

Albert Speer Jr Architecture

Kathleen Kuiper Manager, Arts and Culture

Albert Speer Léon Krier, 2013 First published in 1985 to an acute and critical reception, *Albert Speer: Architecture 1932-1942* is a lucid, wide-ranging study of an important neoclassical architect. Yet it is simultaneously much more: a philosophical rumination on art and politics, good and evil.

The Road to Sleeping Dragon Michael Meyer, 2017-10-10 From the highly praised author of *The Last Days of Old Beijing*, a brilliant portrait of China today and a memoir of coming of age in a country in transition. In 1995, at the age of twenty-three, Michael Meyer joined the Peace Corps and, after rejecting offers to go to seven other countries, was sent to a tiny town in Sichuan. Knowing nothing about China, or even how to use chopsticks, Meyer wrote Chinese words up and down his arms so he could hold conversations, and, per a Communist dean's orders, jumped into teaching his students about the Enlightenment, the stock market, and Beatles lyrics. Soon he realized his Chinese counterparts were just as bewildered by China's changes as he was. Thus began an impassioned immersion into Chinese life. With humor and insight, Meyer puts readers in his novice shoes, introducing a fascinating cast of characters while winding across the length and breadth of his adopted country --from a terrifying bus attack on arrival, to remote Xinjiang and Tibet, into Beijing's backstreets and his future wife's Manchurian family, and headlong into efforts to protect China's vanishing heritage at places like Sleeping Dragon, the world's largest panda preserve. In the last book of his China trilogy, Meyer tells a story both deeply personal and universal, as he gains greater -- if never complete -- assurance, capturing what it feels like to learn a language, culture and history from the ground up. Both funny and relatable, *The Road to Sleeping Dragon* is essential reading for anyone interested in China's history, and how daily life plays out there today.

The Culture of China Kathleen Kuiper Manager, Arts and Culture, 2010-08-15 Presents various aspects of the culture of China, discussing its language, writing system, religions, music, art, architecture, and diverse ethnic groups.

Looking for Chinese National Spirit in Architecture and Urban Design Shenshen Tian, 2004

Rising China and Its Postmodern Fate Charles Horner, 2009 As China debates its past, how will it define its future? In this work, Horner offers a different interpretation of how China's changed view of its modern historical experience has also changed China's understanding of its long intellectual and cultural tradition.

The Two Worlds of Albert Speer Henry Thomas King (Jr.), Bettina Elles, 1997-10-16 This book offers a close 'inside'

account of the psyche of Albert Speer, one of the most powerful men in the Third Reich and a close personal associate of Hitler. King, a Nuremberg prosecutor, offers firsthand observations based upon his encounter with Speer as a defendant at Nuremberg, as well as his 35 year relationship with Speer which ended with the latter's death in 1981.

Children of Nazis Tania Crasnianski, 2018-02-06 The Fascinating Story of Eight Children of Third Reich Leaders and their Journey from Descendants of Heroes to Descendants of Criminals In 1940, the German sons and daughters of great Nazi dignitaries Himmler, Göring, Hess, Frank, Bormann, Höss, Speer, and Mengele were children of privilege at four, five, or ten years old, surrounded by affectionate, all-powerful parents. Although innocent and unaware of what was happening at the time, they eventually discovered the extent of their father's occupations: These men—their fathers who were capable of loving their children and receiving love in return—were leaders of the Third Reich, and would later be convicted as monstrous war criminals. For these children, the German defeat was an earth-shattering source of family rupture, the end of opulence, and the jarring discovery of Hitler's atrocities. How did the offspring of these leaders deal with the aftermath of the war and the skeletons that would haunt them forever? Some chose to disown their past. Others did not. Some condemned their fathers; others worshiped them unconditionally to the end. In this enlightening book, which has been translated into eleven languages, Tania Crasnianski examines the responsibility of eight descendants of Nazi notables, caught somewhere between stigmatization, worship, and amnesia. By tracing the unique experiences of these children, she probes at the relationship between them and their fathers and examines the idea of how responsibility for the fault is continually borne by the descendants.

Grand Illusion Karen Fiss, 2009 Franco-German cultural exchange reached its height at the 1937 Paris World's Fair, where the Third Reich worked to promote an illusion of friendship between the two countries. Through the prism of this decisive event, *Grand Illusion* examines the overlooked relationships among Nazi elites and French intellectuals. Their interaction, Karen Fiss argues, profoundly influenced cultural production and normalized aspects of fascist ideology in 1930s France, laying the groundwork for the country's eventual collaboration with its German occupiers. Tracing related developments across fine arts, film, architecture, and mass pageantry, Fiss illuminates the role of National Socialist propaganda in the French decision to ignore Hitler's war preparations and pursue an untenable policy of appeasement. France's receptiveness toward Nazi culture, Fiss contends, was rooted in its troubled identity and deep-seated insecurities. With their government in crisis, French intellectuals from both the left and the right demanded a new national culture that could rival those of the totalitarian states. By examining how this cultural exchange shifted toward political collaboration,

Grand Illusion casts new light on the power of art to influence history.

Death by Design Eric Katz, 2006 Through a selection of primary and secondary sources, Death by Design examines the uses of technology during the Holocaust and the specific ways in which scientists, architects, medical professionals, businessmen, and engineers participated in the planning and operation of the concentration and extermination camps that were the foundation of the 'final solution'. The book discusses the overriding intellectual, ethical, and philosophical implications of the Nazi's use of science and technology in their killing operations.
