Transportation Engineering and Planning - Volume I Tschangho John Kim,2009-04-15 Transportation Engineering and Planning is a component of Encyclopedia of Physical Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Transportation Engineering and Planning presents the readers with diverse sources of information and knowledge about transportation engineering and planning, to help ensure that informed actions are compatible with sustainable world development. It begins with a historical analysis of transportation development, since an understanding of how transportation technologies developed is a prerequisite for understanding issues involved in transportation systems, and for developing sound policy analysis. Next, the various chapters analyze transportation problems, discusses the state of public policy addressing those problems, considers the causes and effects of changes in demand for mobility as the socio-economic environment changes, and then deals with the fundamental questions related to transportation. These two volumes are aimed at the following a wide spectrum of audiences from the merely curious to those seeking in-depth knowledge: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Port Privatisation James Reveley,Malcolm T. Tull,2008-01-01 'This book is an excellent reference on the state of port reform throughout the Asia-Pacific region. While there have been a number of articles in recent years on port reform in Australia, China, Hong Kong, Korea and Singapore, much of the Asia-Pacific region has been overlooked. This book not only rectifies this gap by providing much needed insight into the situation in India, Japan, Malaysia, and New Zealand, while also consolidating the work already completed elsewhere. With the rise of Asia as the world's most important shipping and port market, the editors are to be commended for bringing new voices to the discussion and developing a strong contribution to the port reform and port governance literature.' - Mary R. Brooks, Dalhousie University, Canada
