**Australia's Defence** Peter Dean, Brendan Taylor, Stephan Frühling, 2014-07-18 Almost half a century ago, the Australian National University's TB Millar penned a seminal book on Australian defence policy in the lead up to the Vietnam War. Today, Australia's defence forces are returning from long conflicts overseas, while the rise of China and the economic integration in the Indo-Pacific presents a complex mix of challenges and opportunities. Drawing inspiration from Millar's original volume, *Australia's Defence: Towards a New Era?* brings together leading experts to examine the domestic and international context of Australia's defence policy, Australian strategy and the size and state of our armed forces. As the country heads towards a new era, this book provides an in-depth overview and key insights into the past, present and future of Australia's defence.

**Pacific Regional Order** Dave Peebles, 2005-10-01 New policies are needed if the Pacific is to realise its potential as a peaceful, prosperous region, where the Pacific's citizens enjoy good standards of health and education, long lives and many opportunities; where Pacific economic growth is constantly improving, driven by environmentally sustainable service industries; where coups, civil conflict and the dangers of failed states have been relegated to the past; where the Pacific is integrated into the wider region, and is an influential voice in world affairs. Argues that Pacific countries including Australia, need to embrace regional integration to realise this vision. The book sets out a comprehensive plan for realising a Pacific regional community dedicated to promoting sustainable development, security, human rights, the rule of law and democracy.

**War Operations** Bob Breen, 2016-07-15 *The Good Neighbour* explores the Australian government's efforts to support peace in the Pacific Islands from 1980 to 2006. It tells the story of the deployment of Australian diplomatic, military and policing resources at a time when neighbouring governments were under pressure from political violence and civil unrest. The main focus of this volume is Australian peacemaking and peacekeeping in response to the Bougainville Crisis, a secessionist rebellion that began in late 1988 with the sabotage of a major mining operation. Following a signed peace agreement in 2001, the crisis finally ended in December 2005, under the auspices of the United Nations. During this time Australia's involvement shifted from behind-the-scenes peacemaking, to armed peacekeeping intervention, and finally to a longer-term unarmed regional peacekeeping operation. Granted full access to all relevant government files, Bob Breen recounts the Australian story from decisions made in Canberra to the planning and conduct of operations.

**Australian Contributions to Strategic and Military Geography** Stuart Pearson, Jane L. Holloway, Richard Thackway, 2018-03-08 Drawing from military geography's spatial roots, its embrace of dynamic systems, and integration of human and biophysical environments, this book helps in understanding the value of analyzing patterns, processes and systems, and cross-scale and multi-disciplinary ways of acting in a complex world, while making the case for a resurgence of strategic and military geography in Australia. Here, leading experts demonstrate that geography retains its relevance in clarifying the scale and dynamics of defense activities in assessments of the international, regional, national, and site impacts of changes in physical, cyber and human geographies. The cases presented show Australia contributing to a growing strategic and military geography.

*Strategic Cultures and Security Policies in the Asia-Pacific* Jeffrey S. Lantis, 2016-03-22 This book shows how one of the most powerful tools of security studies—strategic culture—illuminates the origins and implications of the Asia-Pacific region's difficult issues, from the rise of China and the American pivot, to the shifting calculations of many other actors. Strategic culture sometimes challenges and always enriches prevailing neo-realist presumptions about the region. It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between neoclassical realist and constructivist approaches. The case studies in this book survey the role of strategic culture in the behaviors of Australia, China, Japan, the Philippines, South Korea and the United States. They show the contrast between structural expectations and cultural predispositions, as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political-military cultures to influence security policies. The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies, as well as how culture may impact the potential for future conflict or cooperation in the region. The result is a body of work that helps deepen our

understanding of strategic cultures in the Asia-Pacific in comparative perspective and enrich security studies. This book was published as a special issue of Contemporary Security Policy.

*Defence Science and Innovation* Martin Callinan, Alan Gray, Australian Strategic Policy Institute, 2015 Australia's neighbours in the Asia-Pacific are building high-quality science, technology, engineering and mathematics research capacities and infrastructure. As a consequence, Australia's technological advantage in the defence domain is eroding. To recover that advantage, our policy should be to make the most of the knowledge, capability and capacity in Australia's civilian science and innovation sector. This special report analyses current and prospective Australian science, industry and defence science and innovation policy.
