Closing the Achievement Gap in America Dr. Jesse J. Hargrove, 2011-07-22 This book reveals how this new generation of learners, the Deuce Millennium Generation (DMG), began their journey from Pre-kindergarten at the start of the new millennium in fall 2001 to their middle school years. This generation has endured the societal effects of the post 9/11 years for almost ten years, yet the author asserts that they will be the best and the brightest. He contends that the recent educational training delivered by highly-skilled Teacher Training Institutions will contribute to an increase in students' knowledge and performance on high stakes measures of assessments over the years. The book acknowledges that accreditation is a key factor that plays an important role in the student achievement process. This book is a primary source for understanding how the achievement gap in America can be closed. The author contends that this scholarly work is the first comprehensive book written on the subject. He engages the audiences in issues that are thought-provoking and makes the case that the historical, social, and public education processes have a profound impact on the learning outcomes of students in American schools. It is easy to understand why the author puts a name and a face on this new generation of learners. The book reveals a clear picture concerning who this generation is and what effects will occur to them, if the signs of the times are not reversed. This book should be read and used by all Teacher Training Institutions, teachers, parents, and decision-makers who are interested in Closing the Achievement Gap in America. The gap issue is a national imperative!

Educational Research for Social Justice Alistair Ross, 2021-06-22 This book presents a series of analyses of educational policies - largely in the UK, but some also in Europe - researched by a team of social scientists who share a commitment to social justice and equity in education. We explore what social justice means, in educational policy and practice, and how it impacts on our understanding of both 'educational science' and 'the public good'. Using a social constructivist approach, the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy, and of the way this term turns educational policies towards treating learning as a competition, in which many young people are constructed as 'losers'. We discuss how many terms in education are essentialised and have specific, and different, meanings for particular social groups, and how this may create issues in both quantitative survey methods and in determining what is 'the public good'. We discuss social justice across a range of intersecting social characteristics, including social class, ethnicity and gender, as they are applied across the educational policy spectrum, from early years to postgraduate education. We examine

the ways that young people construct their identities, and the implications of this for understanding the 'public good' in educational practice. We consider the responsibilities of educational researchers to acknowledge these issues, and offer examples of researching with such a commitment. We conclude by considering how educational policy might contribute to a socially just, equitable and inclusive public good.

Recognizing Microaggressions Nadra Nittle, 2018-12-15 A classmate questions how you got into college. A neighbor clutches her purse when you pass. A job interviewer compliments your English. Every day these experiences leave people of color scratching their heads, and before long, they're impossible to ignore. After all, the neighbor doesn't clutch her purse when whites approach. So, what gives? Is she racist? Making that call is hard when people aren't obviously bigots, but their behavior has a name: racial microaggressions. These slights are indeed real; you're not imagining things. With this book, readers will learn what microaggressions are, why they're bad news, and how to handle them.

Inclusive Strategies for Teaching Students with High Incidence Disabilities Martin Henley, 2024-12-30 This book is the first holistic, practical resource for current and future teachers who have students with mild and moderate disabilities, bringing together all aspects of successfully teaching students under one cover with jargon-free, easy-to-understand, practical information, including RTI, IEPs, home-school collaboration and communication, legal issues, inclusion, intrinsic motivation, proactive classroom management, UDL, practical curriculum adaptations and strategies, PBIS, and more.

See Government Grow Gareth Davies, 2007 An award-winning historian's pathbreaking book uses federal education policy from the Great Society to Reagan's New Morning to demonstrate how innovative policies become entrenched irrespective of who occupies the White House.

When School Reform Goes Wrong Nel Noddings, 2007-08-27 In this much-needed volume, Nel Noddings uses her extensive experience at every level of schooling to challenge the No Child Left Behind Act (NCLB). Noddings invites readers to think critically about the ideas underlying NCLB, the reform movement that shaped it, and the processes it has put into play. She considers such questions as, Is money the answer to raising test scores? Are failing schools mainly attended by poor children, or are all of our schools failing? Do all students need courses in advanced mathematics, physics, and chemistry? Should special education students be expected to meet the same standards as regular students? Does one standard curriculum serve the needs and interests of all students? Does our current system of schooling undermine the democracy it should support? This dynamic book: Challenges almost every provision in the No Child Left Behind Act. Argues for educationally justifiable interpretations of equality, accountability, standards, testing, and choice. Suggests an educationally and morally acceptable way of employing an enriched form of tracking to meet the needs of all students.

Considers what is at stake for our children, schools, and democracy and offers suggestions for fresh thinking.

The 2000s Bob Batchelor,2009 Welcome to Pop Culture 2.0. In the 2000s, Generation eXposure, emerged from the marriage of new technology and the nation's obsession with celebrity. Social media technology, such as MySpace, YouTube, Facebook, and countless blogs, gave everyman a voice and a public persona that they could share with friends across the street or around the world. Suddenly, it was not enough to imitate Britney Spears or Paris Hilton, technology gave everyone a platform to launch their own 15 minutes of fame. The fixation on self and celebrity acted as a diversion from more serious challenges the nation faced, including President George W. Bush's War on Terror. The wars overseas sharply divided the country, after a moment of national unity after the terrorist attacks on 9/11, which took away one of the world's most recognizable buildings. The era witnessed interest rates dropping to historic lows, but later subprime became one of the most

searched terms on Google as the nation teetered on recession. Big was in like never before and suddenly people nationwide could buy or build their own McMansion-a slice of the American dream. While supersized homes and fast food meals became commonplace, the electronics and transportation advances proved that good things came in increasingly smaller packages. Apple's iPod reinvented how people interacted with music, hybrids changed thoughts on fuel efficiency as a gallon of gas topped \$3. Cell phones usage ballooned in our always on society, while physically shrinking to the size of a deck of cards. Yes, me-centric Pop Culture 2.0, which the pundits predicted would some day arrive, burst onto the scene and ultimately transformed the way we interact with one another and the world around us. Chapters inside the latest volume in the American Popular Culture Through History series explore various aspects of popular culture, including advertising, literature, leisure activities, music visual arts, and travel. Supplemental resources include a timeline of important events, cost comparisons, and an extensive bibliography for further reading.
