Bullies and Trolls Taylor Morris,2019-07-15 If you want to know where kids are hanging out these days, think virtual. From how to shut down a troll to what the law and school policies offer, readers find out how to silence the bullies on the other side of that black mirror.

Handbook of Research on Cyberbullying and Online Harassment in the Workplace Ramos Salazar, Leslie,2020-10-23 Given users' heavy reliance of modern communication technologies such as mobile and tablet devices, laptops, computers, and social media networks, workplace cyberbullying and online harassment have become escalating problems around the world. Organizations of all sizes and sectors (public and private) may encounter workplace cyberbullying within and outside the boundaries of physical offices. Workplace cyberbullying affects the entire company, as victims suffer from psychological trauma and mental health issues that can lead to anxiety and depression, which, in turn, can cause absenteeism, job turnover, and retaliation. Thus, businesses must develop effective strategies to prevent and resolve such issues from becoming too large to manage. The Handbook of Research on Cyberbullying and Online Harassment in the Workplace provides in-depth research that explores the theoretical and practical measures of managing bullying behaviors within an organization as well as the intervention strategies that should be employed. The book takes a look at bullying behavior across a variety of industries, including government and educational institutions, and examines social and legislative issues, policies and legal cases, the impact of online harassment and disruption of business processes and organizational culture, and prevention techniques. Featuring coverage on a broad range of topics such as sexual abuse and trolling, this book is ideally designed for business managers and executives, human resource managers, practitioners, policymakers, academicians, researchers, and students.

Using Social Emotional Learning to Prevent School Violence Allison Paolini,2022-06-15 Using Social Emotional Learning to Prevent School Violence is an essential resource that seeks to close the existing gap in literature on ways to mitigate school violence, as well as to advocate for the integration of social emotional learning in schools. In an effort to create culturally responsive, student-centered, and secure school environments, this book outlines strategies that highlight the

importance of collaboration between critical stakeholders in identifying and mitigating bullying, assisting students struggling with relationship building skills, grief and loss, and anger; particularly those that demonstrate the need for power and control or the desire for retaliation. Mental health issues are also taken into consideration. Proactive responses and best practices are exemplified in order to equip struggling students with resources that foster their well-being and success. Dr. Paolini draws upon extensive research in her depiction of school violence in America's education system and designs lesson plans and activities that address and align with each of the social emotional learning core competencies for both elementary and secondary school counselors. This book will be of interest to critical stakeholders in P-12 settings as well as those in higher education, particularly as a resource for graduate students training to become transformative school counselors.

Particularly rampant among adolescents, these harmful actions must be mitigated in order to safeguard the mental health and physical safety of users. *The Research Anthology on Combating Cyber-Aggression and Online Negativity* discusses the research behind cyber-aggression and cyber bullying, as well as methods to predict and prevent online negativity. It presents policy, technological, and human intervention practices against cyber-aggression. Covering topics such as media literacy, demographic variables, and workplace cyberbullying, this major reference work is a critical resource for students and educators of higher education, libraries, social media administrators, government organizations, K-12 teachers, computer scientists, sociologists, psychologists, human resource managers, researchers, and academicians.
