**Intellectual Developments in Greece and China** Raymond W.K. Lau,2020-03-17 This book presents a study of historical sociology and a comparison of ancient Greece's and ancient China's intellectual developments. It provides a special

historical-sociological theoretical model, allowing the exploration of how and why Greece's and China's developments followed two different trajectories. This model allows a superior explanation of this phenomenon than previous studies, which all employ the outdated methodology of mono-causal determinism. This work takes the critique of Eurocentric views in comparative studies, pioneered by Joseph Needham in *Science and Civilization in China*, to a new level of excellence, because, in addition to presenting new empirical findings and dispelling previous misunderstandings, it also provides a sophisticated theoretical analysis. It will appeal to scholars and students in the fields of comparative intellectual studies, sinology, historical sociology, classics, and intellectual history.
