2 presents a selection of the key reports and submissions that have been published over the last few years. The volumes are sold separately and as a set.
