Theodore A. Stern, Oliver Freudenreich, Felicia A. Smith, Gregory L. Fricchione, Jerrold F. Rosenbaum

Down Syndrome Jean-Adolphe Rondal, PhD, Juan Perera, 2006-08-04 People with Down Syndrome show a specific developmental profile with strengths in social understanding and visual learning and memory, and more difficulties with motor processes, speech and language, and auditory-vocal short-term memory. It is important that parents, practitioners and teachers know this and adapt interventions and educational approaches to take account of this particular profile. This is the only book to date that explains the developmental profile of people with Down Syndrome from its many different angles. It covers a range of perspectives, including the biology, psychology, speech and language, health care, and social competence of both children and adults with Down Syndrome. All the information is gathered and placed in the context of the neuro-genetic science that is developing around this area.

Diseases and Disorders in Infancy and Early Childhood Janette B. Benson, Marshall M. Haith, 2009-09-14 Currently, there are two types of pediatric disorder books available: high level technical books geared toward pediatric specialists, and self-help books for parents. The technical books cover diagnosis and treatment, while the self-help books cover general problems, are single authored, and speak little to the research of any given disorder. This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development that cover the research information on common disorders in age 0-3. Topics include those most typically occurring, making them of great interest to both specialists and nonspecialists. Disorders and dysfunction of a variety of types are discussed, whether cognitive, social, emotional, or physiological. Coverage includes asthma, allergies, colic, bedwetting, diarrhea, genetic disorders, SIDS and learning disabilities, and provides an essential, affordable reference for researchers in developmental psychology, as well as allied health fields. - Written at a level for general understanding—allows for easy and quick grasp of information to both specialists and non specialists alike - Covers disorders across many systems (neurological, immunological etc) providing quicker access to info that would normally be dispersed across a wide literature - Written by research experts ensuring accuracy that is sometimes lacking in non-specialist books - Covers disorders, dysfunctions, and abnormal development in one place saving time looking at multiple sources for these related items

Mental Retardation Susan C. Hayes, Robert A. Hayes, 1982 One in ten Australians is born with a disability. By the year 2000, one in two will suffer a chronic disease or disability which is likely to affect his or her functioning in some significant area of life - education, employment, independent living, marriage, giving birth to and raising children, managing business and financial affairs, entering into contracts, making a will, protecting oneself and one's property. If a person has a mental handicap, how does this affect his or her legal rights? How much responsibility is retained, for making decisions about one's life? What decisions can other people make on behalf of the mentally handicapped individual? What happens when a retarded person attains the age of majority? Complementing these issues of personal autonomy are the issues facing governments, administrators, and policy-makers - such as the provision of free, appropriate education for disabled students; government funding of institutions and projects for disabled people; standards of service; and the enforcement of rights. Almost everyone will be touched by mental retardation at some time - because of a retarded family member, or through working in the field, or

by way of a community project for disabled people. This book breaks new ground, by explaining (in easily understood terminology) the legal rights, and status of retarded people, and relating these to the questions of what is best for retarded people and for society as a whole -- Back cover.
