

Simple And Usable

Paul G. Nixon,Vassiliki N. Koutrakou,Rajash Rawal

Simple and Usable Web, Mobile, and Interaction Design Giles Colborne,2017-12-19 In a chaotic world, we all crave simplicity. We don't want to waste time reconfiguring our smartphones, fumbling over digital printers, or plodding through online forms while deadlines bear down on us. We want technology that works. Yet the harder we try to create simple user experiences, the more we tie ourselves up in knots. We are undermined by demands to cram in more features, or lured into approaches that turn out to be more complex than ever. Simplicity is a discipline that can be learned. This book shows you how-with humor, powerful examples, quotes, and case studies. This new edition has been updated to provide fresh advice for teams struggling to satisfy the conflicting demands of their stakeholders; it addresses important trends in technology; and it shows how four simple rules of simplicity can be applied to new and emerging types of interaction. Design, Specification and Verification of Interactive Systems '98 Panos Markopoulos,Peter Johnson,2013-11-11 Does modelling, formal or otherwise, play a role in designing interactive systems? A proliferation of interactive devices and technologies is used in an ever increasing diversity of contexts and combinations in professional and every-day life. This development poses a significant challenge to modelling approaches used for the design of interactive systems. The papers in this volume discuss a range of modelling approaches, the representations they use, the strengths and weaknesses of their associated specification and analysis techniques and their role in supporting the design of interactive systems.

Understanding E-Government in Europe Paul G. Nixon,Vassiliki N. Koutrakou,Rajash Rawal,2010-01-04 This volume critically explores the contentions in the emerging debate surrounding new media technologies and the extent to which they are challenging traditional political and government models. Examining a range of citizen/government interactions which together form e-government in different contexts, this book assesses the potential of new media technologies to facilitate new institutional patterns for governance and participation, as experienced primarily, but not only, across Europe. Analysing a range of challenges spanning from those of a technological and conceptual nature to those of a more political and legal nature, the authors scrutinise the central policies at governmental and organisational levels and consider the following questions: Is society driving or responding to e-government and is it ready to cope with it? What implications does e-government have for the power/democracy relationship? Is the technology right for e-government? What is needed to ensure government services are delivered optimally? How is e-government perceived and is it trusted? How are the sensitive issues of identity, privacy and social inclusion dealt with? How are management and safety dealt with when one considers issues such as activism, cyberterrorism, biometrics, and new implications for international relations? This comprehensive text will be of interest to students and scholars of public policy, politics, media and communication studies, sociology, law and European studies. It will also offer insights of relevance to practitioners and policy-makers in regional, national, and transnational governance, reform and innovation.
