Translation and Localization Project Management Keiran J. Dunne, Elena S. Dunne, 2011 Over the past three decades, translation has evolved from a profession practiced largely by individuals to a cottage industry model and finally to a formally recognized industrial sector that is project-based, heavily outsourced and that encompasses a wide range of services in addition to translation. As projects have grown in size, scope and complexity, and as project teams have become increasingly distributed across geographies, time zones, languages and cultures, formalized project management has emerged as both a business requirement and a critical success factor for language service providers. In recognition of these developments, this volume examines the application of project management concepts, tools and techniques to translation and localization projects. The contributors are seasoned practitioners and scholars who offer insights into the central role of project management in the language industry today and discuss best-practice approaches to the adaptation of generic project management knowledge, skills, tools and techniques for translation and localization projects.

Introduction to Translation and Interpreting Studies Aline Ferreira, John W. Schwieter, 2022-09-27 A unique and balanced combination of translation and interpreting studies, edited and written by leading voices in the fields In *Introduction to Translation and Interpreting Studies*, accomplished scholars Aline Ferreira and John W. Schwieter have brought together a detailed and comprehensive introductory-level textbook covering the essential aspects of translation and interpreting studies. Through chapters authored by leading voices in the field, this book covers topics of theoretical and conceptual relevance—such as the history of the development of the field and methods for understanding gender, society, and culture as aspects of the role of the interpreter—as well as critical topics in the application of theory to real world practice. Beginning with an authoritative treatment of the theoretical developments that have defined the field since the early 1970s, this textbook first describes the influential work of such figures as Jakobson, Holmes, and Toury, thus ensuring students develop a thorough understanding of the history and theoretical underpinnings of the fields of translation and interpreting studies. The text then begins to introduce grounded discussions of interpreting in specialized fields such as legal and healthcare interpreting and sign language translation. Learning is reinforced throughout the text through pedagogical features including reflection questions, highlighted key words, further readings, and chapter objectives. Instructors will also have access to companion website with PowerPoint slides and multiple-choice questions to support classroom application. Truly a unique work in translation and interpreting studies, this essential new textbook offers: A thorough introduction to the fields of translation and interpreting with discussion of applications to interdisciplinary topics Explorations of translation machines and technology, including their history and recent trends Practical discussions of culture, gender, and society in the context of translation and interpreting studies, as well as training and pedagogical issues in translation and interpreting A concise examination of translation process research and methods, including the mental processes and actions that people take while translating Complementary web materials including PowerPoint slides and practice questions Ideal for advanced undergraduate and graduate students in programs in such as linguistics, language studies, and communications, or for those who plan to work in translation and/or interpreting, *Introduction to Translation and Interpreting Studies* will earn a place in the libraries of anyone interested in a reader-friendly translation and interpreting resource.

Localizing Apps Johann Roturier, 2015-05-08 The software industry has undergone rapid development since the beginning of the twenty-first century. These changes have had a profound impact on translators who, due to the evolving nature of digital content, are under increasing pressure to adapt their ways of working. *Localizing Apps* looks at these challenges by focusing on the localization of software applications, or apps. In each of the five core chapters, Johann Roturier examines: The role of translation and other linguistic activities in adapting software to the needs of different cultures (localization); The procedures required to prepare source content before it gets localized (internationalization); The measures taken by software companies to guarantee the quality and success of a localized app. With practical tasks, suggestions for further reading and

concise chapter summaries, *Localizing Apps* takes a comprehensive look at the transformation processes and tools used by the software industry today. This text is essential reading for students, researchers and translators working in the area of translation and creative digital media.

A Qualitative Approach to Translation Studies Elisa Calvo, Elena de la Cova, 2023-12-22 This collection invites readers to explore innovative or underexploited ways of working qualitatively with what in Translation Studies may be termed as elusive constructs. The volume adopts a functionalist approach to focus on one such concept, namely the notion of translation problem, using case studies to illustrate how a significant elusive construct can be addressed empirically. It explores different qualitative research methodologies which, although well established in other fields, are yet to be extensively used in TS but which may nevertheless prove to be of significance for future studies as they allow elusive concepts typically found in TS to be worked with more coherently. Chapters are structured around two core ideas: first, the qualitative, systematic analysis of source text content with emphasis on the detection of translation problems as a means of creating efficient frameworks for coherent decision-making from a functional perspective; and secondly, the practical process of stereotyping and profiling specific problems within different contexts, content types or services to help identify, manage and resolve them in a number of settings, from research to professional translator training and assessment environments. This book will be of interest to scholars in translation studies, particularly those with an interest in qualitative approaches.
