Go Wild! (Slide Surprise) Matthew Morgan, 2018-09-26 Who is hiding in the jungle? Slide the tab to make your favorite animals appear! Slide Surprise is a vibrant new series of board books using innovative sliding mechanisms to create fun, interactive stories about subjects young children identify with. Follow the friendly monkey through the jungle and to the ocean to find animal friends hiding in the scenes. Slide the tab in the page and out pops a toucan from the branches of a tree, a baby elephant from behind her mommy's knees, a lion from his hiding spot in the grass, chicks resting in their nest, a fish swimming in the water, and, on the last page--Where did our happy monkey tour guide go? Slide...surprise! He's hiding in the leaves, fast asleep! This colorful, interactive board book helps children develop hand-eye coordination, build cognitive skills, and learn language skills. Irresistible to curious little hands, babies and toddlers will delight in sliding the creatures in and out of hiding, again and again.

Studio Thinking from the Start Jillian Hogan, Lois Hetland, Diane B. Jaquith, Ellen Winner, 2018 Students of all ages can learn to think like artists! Studio Thinking: The Real Benefits of Visual Arts Education changed the conversation about quality arts education. Now this new publication shows how the eight Studio Habits of Mind and four Studio Structures can be used successfully with younger students in a range of school environments. The book includes classroom examples, visual artist exemplars, templates for talking about works of art, mini-posters, and more. "If we want our students to think, if we want them to learn, we must engage them in habits of the mind that cultivate their innate abilities." —From the Foreword by David P. Nelson, president, MassArt "Studio Thinking from the Start is a needed addition to teacher resources for improving the

quality of elementary art education.” —Olivia Gude, School of the Art Institute of Chicago “Starting young with studio thinking is a fabulous idea supported by this fine resource. After all, studio thinking thrives on art but applies to everything.”

Showcasing Science Martin Weiss,2025-10-01 Teylers Museum was founded in 1784 and soon thereafter became one of

the most important centres of Dutch science. The Museum's first director, Martinus van Marum, famously had the world's largest electrostatic generator built and set up in Haarlem. This subsequently became the most prominent item in the Museum's world-class, publicly accessible, and constantly growing collections. These comprised scientific instruments, mineralogical and palaeontological specimens, prints, drawings, paintings, and coins. Van Marum's successors continued to uphold the institution's prestige and use the collections for research purposes, while it was increasingly perceived as an art museum by the public. In the early twentieth century, the Nobel Prize laureate Hendrik Antoon Lorentz was appointed head of the scientific instrument collection and conducted experiments on the Museum's premises. Showcasing Science: A History of Teylers Museum in the Nineteenth Century charts the history of Teylers Museum from its inception until Lorentz' tenure. From the vantage point of the Museum's scientific instrument collection, this book gives an analysis of the changing public role of Teylers Museum over the course of the nineteenth century.
