Antoni van Leeuwenhoek Lesley Robertson, Jantien Backer, Claud Biemans, Joop van Doorn, Klaas Krab, Willem Reijnders, Henk Smit, Peter Willemsen, 2016-05-09 In *Antoni van Leeuwenhoek*, Master of the Minuscule, the Father of Microbiology is presented in the context of his time, relationships and the Dutch Golden Age. Although he lacked an academic education, he dedicated his life to investigating the microscopic world using handmade, single-lensed microscopes and magnifiers. An expert observer, he planned experiments and designed equipment to test his theories. His pioneering discoveries included blood cells, protozoa, bacteria and spermatozoa, and resulted in an international reputation among the scientific and upper classes of 17th and 18th century Europe, aided by his Fellowship of the Royal Society of London. This lavishly illustrated biography sets his legacy of scientific achievements against the ideas and reactions of his fellow scientists and other contemporaries.

Environmental History of the Rhine-Meuse Delta P.H. Nienhuis, 2008-05-06 This unique text presents the environmental history of the lowland delta of the rivers Rhine and Meuse. It is an ecological story of evolving human-environmental relations and how they cope with climate change and sea-level rise. The text offers a combination of in-depth ecology and environmental history. The synthesis presents a blueprint for future management and restoration, from progressive reclamation of land in the past, to adaptation of human needs to the forces of nature.
