English Accents Christiana Payne, 2018-01-18 In the century following the foundation of the Royal Academy in 1768, British art had an international reputation: prints spread knowledge of the work of British artists around the globe, and it was widely seen as the product of a modern, commercial society, and much admired by artists as diverse as Goya in Spain, Delacroix in France, and Bierstadt in America. In recent years, scholars working on this period have become increasingly aware of the international context of their subject, but there has been no systematic analysis of the reception of British art abroad. This collection of essays looks at the uses made of the paintings of Reynolds, Hogarth, Lawrence and their contemporaries on the continent of Europe, and in the colonies and ex-colonies of Australia and America. The authors go beyond the simple issue of 'influence' to consider how ideas and artistic conventions originating in the British Isles were adapted, appropriated or resisted in these new environments. In the process, some surprising views of British art emerge, demonstrating how a multi-faceted view from the outside can correct and enrich the narrative produced within a national school, and revealing some of the important connections that are obscured when art is studied, as it so often is, within narrow national boundaries.

Women in Archaeology Sandra L. López Varela, 2023-07-12 This book tells the story of women in archaeology worldwide and their dedication to advancing knowledge and human understanding. In their own voices, they present themselves as archaeologists working in academia or the private and public sector across 33 countries. The chapters in this volume reconstruct the history of archaeology while honoring those female scholars and their pivotal research who are no longer with us. Many scholars in this volume fiercely explore non-traditional research areas in archaeology. The chapters bear witness to their valuable and unique contributions to reconstructing the past through innovative theoretical and methodological approaches. In doing so, they share the inherent difficulties of practicing archaeology, not only because they, too, are mothers, sisters, and wives but also because of the context in which they are writing. This volume may interest

researchers in archaeology, history of science, gender studies, and feminist theory. Chapter 11 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Architektonika Gabriele Knapstein, Matilda Felix, 2013 The exhibition 'Architektonika' at the Hamburger Bahnhof - Museum für Gegenwart - Berlin displayed sculptural works, paintings, photographs and films that relate to architecture in a variety of ways. The thematic presentation sought to illustrate how differently artists have approached the interface between art and architecture since the 1960s. Besides the design, they also reflect on the social implications of buildings and urban spaces. This publication considers the exhibition from various viewpoints, whilst focusing on individual aspects of this multifaceted topic--Front cover flap.
