Problem Solving with the Private Sector Daniel E. Bromberg, 2016-03-31 Problem Solving with the Private Sector presents advice and solutions for fruitful government-business alliances from the perspective of everyday public management. With a focus on job training, economic development, regulation, and finance and innovation, each chapter discusses a traditional tool of government presented in a practical and applied manner, as well as the implementation of the tool with clear examples. Content-rich case studies on a wide range of policy issues, including regulatory policy, natural resources, manufacturing, financial services, and health care highlight opportunities for government and business to collaborate to pursue the public good. This book offers current and future public managers possible solutions to complex problems for effective government-business alliances in a range of settings. It is essential reading for all those studying public management, public administration, and public policy.

The Education Invasion Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of “informational text” instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping “reform” of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an absolute game-changer in public education,” yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation’s schools? Who benefits? And how can citizens regain local self-governance in education, so their children’s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

Society and the Environment Michael Carolan, 2018-05-15 Society and the Environment examines today's environmental controversies within a socio-organizational context. After outlining the contours of 'pragmatic environmentalism', Carolan considers the pressures that exist where ecology and society collide, such as population growth and its associated increased demands for food and energy. He also investigates how various ecological issues, such as climate change, are affecting our very own personal health. Finally, he drills into the social/structural dynamics (including political economy and the international legal system) that create ongoing momentum for environmental ills. This interdisciplinary text features a three-part structure in each chapter that covers 'fast facts' about the issue at hand, examines its wide-ranging implications, and offers balanced consideration of possible real-world solutions. New to this edition are 'Movement Matters' boxes, which showcase grassroots movements that have affected legislation. Discussion questions and key terms enhance the text's usefulness, making Society and the Environment the perfect learning tool for courses on environmental sociology.

Exodus and Deuteronomy Athalya Brenner, 2012-06-15 The Texts @ Contexts series gathers scholarly voices from diverse contexts and social locations to bring new or unfamiliar facets of biblical texts to light. Exodus and Deuteronomy focuses attention on two books of the Torah that share themes of journey and of diverse experiences in or upon the land; the echoes of the exodus across time, space, and culture; of different understandings of (male and female) leadership; and of the promise, and problem, posed by various aspects of biblical law. These essays de-center the often homogeneous first-world orientation of much biblical scholarship and open up new possibilities for discovery.

Muslim Citizens in the West Samina Yasmeen, Nina Markovic, 2016-04-29 Drawing upon original case studies spanning North America, Europe and Australia, Muslim Citizens in the West explores how Muslims have been both the excluded and the excluders within the wider societies in which they live. The book extends debates on the inclusion and exclusion of Muslim minorities beyond ideas of marginalisation to show that, while there have undoubtedly been increased incidences of Islamophobia since September 2001, some Muslim groups have played their own part in separating themselves from the wider society. The cases examined show how these tendencies span geographical, ethnic and gender divides and can be encouraged by a combination of international and national developments prompting some groups to identify wider society as the 'other'. Muslim and non-Muslim scholars and practitioners in political science, social work, history and law also highlight positive outcomes in terms of Muslim activism with relationship to their respective countries and suggest ways in which increasing tensions felt, perceived or assumed can be eased and greater emphasis given to the role Muslims can play in shaping their place in the wider communities where they live.

Environmental and Natural Resource Economics Frank A. Ward, 2006 Environmental and natural resources have dramatically influenced consumer decisions, personal lifestyles, corporate planning and public policy over recent years. This

text introduces the economic theories and methods of analysis economists use to approach these issues.

The Routledge Handbook of Post-Prohibition Cannabis Research Dominic Corva, Joshua Meisel, 2021-09-06 The place of cannabis in global drug prohibition is in crisis, opening up new directions for socially engaged cannabis research. The Routledge Handbook of Post-Prohibition Cannabis Research invites readers to explore new landscapes of cannabis research under conditions of legalization with, not after, prohibition: post-prohibition. The chapters are organized into five multidisciplinary sections: Governance, Public Health, Markets and Society, Ecology and the Environment, and Culture and Social Change. Case studies from the United States, Uruguay, Morocco, and the United Kingdom show readers alternative ways of thinking about human-cannabis relationships that move beyond questions of legality and illegality. Representing a cross-section of cannabis scholarship, the contributors provide readers with critical perspectives on legalization that are not based upon orthodoxies of prohibition. While legalization signals a global shift in the legitimacy of cannabis research, this collection identifies openings for academics, policy makers, and the public interested in ending the drug war, as well as a way to address broader social problems evident in the age of neoliberal governance within which prohibition has been entangled.

Turkey Centre for Economic Policy Research (Great Britain),2005-06-20 This volume analyzes the economic challenges confronting Turkey in its quest to accede to the European Union (EU). It focuses on the extent to which Turkey is ready to join the Single Market; comply with the EU's body of economic regulations and directives, the Acquis Communautaire; and meet the Maastricht criteria for fiscal, monetary, and exchange rate policies. This book also provides an assessment of Turkey's national program to meet the accession requirements. It describes briefly what Turkey needs to achieve on the economic policy front to satisfy the conditions for accession, the progress to date, and the likely consequences of implementing the full body of EU requirements. Although the focus is on the specific situation of Turkey, the subject will be of value to all researchers with an interest in the challenges of deeper integration through regional agreements. --Résumé de l'éditeur.
