Handbook of the International Political Economy of Governance Anthony Payne, Nicola Phillips, 2014-04-25 Since the 1990s many of the assumptions that anchored the study of governance in international political economy (IPE) have been shaken loose. Reflecting on the intriguing and important processes of change that have occurred, and are occurring, Profess

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang, 2020-11-09 The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city—its built environment—evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic, piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

Quick Hits for Educating Citizens James L. Perry, Steven Jones, 2006-06-06 [This volume] makes the statement that democracy matters, that engagement in the community is essential to maintain our democratic values, and that civic engagement plays a significant role in educating our citizens. -- Sharon Hamilton and Robert Orr, Directors, Indiana University Faculty Colloquium on Excellence in Teaching (FACET) Quick Hits for Educating Citizens presents university faculty and administrators with ideas and strategies for integrating civic education into university curricula. Fifty-eight succinct essays from across the disciplines offer successful models of curriculum-based civic education activities and strategies for engaging students outside the classroom. Reflecting best practices as well as individual approaches to

educating students for citizenship, this is an outstanding resource for university faculty in every discipline, as well as administrators and students in schools of education.

World in Transition 4 German Advisory Council On Global Change (Wbgu),2013-09-13 At the start of the 21st century, fighting poverty and protecting the environment are two of the most urgent challenges facing the international community. Environmental changes will jeopardize people's survival to an even greater extent in the future, and will hit the poor hardest. To meet these challenges, it will be essential to breathe new life into the partnership between industrialized and developing countries. It will be equally essential to combine poverty reduction with environmental protection in an integrated policy structure spanning all levels from local to global. In this report, the German Advisory Council on Global Change (WBGU) shows that global environmental policy is a prerequisite for global poverty reduction. WBGU analyses the relevant policy processes and delivers recommendations charting the way forward. 'With its interdisciplinary approach, providing a complex and systematic analysis of the poverty-environment nexus, WBGU's latest report breaks new ground. Indira Gandhi's old, convenient maxim was 'Poverty is the biggest polluter'. Put forward at the 1972 UN Conference on the Human Environment in Stockholm, it has been sorely misused ever since to override environmental precaution and prioritize economic development strategies instead. The new WBGU report maps out a way to shape a coherent environment and development policy. This report revitalizes the Rio spirit and gives it a robust scientific base'. Prof Dr Ernst Ulrich von Weizsäcker, Member of the German Bundestag (MdB)

But Will It Fly? Iver P. Cooper,2025-09-17 Conventional aircraft today are propelled by the action of propellers or jets, and powered by the internal combustion of petroleum fuels in piston, turboprop or jet engines. But other power sources, powerplants, and propulsion devices, for airships as well as aircraft, have been proposed and even experimented with over the last few centuries. The power sources considered include human muscles, steam, batteries, nuclear reactors, and hydrogen fuel; and the propulsion devices include sails, oars, flapping wings, rockets and cycloidal propellers. This meticulously researched book presents the history of these unconventional aerial power and propulsion systems, explains the underlying science and technology behind them, and assesses the crucial question of practicality.
